

SAHAY RACKS[®]

CREATING NEW FLOOR SPACE

AN ISO 9001: 2008 CERTIFIED COMPANY

SAHAY

Production Unit Entry Point

The Company

Sahay Racks is one of the leading manufacturer of steel storage racks exclusively for automobile spare parts. Sahay racks was established in 1980 and is an ISO 9001:2008 certified manufacturing concern, having state of arts technology and fully CNC controlled plant.

The Racks range are very unique to meet the requirement of spares storage in automobile sector. Sahay racks manufactures storage racks to suit the need of automobile sector spare parts management.

Sahay Racks is committed to cater the need of the market. The racks emerge from a very modern and well developed production facility located at Tuticorin - Tamilnadu - India (South).

Sahay racks employs a team of highly skilled and experienced professionals, who work towards the accomplishment of the goal to provide a complete solution to storage. Frequent research and development and the spirit of the employees has enabled the Company to successfully launch new storage rack system and develop new market.

The Company is committed to maintain the highest level of Quality control procedures as well as the health and safety policies resulting in high quality products and complete customer satisfaction. The company has the accreditation of ISO 9001:2008.

SAHAY

OUR MISSION

Managing space better and business easier through continuous R&D and tailor made strategies for profitable growth.

OUR VISION

Achieve highest level of utility in every space and enhance the customer's experience through our expertise.

Our Scope starts from the complete study of our clients requirements and prepare CAD layouts as per the space available and suggest the best utilisation of space.

Racks are manufactured under modern state of art facilities, which undergoes a range of quality test from raw material to finished products.

Our Products are manufactured from qualitative steels from reputed manufacturers across India. All products are duly pre-tank processed under multi-tank operations for de-greasing, anti-rust treating, zinc phosphate treated, and powder coated as per the specification of automobile manufacturers.

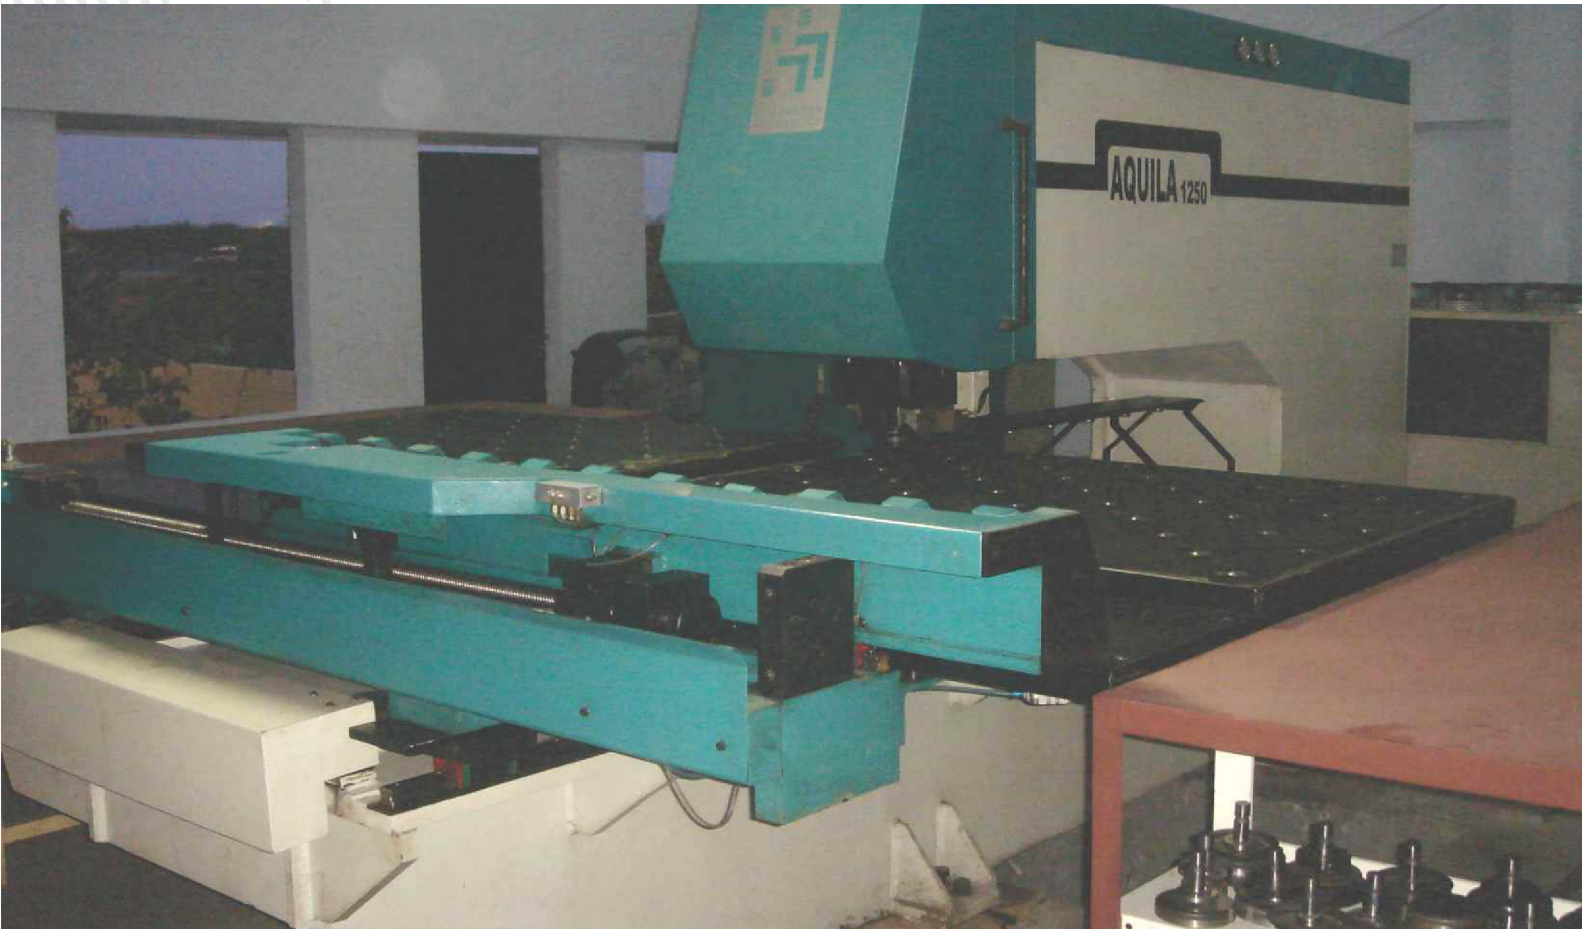

Our Product Range

- Small Parts Rack
- Medium Parts Rack
- Body Parts Rack
- Door Rack
- Glass Rack
- Bumper Rack
- Heavy Duty Rack
- Special Tool Rack
- Cantilever Rack
- Accessories Rack
- Shock Absorber Rack
- Tyre Rack
- Battery Rack
- Trolleys
- Ladders
- Locker Cupboard
- Bunk Bed
- Mezzanine Flooring

SAHAY

CNC Machine

The Process starts with the preparation of layout and CAD as per the requirement of our customer.

The designing of racks as per the specification is fed in the computer which systematically runs the punching machine there by enhance the quality in the finish.

SAHAY

Unlike the normal punching of panel, the CNC machine enables the perfection. This enables trouble free maintenance of racks.

Shearing Machine

The sheets after processing in CNC machine is fed into cutting machine which automatically cuts the sheets to the sizes as per the measurement fed in the computer. Since the sizes are computer controlled, the perfection in the finish of racks is attained.

Folding Machine

The sheets are folded for formation of rack panel, as the bending of sheet is done by automated machinery uniformity and perfection is attained. The folding gives the final outlook of the rack, hence it need perfection.

SAHAY

Preparatory

The angles and pipes are cut to sizes as per the need. The work is done by skilled labour for accurate measurement and perfection

The angles and pipes are grinded for flawless finish after the cutting process is finished. This ensures the perfection and smoothness in the finished product.

SAHAY

Powder Coating

Powder Coating has an edge over painting, as the finish will be smooth and even.

Sahay Racks have inbuilt powder coating plant which is at the best state of art technology. Powder coating is more reliable & durable, making it more superior. It makes our rack trouble free & zero maintenance.

Powder coating process passes through seven tank cleaning for de-greasing, anti-rust treatment, zinc phosphate and powder coated as per the standard recommendations.

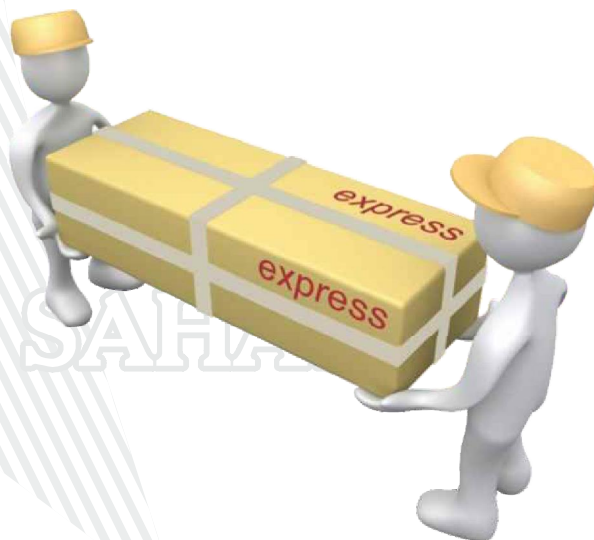

Sahay Racks uses the technological advancement to its production taking its unit to great heights. Sahay Racks is more dependable as perfection & accuracy are their aspiring words.

Packing & Despatch

The Panels are finally moved to preparatory department where the material are ready for delivery. The finished products are packed with corrugated sheets and fastened with nylon tape which ensures safety of rack material.

Since Sahay Racks is self - dependent, making of racks to the taste & need of the customer is attainable.

Quality Test

Methyl and Ethyl test

bending test 2

bending test 1

Scratch test

Each batch of finished product passes through quality test at our inbuilt lab.

SAHAY

Special features

Our special features in rack manufacturing includes upward folding of front rack panel which ensures anti-slippage of spares from the panel. Another feature is that the partition plates can be adjusted as per the need of bin space. Since the holes punched in the panels are done by CNC machine perfection in measurement is maintained, and adjusting the partitions are easy and will fit perfectly. Bin can be adjusted as per the need without any additional cost. Each panel has been provided with slots for fixing partition.

Special features

The CNC Punches are so perfect to fit the partition plates perfectly. The partition plates are fitted in the panel with the help of screws against the reciprocal bending on both sides. Since the partitions are adjustable, no further cost is incurred for expansion of bin sizes. Our racks not only provide utility of storage, but also helps in better management of floor space. one part at one bin helps in easy access, easy handling and control. The partition in the heavy duty racks can also be adjusted as per the need and according to the material handling technique.

Small Parts Rack

Customized Storage Solution for easy & safe Storage of small parts. Storage capacity is 207 Bins per Rack. One Part in one Bin ensures easy spares management.

SARFAY

Open Type Rack

Open type racks can accommodate plastic bins of various sizes and is customized to hold the bins without compromising space.

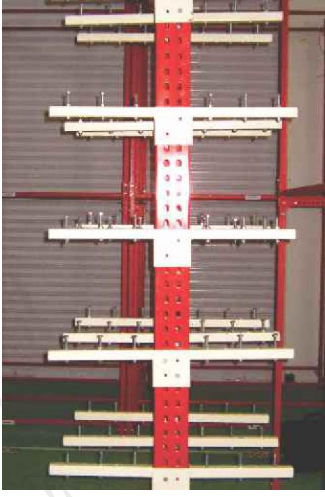

SAHAY

Medium Parts Racks

Providing the space Needed for Storing Medium size parts with more room space for easy accessibility. Racks can be with partition or without partition and in various sizes to cater the need of spares holding / management. Loading capacity is 100kg per panel.

Cantilever Rack

Provides Ample Space for Storing Lengthy Material and Easy Handling. Can hold uneven hoses. Levers are adjustable and user friendly.

SAHAY

Heavy Duty Rack with out Partition

With stands the pressure of heavy Material and Effective Material Handling. Loading capacity is 500kg per deck.

SAHAY

Muffer Rack

Designed to hold mufflers and make the handling easier.

SAHAY

Back end rack with door

Designed for keeping the dismantled parts from te service vehicle. It has lock and key facility to keep the parts safety.

SAHAY

Special Tools Rack

Specially Design for Stacking Tools for easy Handling. Tools can be stored in vertical and horizontal positions.

SAHAY

Accessories Bulk Rack without Door

Specially designed to hold accessories in bulk like seat covers, steering covers, dashboard accessories and interior accessories.

SAHAY

Accessories Bulk Rack with Door

Specially designed to hold accessories in bulk like seat covers, steering covers, dashboard accessories and interior accessories. Special provision of door / locking facility is made to store high value items.

Special Tool Trolley

Special tool rack with mobility enables movement of tools to work bay with out any hardship and hassles.

Glass Trolley

Enables to shift glass from stores to workshop without damaged and time consumption. Easy way to shift the glasses in bulk with easy. Makes handling of glasses much easier.
