

MURLIDHAR DIE & TOOLS

About Us

Murlidhar Die & Tools is a new and dynamic organization established in **1998** with fresh enthusiasm and a strong passion to excel in the industry. We have established ourselves as a trusted **manufacturer, exporter, service provider and supplier** of high quality die casting products including **Die Casting Finish Components, Aluminium Die Casting, Aluminium Pressure Die Casting, Pressure Die Casting, Gravity Die Casting, Aluminium Casting, Plastic Injection Mould, Blow Mould, Labour Work On Cnc Machine** etc. We are certified as a quality organization involved in producing and supplying a range of highly evaluated machines. These machines are tested at our quality control laboratory and then dispatched to our clients.

We understand the necessity of strong infrastructural facility and therefore have invested hugely in creating a superb infrastructure including our production unit, quality control, warehouse and other smaller units. All these units are equipped with proper machinery to execute the process in the best possible manner. We test our products like **Aluminium Die Casting, Aluminium Pressure Die Casting, etc** on the ground of various quality parameters including hardness testing, tensile testing and others. Apart for that, we also provide highly effective installation and after sales services to our customers.

Quality Assurance

We give utmost importance to all aspect of quality of products. We have developed a large quality control unit with proper instruments to check every product like **Aluminium Die Casting, Aluminium Pressure Die Casting, etc** with proper detailing. We have invested hugely on the quality control unit so that we can get an edge over other seasoned players in the market. We undergo streamlined inspection on each product with consistency. We have latest machinery including vernier calipers, screw gauges, slip gauges, bore gauges, advanced coordinate measuring machines and others.

Product Range

We offer our customers with the following products:

- **Die Casting Finish Components**
- **Pressure Die Casting**

- **Gravity Die Casting**
- **Aluminium Casting**
- **Labour Work On CNC Machine**
- **Elevator Electrical Motor**
- **Aluminium Die Casting**
- **Aluminium Pressure Die Casting**
- **Aluminium Gravity Die Casting**
- **Aluminium Pressure Die**
- **Aluminium Die Casting For Electrical Industries**
- **Aluminium Spare Parts Casting**
- **Elevator Breaks Arms**

Application Area

We have developed a streamlined business process with proper emphasis on quality. Our products are quite popular in various industries because we have improved the operation efficiency of the process. We also do periodic review of our quality system to improve the effectiveness of our process. We take occasional customer feedback and try to create a good and healthy environment. Our products are widely used in the following industries:

- Engineering Industry Casting
- LED Lighting Fixture Casting
- Heating Ventilation Industry Casting
- Metro & Transportation Industry Casting
- Defense Industry Casting
- Electrical/Electronics Industry Casting

Company Profile

We, Murlidhar Die & Tools, are a young and dynamic organization involved in manufacturing and supplying a range of top quality CNC machines, die casting and allied products. Established in 1998, we have just entered into the business and have already stirred the market as a manufacturer and supplier with our superb quality products. We have realized the huge competitiveness in the market and thus created a great infrastructural facility that helps us to streamline our business process. As a service provider, we also provide total installation, after sales and other services to our customers. Moreover, in a short period of time we have developed a great distribution network in India.

Nature of Business	Manufacturer, Exporter, Service Provider, Supplier
Year of Establishment	1998
No. of Employees	12
No. of Production Line	1
Banker	Kalol Nagrik Cooperative Bank
Annual Turnover	Rs. 1 crore

Product Range	
Primary Competitive Advantages	<ul style="list-style-type: none"> • Timely delivery of products • Total quality assurance • Competitive pricing • Large distribution network

Aluminium Die Casting Components

Product Description

With sincerity and hard working to serve clients in the best possible manner, we are engrossed to provide a wide gamut of **Aluminium Die Casting Components**. These components are manufactured using optimum quality aluminium by skilled professionals. Our provided components are used for providing complex metallic shape to various components within closer tolerance without any defects. Our clients can purchase the offered **Aluminium Die Casting Components** at highly effective prices.

Key points:

- Supreme surface finish
- High tensile strength
- Dimensionally accurate
- Non corrosive

Aluminum Pressure Die Casting

Aluminium Gravity Die Casting

Product Description

With an aim to gain utmost recognition among the global clients, we have been engrossed in offering a wide range of **Aluminium Gravity Die Casting**. Made available in different sizes, patterns and shapes, the offered casting is manufactured at our advanced premises with the aid of ultra-modern techniques. Aids in easy casting of thin walls, it uses high pressure to fill the mould with liquid alloy. Finding application in different engineering industries, the offered **Aluminium Gravity Die Casting** is provided to our clients at rock bottom prices.

Key points:

- Rugged design
- High strength
- Withstand extreme temperature
- Ensure defect free shaping of components

Aluminum Die Casting

Product Description

Supported by team of experienced professionals, we are able to offer a wide gamut of **Aluminium Die Casting**. With the use of optimum quality of aluminium and cutting edge techniques, this die casting is manufactured with perfection as per international quality standards. Our offered die casting is used for providing desired shape to various metal parts. In addition, the offered **Aluminium Die Casting** is made available with us at market leading prices.

Features:

- Premium finish
- Smooth casting surface
- Thermal resistance
- High durability

Aluminium Die Casting for Electrical Industry

Product Description

We have gathered customer base in this domain by offering a flawless range of **Aluminium Die Casting for Electrical Industry**. The offered casting is manufactured with perfection under experienced workforce at our well-equipped production unit. Admired for its flawless structure, the provided casting is especially utilized in electronic industry for providing desired shape to different components. Our clients can purchase the provided **Aluminium Die Casting For Electrical Industry** at affordable prices from us.

Major Key Features:

- Strong construction
- Smooth finish
- Heat resistance
- Longer life

Aluminium Die Casting Parts

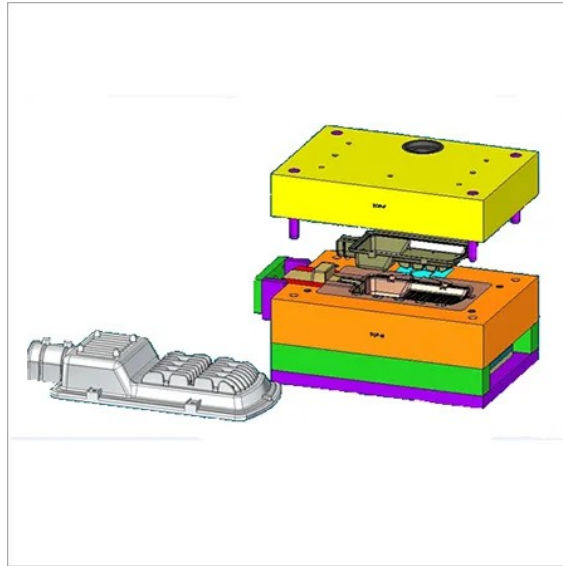

Product Description

We have been engaged in offering the finest quality range of **Aluminium Die Casting Parts** in different specifications. These casting parts are manufactured with utmost perfection using cutting edge techniques by our ingenious professionals using pure aluminium metal. Known for providing defect free shapes to different components, the provided parts find their importance in electrical, automotive, metal fabrication, mechanical and related industries. These **Aluminium Die Casting Parts** are provided to clients at marginal prices.

Features:

- Sturdiness
- Longer life
- Compact and durable
- Manufactured with perfection

Aluminium Pressure Die

Product Description

Relying upon our highly developed manufacturing unit, we are able to manufacture and supply an optimum array of **Aluminium Pressure Die**. The offered pressure die is manufactured with the aid of advanced technology using premium grade aluminium at our premises. The provided die is widely utilized in various fabrication applications to provide defect free fabrication of various components. In addition, this **Aluminium Pressure Die** can be availed from us at industry leading prices.

Features:

- Strong construction
- Durable finish
- Thermal resistance

Aluminium Pressure Die Casting Parts

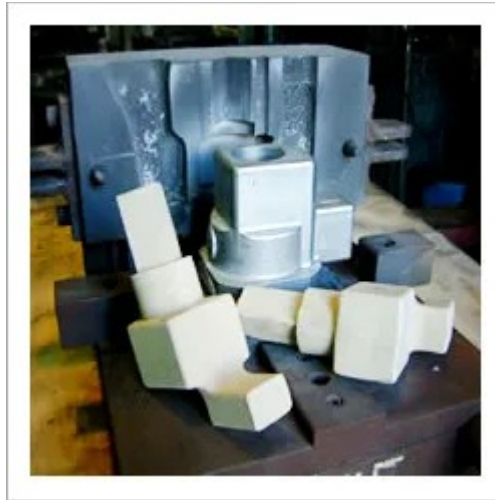

Product Description

In order to provide best quality products to the clients of various industries, we are betrothed in offering an excellent quality array of **Aluminium Pressure Die Casting Parts**. These casting parts are manufactured using advanced techniques by our adroit professionals as per international quality standards. Our offered parts are used to cast highly precise geometric components and give complex shape without any defect. Apart from this, our clients can get these **Aluminium Pressure Die Casting Parts** from us in bulk at very reasonable prices.

Features:

- Accurate dimensions
- Corrosion resistance
- High durability
- Flawless finish

Aluminium Gravity Sand Casting

Product Description

Being a client centric organization, we are successfully engaged in providing a wide gamut of **Aluminium Gravity Sand Casting**. Our adroit professionals use the best grade aluminium and contemporary techniques for defect free manufacturing of this sand casting as per set industry standards. Ensuring to provide flawless shape to various industrial components, the provided casting is widely demanded in various engineering and fabrication applications. In addition, our clients can purchase the provided **Aluminium Gravity Sand Casting** at economic prices in bulk.

Features:

- Suitable for repetitive usage
- Defect free structure
- Smooth finish
- Excellent durability

Gravity Die Casting

Product Description

We are counted as leading firm in this domain for manufacturing and supplying quality approved **Gravity Die Casting**. Our team of highly experienced and skilled professionals uses latest techniques and supreme grade aluminium metal in order to manufacture this die with perfection. Suitable for fabrication of both medium and low volume products, this die aids in providing defect free shape to different components. The provided **Gravity Die Casting** can be availed from us at budget friendly rates.

Features:

- Accurate dimension
- Compact design
- Durable finish
- Strong construction

Elevator Machine Brake Arms

Alluminium Brake Arm
