Our Mission and Values

Our Mission is to use extensive use extensive experience for delivering tangible business results and enabling our clients to get profit. We strive to build long-term client relationships based on mutual trust and respect.

Our Vision is to bring new concepts in the field of manufacturing & service industry to enhance the quality of projects in India.

Our Values based on our management principals:

- Committing to client satisfaction as our most important business objective.
- Recognizing our achievements as the work of the people who comprise KPPL. We encourage initiative, recognize individual contribution, treat each person with respect and fairness.
- Maintaining the highest standards of professionalism and technical competence.
- Maintaining the highest standards of ethics and business conduct and operating at all times within the laws of the countries in which we do business.
- Identifying and responding aggressively to new opportunities, and committing to success in each undertaking.

SEWERAGE PROJECTS

- **KONCEPT PIPES** HDPE potable water pipe designed for use in the municipal and industrial markets provides a monolithic, corrosion and leak free piping system for transporting potable water and other fluids for industrial applications. HDPE pipe is an excellent choice due to its proven track record of providing longevity and reliability in fluid piping systems. With multiple manufacturing locations and a vast distributor network, the end user is assured of receiving superior products combined with maximum service. The pipe KPPL supplies to these markets is quickly being adopted as the better performing material of choice due to its improved properties compared to conventional piping materials like PVC or ductile iron. KPPL services this important market because HDPE pipe provides a leak free reliable water system that protects our precious water resources, especially in those arid regions where water is scarce.

WATER PROJECTS

- **KONCEPT PIPES** HDPE potable water pipe designed for use in the municipal and industrial markets provides a monolithic, corrosion and leak free piping system for transporting potable water and other fluids for industrial applications. HDPE pipe is an excellent choice due to its proven track record of providing longevity and reliability in fluid piping systems. With multiple manufacturing locations and a vast distributor network, the end user is assured of receiving superior products combined with maximum service. The pipe KPPL supplies to these markets is quickly being adopted as the better performing material of choice due to its improved properties compared to conventional piping materials like PVC or ductile iron. KPPL services this important market because HDPE pipe provides a leak free reliable water system that protects our precious water resources, especially in those arid regions where water is scarce.

Telecom Projects

- **KPPL** is leading the telecommunications market by offering not only the most complete product offering, but the most innovative products in the industry.
- Silicone & Wave Ribbed products allow for the fastest cable installation while achieving the longest installation distances in the industry, lowering the cost of your projects. Along with our complete offering of accessories, no company can offer such a complete package for your project needs.
- Continuing the innovation process, KPPL has developed a complete line of Konzept Duct and Future path products. Again, offering solution, which lowers your installation costs while offering the most expandable network to meet all your future needs. Look no further then KPPL for your telecommunications duct and conduit needs.

Gas Projects

- **KPPL** offers Turnkey solutions for Industrial Installation for compressed gases, Auto LPG Dispensing Stations, LPG Reticulated Systems, Bottling Plants both Mobile and Skid mounted packages.

Our goal is to satisfy all our clients. Our main thrust & emphasis are search for excellence and continuous quest for improvement. We honour commitments to forge long-term partnerships with clients for the mutual benefits.

We design cost effective and high performance systems. The complete success is founded upon the ability to recognize the challenge faced by our client and to develop new creative systems that offers unique service. We achieve our goals through standardization and continuous improvement. All the functions are reviewed and personnel trained to better themselves.
