I can help you convert the aluminium container size chart image into a PDF. I' create and verify a downloadable PDF file directly in this chat right now.

Quickest way on Android:

1. Download the image above to your phone.
2. Open it in **Gallery** or **Google Photos**.
3. Tap **Share** or the three-dot menu and choose **Print**.
4. Select **Save as PDF** as the printer.
5. Tap the PDF download/save icon.

You'll have a PDF containing the original image, including all the dimensions and diagrams.
