

Benefits of Hollow Mats:-

- Excellent drainage properties.
- Easy to clean & hygienic.
- Highly durable, therefore great value for money & resilient.
- It absorbs impacts which make it a protective surface.
- Anti-slip finish which provides excellent grip even when soaked wet.
- Water & rain passes through holes leaving a water free surface.
- Natural look, low maintenance - rubber grass are manufactured with an open-hole grid format that allows grass to grow through giving the matted area a natural turf look. The grid structure also allows rain & surface water to drain away freely. When the grass grows, matting can also be mowed with a conventional lawn mower as normal. Other than mowing the grass, there is no other maintenance required which means low running cost.
- Easy DIY Installation.
- Can withstand extreme temperatures & all types of weather & elements & does not lift up or displace in windy weather.
- Rubber grass mats give a high standard of safety in children's play area & play grounds. They provide a stable & permanent surface to protect children from injury.

Made from recycled rubber which means they can also be easily recycled, when they reach end of their lifespan. The mat does not rot or leak noxious substances into the ground once installed. This mat is one very often requested & probably one of the best for floor protection & anti-fatigue safety mat. With so many companies producing this product, you should be careful while choosing them to ensure that you get only the best from them.
