PV SOLARIUM

Harness the Sun.
Power a Brighter Tomorrow.

Solar products and renewable energy solutions for homes, businesses and industrial needs.

Renewable energy • Practical solutions • Greener future

Powering everyday needs with solar

PV Solarium is a solar energy business serving residential, commercial and industrial requirements. Its product range includes solar water heaters, solar power systems, solar LED street lights, solar panels and solar power plants. The goal is to help customers explore energy-efficient solutions and move toward cleaner power.

Product range Solar heating, lighting and power	**Customer segments** Homes, businesses and industry	**Support** Product guidance and technical assistance

Our Product Portfolio

A broad selection of solar and renewable-energy products for different applications. Product specifications and availability should be confirmed for each requirement.

Solar Water Heaters

Solutions for heating water using solar energy, including domestic and industrial options.

Solar Power Systems

Home and hybrid solar power systems designed around energy needs and site requirements.

Solar LED Street Lights

Solar-powered outdoor lighting options, including integrated LED street-light models.

Solar Panels

Solar panel and rooftop solar plant options for residential and commercial projects.

Solar Power Plants

On-grid, off-grid and grid-tied solar power plant options for different installation scales.

Solar Water Heater Tanks & Vacuum Tubes

Components and accessories for solar water-heating systems.

Swimming Pool Heat Pumps

Heating equipment options for swimming-pool applications.

Explore Your Requirement

Contact PV Solarium to discuss product fit, capacity and a project-specific quotation.

Featured product examples

Residential	2 kW home solar power system; 1 kW on-grid solar power system
Commercial	Commercial solar power systems; rooftop solar plant options
Lighting	12 W and 16 W solar LED street lights; high-mast street-light options
Heating	Supreme ETC solar water heater; industrial solar water heater

A Practical Partner for Solar Needs

Choosing a solar solution starts with understanding the site, intended use, capacity and operating requirements. PV Solarium highlights tailored product options and customer support throughout the buying process.

Solutions for varied needs

Product choices for residential, commercial and industrial applications.

Energy-conscious approach

Solar options that can support reduced reliance on conventional electricity, depending on system design and usage.

Guidance before purchase

Discuss product specifications, installation requirements and suitable system capacity.

Support orientation

Customer assistance and technical guidance for a smoother product selection process.

How to get started

01 — Share your requirement Tell us the application, location and expected capacity.	**02 — Review product options** Discuss suitable products, specifications and scope.
03 — Request a quotation Confirm pricing, taxes, delivery and installation scope.	**04 — Confirm the project** Proceed after technical and commercial details are agreed.
