ABOUT US

Projtech Engineering Pvt. Ltd. Founded in 2012, we are involve in manufacturing of Air Washer, Air Scrubber, Fan Coil Unit and Air Handling Unit for a wide range of HVAC application e.g. Hotel, Hospital, Shopping Malls, Kitchens ventilation.

We have achieved a remarkable identification among clients due to our straight forward and transparent business dealings.

Projtech quickly has established itself as a up growing manufacturer of Air Handling Unit product in india.

On the basis of the advance management idea and perfect quality system, Projtech constantly strives to absorb and adapt the new advance technology; actively promote its product, precisely control the quality in each of its working processes to keep it at the advanced and leading position in the HVAC industry of our country.

The demand of customer is the foundation for us to survive and develop.

Surpass the expectation of customer is the method for us to succeed.

Projtech will continue to keep our developing stategy that combines technique ,quality and service. With innovating techniques, excellent quality and quality service, we will create magnificently future with our customers.

- **Air Handling Unit**

Air handling unit is a device used to regulate and circulate air as part of a heating, ventilating, and air-conditioning (HVAC) system. Since, it does the most important function of circulating fresh air, by taking in outside air and conditioning it. The exhaust air which can also be termed as "stale air" is discharged. Thus, it ensures healthy and top notch health as well. There are dampers with mixing chamber, as they do the basic function of keeping a check on the ratio between the air which is returned, exhausted as well as that of outside air.

- **Floor Mounted Air Handling Unit**
- **Ceiling Suspended Air Handling Unit**

- **Scrubber Unit**

Wet Scrubber

We at Pojtech Engineering Pvt. Ltd make scrubbers which are more efficient than spray towers and have lower liquid requirements. It is finely tuned to eliminate odours and particulate associated with bacterial, viral and mould contamination.The unit is designed for removal of large amounts of smoke & ash. It works well in medium to large commercial facilities like hospitals, clinics, schools, offices, manufacturing & agricultural facilities.

Dry Scrubber

Dry Scrubbering is one of the latest technologies which has been developed and is used in effective waste removals. It can be used to remove sulphur dioxide, hydrochloric acid etc. from the environment. In the Dry Air Scrubber manufactured by Pojtech Engineering Pvt Ltd, we will provide you with a superior quality scrubber which will eliminate the impurities from the air in a jiffy. The pollutants are dried and collected at the end of the vessel and can be removed very easily. The dry scrubber units are some of the most efficient types of pollutant removers and are used regularly in big industries.

- **Air Washer**

To meet specific industrial need of our clients, we manufacture a range of high quality Air Washer (Evaporative Cooling Unit). Pojtech Engineering Pvt Ltd offers superior quality Air Washer System, that works on the principle of cooling outside air by passing it over water-saturated pads, causing the water to evaporate into it. The cool air is then directed into the required space, and pushes warmer air out through the given vents. Air Washer Unit is a very energy-efficient means of cooling. These washers have long working life and are available in modular designs. They are equipped with an anti-microbial protection system to ensure hygienically cleaned air. Our range also offers air washer and fan and blower

- **Floor Mounted Air Washer**

- **Ceiling suspended Air Washer**

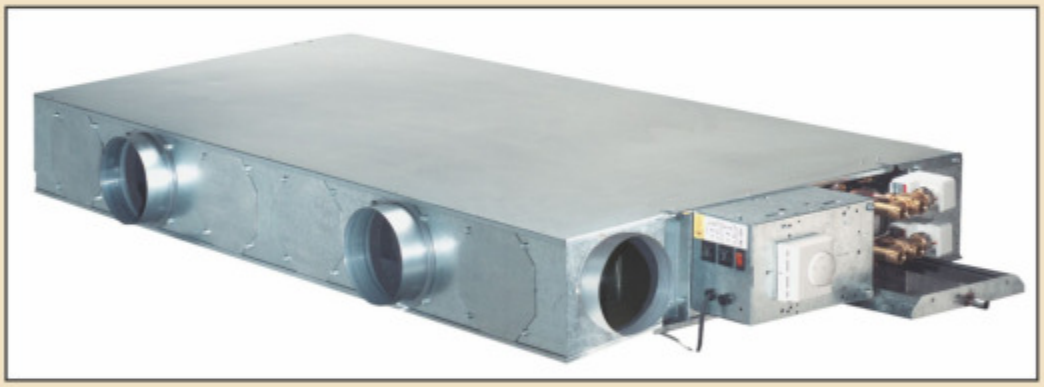
Engineering Pvt Ltd

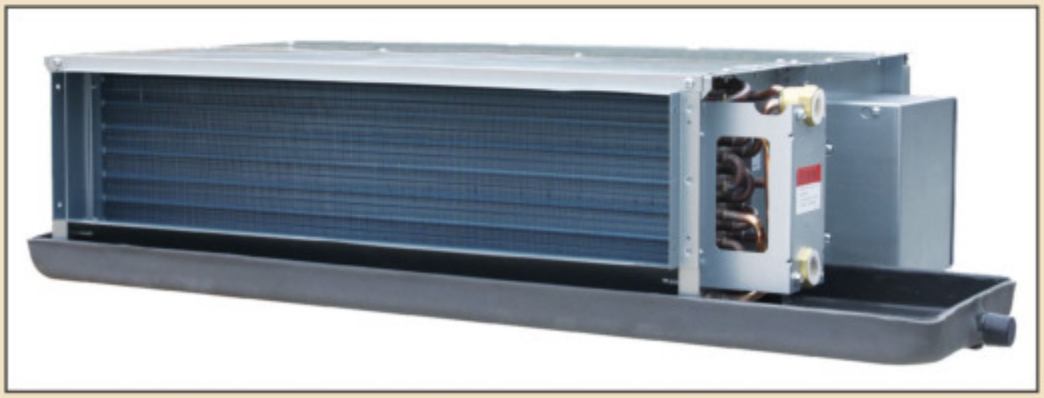
- **Fan Coil Units**

Fan coil units are usually used to cool large areas. Pojtech Engineering Pvt Ltd. Supplies different types of Fan Coil Units. Our Floor-Mounted Fan coil units are some of the best in the market. The products made by the company are engineered to control the air conditioning system of a room and buildings.The superiority of the company is in the fact that raw materials of top notch quality are used to provide them a rugged structure. They are also very easy to install, need low maintenance and also have installed heating and cooling devices within. Our products are mainly brought into application in office buildings, hotels, residential complexes and many more places for heating and cooling water supplies.

- **Vertical Floor Mounted**

- **Horizontal Concealed Ceiling Suspended**





• Dehumidifier

Dehumidifier are designed and manufactured to remove moisture from air.

Projtech Dehumidifier can be installed as stand alone unit to control humidity in any space requiring humidity control , it can be completely packaged as per need & requirement. The single unit can have inbuilt Precooling section to cater all fresh air needs, Post cooling section for temperature control & moisture control, filters to handle large airflow requirements & in built condensing unit .

The dehumidifier has very wide application basically in manufacturing, processing, product drying, R & D, Labs, Packing, Cold Store and in almost all the industries.
