Reliable And Excellence Through Quality

HORIZONTAL / VERTICAL SUBMERGED CENTRIFUGAL PUMP

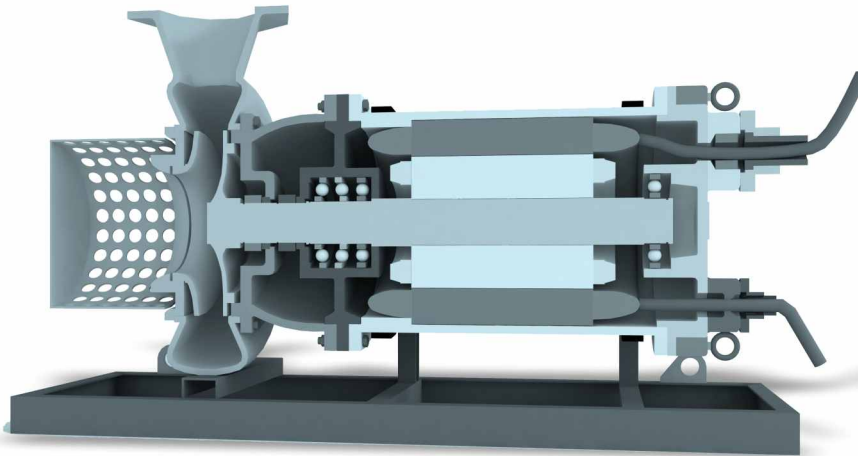

Jasco Horizontal / Vertical Submerged Centrifugal Pumps are designed to handle Clear Water. It can Handle Clear Water or Low Velocity clear liquids at moderate heads more efficiently and economically than any other type of pump. Precision balancing of all factors in their design provides this efficient operation along with mechanical dependability and low cost maintenance.

Jasco Horizontal / Vertical Submerged Centrifugal Pumps simplicity of design ensure long, efficient unit life and minimum power consumption; all parts are standardized and accurately machined for true alignment, increasing overall durability.

Impellers are dynamically balanced and constructed with single inlets, practically eliminating end thrust and resulting in high operating efficiency.

Sr.	Description	Material	Sr.	Description	Material
1	EYE BOLT	C.S.	13	IMPELLER	S.S.-316
2	TOP COVER	C.I. FG -260	14	SPIRAL PLATE	C.I. FG- 260
3	BALL BEARING N/D	C.S.	15	STRAINER	S.S.
4	ROTOR DIECAST	CRNO + ALLU.	16	IMPELLER LOCKET NUT	S.S.
5	MOTOR BODY	C.I. FG -260	17	MECHANICAL SEAL	TC/TCSIC/SIC
6	STATOR STAMPING	CRNO	18	OIL	20W40
8	ROROT SHAFT	S.S. -410	19	WINDING COIL	COPPER
9	BEARING COVER	C.I. FG -260	20	RUBBER GROMATE	NITRIAL RUBBER
10	BALL BEARING D/E	C.S.	21	CABLE	CU+PVC
11	BEARING HOUSING	C.I. FG-260	22	CABLE PROTECTOR	NITRIAL RUBBER
12	OIL CHAMBER	C.I. FG- 260	23	BASE FRAME	M.S. FABRICATED
13	PUMP CASING	C.I. FG- 260			

Note : MOC & design are subject to change without prior intimation

APPLICATION

- Port & Docks.
- Water Supply Scheme.
- Water / Effluent Treatment Plants.
- Steel & Cement Plants.
- Lifting Raw Water from Different Sources.
(Canal, River, Dam, Check Dam,
French well or Jack well, Large Lakes)

RANGE

- Out let Size : 50 mm to 400 mm.
- Capacity : 2000 m3/Hr.
- Head : Upto 120 Mtr.
- RPM : 960/1450/2900
- Protection / Enclosure : IP 68
- Duty : S1
