

# Sahavvi Hybrid Seeds (India) Pvt. Ltd.

FIELD CROP & VEGETABLE  
SEEDS CATALOGUE

### SHRI LAKSHMI

- Plant Habit :- Large Determinate
- Maturity (DAT) :- 50-55 days
- Fruit Weight :- 80-90 gm
- Fruit Shape :- Flat Round
- Fruit Shoulder Color :- White
- Uniform Sized Fruit till last harvest.
- Extra early hybrid tomato variety.
- High resistance to ToLCV.

### SAMRIDHI

- Plant Habit :- Determinate
- Maturity (DAT) :- 60-65 days
- Fruit Weight :- 90-100 gm
- Fruit Shape :- Flat Round
- Fruit Shoulder Color :- White
- Good for long distance shipping.
- tolerant to ToLCV.
- High yielding capacity hybrid.

### PARAS-007

- Plant Habit :- Semi Determinate
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-90 gm
- Fruit Shape :- Flat Round
- Fruit Shoulder Color :- White
- Good heat set and uniform sized fruit till last harvest.
- High resistance to ToLCV.

### PADMINI

- Plant Habit :- Tall Determinate & Vigorous with Good foliage Cover
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 90-100 gm
- Fruit Shape :- Flattish Round Desi Fruit
- Fruit Shoulder Color :- Light Green
- Highly acidic and very good regeneration ability.
- Tolerant to ToLCV.

### VIRAT

- Plant Habit :- Determinate & Excellent Plant Vigour
- Maturity (DAT) :- 65-70 days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Oval
- Fruit Shoulder Color :- White
- Suitable for rainy (Kharif) & post rainy (Rabi) season.
- Tolerant to ToLCV.

### HIM PUSHPA

- Plant Habit :- Indeterminate Tall Vigorous Plant, Medium foliage Cover with profuse Branching
- Maturity (DAT) :- 65-70 days
- Fruit Weight :- 90-100 gm
- Fruit Shape :- Uniform & Oblate
- Fruit Shoulder Color :- Light Green
- Long duration fruiting up to 6 month.
- Wide adaptability and good for long distance transportation.
- Tolerant to ToLCV.

### ABHIRAM

- Plant Habit :- Semi Determinate & Vigorous
- Maturity (DAT) :- 65-70 days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Flattish Round Desi Fruit
- Fruit Shoulder Color :- Green
- Fruit are firm with good keeping quality.
- Good heat set and high yield potential early blight resistance.
- Tolerant to ToLCV.

### VINAYAK

- Plant Habit :- Determinate
- Maturity (DAT) :- 68-70 days
- Fruit Weight :- 90-100 gm
- Fruit Shape :- Oval
- Fruit Shoulder Color :- White
- Good heat set and uniform sized fruit till last harvest.
- Highly tolerant to ToLCV.

### MAHA PADMA

- Plant Habit :- Tall Determinate & vigorous
- Maturity (DAT) :- 75-80 days
- Fruit Weight :- 90-100 gm
- Fruit Shape :- Flattish Round
- Fruit Shoulder Color :- Green
- Glossy color, highly acidic and very good regeneration ability.
- Tolerant to ToLCV.

### KALPATARU

- Plant Habit :- Large Determinate
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-90 gm
- Fruit Shape :- Flat Round
- Fruit Shoulder Color :- White
- Good heat set and uniform sized fruit till last harvest.
- High resistance to ToLCV.

### VARUN

- Plant Habit :- Determinate
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-90 gm
- Fruit Shape :- Firm Round
- Fruit Shoulder Color :- Green
- Good heat set and uniform sized fruit till last harvest.
- High Tolerance to ToLCV.

### SUPER LONG GREEN

- Plant Habit :- Semi Erect and Very Strong
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 75-80 gm
- Fruit Shape :- Cylindrical Long
- Fruit Color :- Green
- Calyx :- Non-Spiny with Green Tinge
- Mixed bearing habit of fruit.

### ANURAG

- Plant Habit :- Large Determinate
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-90 gm
- Fruit Shape :- Flat Round
- Fruit Shoulder Color :- White
- Good heat set and uniform sized fruit till last harvest.
- High tolerance to ToLCV.

### KALINDI

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 250-300 gm
- Fruit Shape :- Obovate
- Fruit Color :- Blackish Purple
- Calyx :- Non-Spiny with Green Tinge
- Less seed content in fruit, suitable for bhartaa preparation.

### PRABHA KIRAN

### HYBRID BRINJAL

- Plant Habit :- Erect and Non-Spiny
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 250-300 gm
- Fruit Shape :- Round
- Fruit Color :- Dark Purple
- Calyx :- Non-Spiny Green with Purplish Tinge
- Less seed content in fruit, suitable for bhartaa preparation

### GOVIND (BLACK LONG TYPE)

- Plant Habit :- Erect and Non-Spiny
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Cylindrical Long
- Fruit Color :- Dark Purple
- Calyx :- Non-Spiny Green with Purplish Tinge
- Less seed content in fruit.
- Suitable for long distance transportation.

### KRIKA

- Plant Habit :- Semi Spreading
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 150-200 gm
- Fruit Shape :- Round
- Fruit Color :- Pink
- Calyx :- Non-Spiny with Green Tinge
- Less seed content in fruit, good color retention capacity of fruit.
- Fruit can be harvested at smaller stage for stuffing purpose.

### HIRA

- Plant Habit :- Semi Spreading
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 250-300 gm
- Fruit Shape :- Oblong
- Fruit Color :- Green with Blotches
- Calyx :- Non-Spiny with Green Tinge
- Less seed content in fruit.
- Suitable for bhartaa preparation.

### GULABO

- Plant Habit :- Semi Spreading
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 100-150 gm
- Fruit Shape :- Ellipsoidal
- Fruit Color :- Pink
- Calyx :- Non-Spiny with Green Tinge
- Suitable for long duration cropping.
- Good color retention of fruit at high temperature.

### PANNA

- Plant Habit :- Semi Spreading & Vigorous Habit
- Maturity (DAT) :- 55-60 days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Ellipsoidal
- Fruit Color :- Green with Blotches
- Calyx :- Non-Spiny with Green Tinge
- Suitable for long duration cropping.
- Good color retention of fruit at high temperature.

### HARA TARA

- Plant Habit :- Semi Erect and Very Strong
- Maturity (DAT) :- 60-70 Days
- Fruit Weight :- 60-70 gm
- Fruit Shape :- *Oval*
- Fruit Color :- Green with Blotches
- Calyx :- Green and Non-Spiny
- Tolerant to Bacterial wilt.
- Shiny & Prolonged Fruiting.

### WHITE LONG

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 50-66 Days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Long
- Fruit Color :- White
- Calyx :- Green
- High Yield with prolonged Fruiting.
- Tolerance to Diseases.

### SHIKHAR

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 50-55 Days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Long
- Fruit Color :- Dark Purple
- Calyx :- Green and Non-Spiny
- Tolerant to Bacterial wilt.
- High Yield with prolonged Fruiting.

### PK 27

- Plant Habit :- Semi Erect and Compact
- Maturity (DAT) :- 55-60 Days
- Fruit Weight :- 80-100 Days
- Fruit Shape :- Club Shape
- Fruit Color :- Bright Purple
- Calyx :- Green and Non-Spiny  
With Purplish Tinge
- Wide Adaptability and Perform well Even in Rainy Season.

### PPL-274

- Plant Habit :- Semi Erect and Compact
- Maturity (DAT) :- 45-50 Days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Cylindrical Long
- Fruit Color :- Purple
- Calyx :- Green & Non-Spiny
- Fruits With Heat Tolerance.
- Tolerant to Bacterial wilt.

### GREEN GOLD

- Plant Habit :- Semi Erect & Bushy
- Maturity (DAT) :- 60-70 Days
- Fruit Weight :- 250-300 gm
- Fruit Shape :- Oblong
- Fruit Color :- Green
- Calyx :- Green & Non-Spiny
- Less seed Content in Fruit.
- Suitable for Bhartaa Preparation.
- Tolerant to Bacterial wilt.

### HARSH

- Plant Habit :- Semi Spreading Habit and Moderate Growth
- Maturity (DAT) :- 45-50 Days
- Fruit Weight :- 50-60 gm
- Fruit Shape :- Ovel Shape
- Fruit Color :- Purple Color
- Calyx :- Green and Non-Spiny
- Fruits are in Cluster and Excellent Yield Potential.

### AVANTIKA

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 45-50 Days
- Fruit Weight :- 70-80 gm
- Fruit Shape :- Oblong
- Fruit Color :- Purple Pink
- Calyx :- Green with Purple Tinge
- High Yielding Hybrid with prolonged fruiting.
- Well Suitable for Hot summer Climate.

### WHITE STAR

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 50-55 Days
- Fruit Weight :- 70-80 gm
- Fruit Shape :- Oval Round
- Fruit Color :- White
- Calyx :- Green
- Excellent Bearing at High Temperature.
- High Tolerance to Sucking Pest.

### UNNATI CHU CHU

- Plant Habit :- Semi Erect
- Maturity (DAT) :- 40-45 Days
- Fruit Weight :- 30-40 gm
- Fruit Shape :- Oval
- Fruit Color :- Purple
- Calyx :- Green and Non-Spiny
- Tolerant to Bacterial wilt.
- Excellent for long distance Transportation.

### SURYA

- Plant Habit :- Vigorous
- Maturity (DAT) :- 50-55 days
- Fruit Weight :- 60-70 gm
- Fruit Shape :- Oval
- Fruit Color :- Purple with White Strips
- Calyx :- Green with Spines
- Attractive fruit color with better retention in summer.
- Eye catching fruit with prominent spines.

### PRAPTI-141

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 75-80 days
- Fruit Length :- 7-8 cm
- Fruit Diameter :- 0.7-0.9 cm
- Fruit Color :- Green and Dark Red
- Fruit with high pungency
- Fruit wall is very thick.
- Fruit is very high yielding with good adaptability.
- High level of tolerance to viruses with excellent performance under high temperature condition.

### KALPNA

- Plant Habit :- Vigorous
- Maturity (DAT) :- 50-55 days
- Fruit Weight :- 70-80 gm
- Fruit Shape :- Oval
- Fruit Color :- Purple with White Strips
- Calyx :- Green with Spines
- High yield potential.
- High rejuvenation capacity.

### PRAKAMYA-147

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 70-75 days
- Fruit Length :- 7-8 cm
- Fruit Diameter :- 0.6-0.7 cm
- Fruit Color :- Light Green
- Very High yielding with wide adaptability.
- Perform well under high temperature and suitable for round the year sowing.
- Highly pungent & tolerance to viruses.

### ANGARA

### HYBRID CHILLI

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 75-80 days
- Fruit Length :- 8-9 cm
- Fruit Diameter :- 0.7-0.8 cm
- Fruit Color :- Dark Green
- Fruit with high pungency and medium shine.
- Fruit is suitable for both fresh and dry purpose.
- continuous growth with heavy bearing and very high yielding capacity.

### SUPER SONA-117

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 70-75 days
- Fruit Length :- 7-8 cm
- Fruit Diameter :- 0.6-0.7 cm
- Fruit Color :- Light Green
- Very High Yielding with wide adaptability.
- Perform well under high temperature and suitable for round the year sowing.
- Highly pungent & tolerant to viruses.

### NARMADA

- Plant Habit :- Vigorous Dense & Robust
- Maturity (DAT) :- 65-75 days
- Fruit Length :- 13-15 cm
- Fruit Diameter :- 1.1-1.3 cm
- Fruit Color :- Green Wrinkled
- Continuous growth.
- Heavy bearing and very high yielding capacity.

### DAWARKA NATH

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 40-45 days
- Fruit Length :- 8-11 cm
- Fruit Width :- 2.5-3 cm
- Fruit Color :- Light Green, Smooth
- Fruits pungency is medium.
- Achari varity and good for processing.

### JYOTI-143

- Plant Habit :- Vigorous Dense & Robust
- Maturity (DAT) :- 65-75 days
- Fruit Length :- 10-11 cm
- Fruit Diameter :- 0.7-0.8 cm
- Fruit Color :- Green Wrinkled
- Fruit with high pungency and shining green.
- High Resistance to CMV Powdery Mildew.
- Fruit is suitable for fresh green and dry purpose.
- Good for transportation and high yielding.

### MAGAN-140

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 70-75 days
- Fruit Length :- 14-16 cm
- Fruit Diameter :- 1-1.2 cm
- Fruit Color :- Green
- Fruit with high pungency and shining green
- High resistance to chi CMV & Intermediate
- Resistance to CMV Powdery Mildew
- Fruit is suitable for fresh green and dry purpose and good for transportation and high yielding

### VISHWANATH

- Plant Habit :- Tall & Spreading
- Maturity (DAT) :- 40-45 days
- Fruit Length :- 7-8.5 cm
- Fruit Width :- 1-1.2 cm
- Fruit Color :- Smooth Green
- Fruit wall is very thick.
- Excellent for bhajia.

### SULEKHA

### HYBRID CAPSICUM

- Plant Habit :- Vigorous Plant
- First Picking :- 50-60 days
- Lobe :- 3-4
- Fruit Length :- 8-10 cm
- Fruit Shape :- Bell
- Fruit Color :- Green
- Tolerant to TMV & high yielding.

### SURAJ

- Plant Habit :- Upright, Tall & Spreading
- Maturity (DAT) :- 45-70 days
- Fruit Length :- 7-8 cm
- Fruit Width :- 0.7-0.8 cm
- Fruit Color :- Green & Deep Red
- Upright high yielding hybrid.
- Fruit are green to red with high pungency.

### NANDANI

### HYBRID BROCCOLI

- Plant Habit :- Erect
- Maturity (DAT) :- 70-75 days
- Curd Weight :- 600-800 gm
- Curd Space :- Semi Dome
- Curd Color :- Green
- Strong tolerance against downy mildew and black rot.

### MAHA SHAKTI

### HYBRID OKRA

- Plant Habit :- Excellent Vigorous Plant  
Short inter-nodes and good branching
- Fruit Length :- 12-14 cm
- Fruit Color :- Attractive Dark Green
- First Picking :- 40-45 days
- High resistance for YVMV.
- High yield potential hybrid.

### SURABHI

### HYBRID CAULIFLOWER

- Plant Habit :- Erect
- Maturity (DAT) :- 55-60 days
- Curd Weight :- 600-800 gm
- Curd Shape :- Semi Dome
- Curd Color :- Creamy White
- High yield potential in (Kartki group).

### MUSKAN

- Plant Habit :- Medium tall
- First Picking :- 42-45 days
- Fruit Length :- 12-14 cm
- Fruit Color :- Attractive Dark Green
- Wide adaptability & long duration crop.
- High tolerance to YVMV.

### SHIVANI

- Plant Habit :- Erect
- Maturity (DAT) :- 70-75 days
- Curd Weight :- 1-1.2 kg.
- Curd Shape :- Dome
- Curd Color :- Snow White
- Wide adaptability sowing window self blanching. (Poosi and snow ball group)

### SALONI

- Plant Habit :- Tall plants with good branching.
- First Picking :- 40-45 days
- Fruit Length :- 12-14 cm
- Fruit Color :- Glossy Green
- High tolerance to YVMV.
- Continuous growth for long crop duration.

### SONAKSHI

- Plant Habit :- Erect
- Maturity (DAT) :- 75-80 days
- Curd Weight :- 1.5-1.75 kg.
- Curd Shape :- Dome
- Curd Color :- White
- Wide adaptability long sowing window and excellent self blanching (Snowball group).

### EARLY BALL-055

### HYBRID CABBAGE

- Fruit Shape :- Round
- Maturity (DAT) :- 50-55 days
- Head Weight :- 700-800 gm
- Head Color :- Dark Green
- Compactness :- Highly Compact
- Extra early maturity with excellent fruit.
- Excellent taste and shipping quality.
- High tolerance to black rot.

### CHANDANI

- Root Shape :- Cylindrical
- Maturity :- 50-55 days
- Root Length :- 30-35 cm
- Root Flesh :- Crispy
- Root End :- Acute
- Pungency :- Mild Pungency
- Uniform maturity, smaller foliage.
- Solid, tender, smooth glossy white root.
- Delayed pithiness & slow bolting.

### VENUS-065

- Fruit Shape :- Round
- Maturity (DAT) :- 60-65 days
- Head Weight :- 1-1.25 kg
- Head Color :- Dark Green
- Compactness :- Highly Compact
- Early maturity with excellent fruit. & dark green leaves.
- High tolerance to black rot.

### SWETA

- Root Shape :- Cylindrical
- Maturity :- 40-45 days
- Root Length :- 30-35 cm
- Root Flesh :- Crispy
- Root End :- Acute
- Pungency :- Mild Pungency
- Uniform maturity, smaller foliage.
- Solid, tender, smooth glossy white root.
- Delayed pithiness & slow bolting.

### GALAXY-075

- Fruit Shape :- Flat Round
- Maturity (DAT) :- 70-75 days
- Head Weight :- 1.5-2 kg
- Head Color :- Bluish Green
- Compactness :- Very Good
- Early maturity with excellent fruit with good field holding capacity.
- Good tolerance to heat & rain.
- High tolerance to black rot.

### ASHUTOSH

### HYBRID KNOL-KHOL

- Fruit Shape :- Flat Round
- Maturity (DAT) :- 70-75 days
- Head Weight :- 200-250 gm.
- Head Color :- Green
- Compactness :- Very Good

### REVATI

### HYBRID RADISH

- Root Shape :- Cylindrical
- Maturity :- 30-32 days
- Root Length :- 25-30 cm
- Root Flesh :- Crispy
- Root End :- Acute
- Pungency :- Mild
- Early maturity hybrid.
- Uniform maturity with less foliage.
- Heat tolerance.

### 21-KANHA

### HYBRID BITTER GOURD

- Fruit Shape :- Straight with Sharp Prickles
- Maturity :- 50-55 days
- Fruit Weight :- 100-120 gm
- Fruit Color :- Dark Green
- Fruit Length :- 21-25 cm
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.
- High yield potential, wide adaptability.

### S-35

- Root Shape :- Cylindrical
- Maturity :- 28-35 days
- Root Length :- 25-30 cm
- Root Flesh :- Crispy
- Root End :- Acute
- Pungency :- Mild
- Early maturity with less foliage
- Heat tolerance

### RADHA

- Fruit Shape :- Long & Straight
- Maturity :- 50-55 days
- Fruit Weight :- 120-150 gm
- Fruit Color :- Dark Green
- Fruit Length :- 35-40 cm
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.
- High yield potential, wide adaptability.

### SUPER NANO

- Fruit Shape :- Short Spindle
- Maturity :- 50-55 days
- Fruit Weight :- 50-60 gm
- Fruit Color :- Dark Green
- Fruit Length :- 7-8 cm
- Early maturity vigorous plant with excellent fruit setting.
- Short dark green fruit.
- Tolerance to powdery mildew.

### MAHIMA-30

- Fruit Shape :- Straight
- Maturity :- 50-55 days
- Fruit Weight :- 500-600 gm
- Fruit Color :- Green
- Fruit Length :- 25-30 cm
- Early maturity vigorous plant with excellent fruit setting.
- Medium long dark green fruit.

### SURUCHI

- Fruit Shape :- Long Straight
- Maturity :- 45-50 days
- Fruit Weight :- 80-100 gm
- Fruit Color :- Green with smooth Spines
- Fruit Length :- 12-15 cm
- Early maturity vigorous plant with excellent fruit setting.
- Good for transportation tolerance to powdery mildew.

### KALASH

- Plant Habit :- Vigorous Vines
- Maturity :- 50-55 days
- Fruit Weight :- 450-500 gm
- Fruit Color :- Green
- Fruit Shape :- Shaku/Bulb
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.

### RAMAN

- Fruit Shape :- Spindle
- Maturity :- 50-55 days
- Fruit Weight :- 100-110 gm
- Fruit Color :- Dark Green
- Fruit Length :- 18-20 cm
- Early maturity vigorous plant with excellent fruit setting.
- Less seed with very slow ripening Fruit.

### MODAK

- Fruit Habit :- Vigorous Vines
- Maturity :- 50-55 days
- Fruit Weight :- 450-500 gm
- Fruit Color :- Green
- Fruit Shape :- Flat Round
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.

### ANUPAMA

- Fruit Shape :- Straight & Cylindrical
- Maturity :- 50-60 days
- Fruit Weight :- 750-800 gm
- Fruit Color :- Green
- Fruit Length :- 35-40 cm
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.
- High yield potential, wide adaptability.

### HYBRID BOTTLE GOURD

### MANJARI

- Fruit Shape :- Straight & Cylindrical
- Maturity :- 40-45 days
- Fruit Weight :- 160-180 gm
- Fruit Color :- Dark Green
- Fruit Length :- 20-25 cm
- Early maturity vigorous plant with excellent fruit setting.
- Good diseases tolerance.

### HYBRID CUCUMBER

### GARIMA

- Fruit Shape :- Straight & Cylindrical
- Maturity :- 50-60 days
- Fruit Weight :- 600-750 gm
- Fruit Color :- Green
- Fruit Length :- 35-40 cm
- Early maturity vigorous plant with excellent fruit setting.
- Excellent taste and shipping quality.
- High yield potential, wide adaptability.

### SABARI

- Fruit Shape :- Straight & Cylindrical
- Maturity :- 40-45 days
- Fruit Weight :- 100-120 gm
- Fruit Color :- Light Green
- Fruit Length :- 12-15 cm
- Extra early maturity vigorous plant with excellent fruit setting.
- Good diseases tolerance.

### DIVYA

- Fruit Shape :- Straight
- Maturity :- 40-45 days
- Fruit Weight :- 120-150 gm
- Fruit Color :- Dark Green
- Fruit Length :- 18-20 cm
- Extra early maturity vigorous plant with excellent fruit setting.
- Good diseases tolerance.
- Highly recommendable for poly house.

### CHETNA

- Fruit Shape :- Long & Slender
- Maturity :- 38-40 days
- Fruit Weight :- 150-200 gm
- Fruit Color :- Green
- Fruit Length :- 30-35 cm
- Early vigorous hybrid with excellent
- Fruit setting, medium long dark green fruit.
- Excellent taste & good Keeping quality.
- Tolerance to downy and powdery mildew.

### AMOL

- #### HYBRID PUMPKIN
- Fruit Shape :- Flattish Round
  - Maturity :- 85-90 days
  - Fruit Weight :- 2-4 kg
  - Fruit Color :- Mottled Green
  - Fruit Length :- Deep Orange
  - Extra early maturity vigorous plant with excellent fruit setting.
  - Wide adaptability & suitable for long distance Transportation.

### NAVEEN

- #### HYBRID SPONGE GOURD
- Fruit Shape :- Long
  - Maturity :- 38-40 days
  - Fruit Weight :- 125-130 gm
  - Fruit Color :- Green
  - Fruit Length :- 25-30 cm
  - Early vigorous hybrid with excellent fruit setting.
  - Excellent taste & good keeping quality.
  - Seed development is slow.

### JUMBO

- Fruit Shape :- Oval Long
- Maturity :- 75-80 days
- Fruit Weight :- 8-10 kg
- Fruit Color :- Dark Green
- Fruit Flesh :- Deep Yellow-Orange
- Early maturity vigorous plant with excellent fruit setting.
- Good diseases tolerance.

### MOHIT

- Fruit Shape :- Long
- Maturity :- 38-40 days
- Fruit Weight :- 130-150 gm
- Fruit Color :- Dark Green
- Fruit Length :- 25-30 cm
- Early vigorous hybrid with excellent fruit setting.
- Green fruit excellent taste & good keeping quality.
- Seed development is slow.
- Extra early hybrid.
- High yield potential.

### SUDARSHAN

- Fruit Shape :- Oblong Round
- Maturity :- 100-110 days
- Fruit Weight :- 9-10 kg
- Fruit Color :- Yellowish Green
- Fruit Flesh :- Orange Yellow
- Medium maturity vigorous plant with excellent fruit setting.
- Wide adaptability & suitable for long distance transportation.

### USHA (WHITE SEEDED)

- Fruit Shape :- Long
- Maturity :- 38-40 days
- Fruit Weight :- 125-130 gm
- Fruit Color :- Shiny Whitish Green
- Fruit Length :- 25-30 cm
- Early vigorous hybrid with excellent fruit setting.
- Seed development is slow.

### CHANDRIKA

- #### HYBRID RIDGE GOURD
- Fruit Shape :- Long & Slender
  - Maturity :- 38-40 days
  - Fruit Weight :- 175-200 gm
  - Fruit Color :- Green
  - Fruit Length :- 25-30 cm
  - Early vigorous hybrid with excellent fruit setting.
  - Fruit excellent taste & good keeping quality
  - Tolerance to downy and powdery mildew.

### MALLIKA

- #### HYBRID WATERMELON
- Fruit Shape :- Oval to Oblong
  - Maturity :- 80-85 days
  - Fruit Weight :- 9-12 kg
  - Fruit Color :- Light Green with Dark Green Stripes
  - Flesh Color :- Dark Red (TSS 12-13%)
  - High yield potential and suitable for long distance transportation.

### SUPER-1011

- Fruit Shape :- Oblong
- Maturity :- 70-75 days
- Fruit Weight :- 10-11 kg
- Fruit Color :- Light Green with Dark Green Stripes
- Flesh Color :- Dark Red (TSS 12-13%)
- Early hybrid & high yield potential.
- Suitable for long distance transportation.
- Wide adaptability.

### ANANDI

### HYBRID BEET ROOT

- Fruit Shape :- Round
- Maturity :- 65-70 days
- Root Weight :- 100-150 gm
- Root Color :- Deep Red
- Flesh Color :- Blood Red
- An excellent hybrid in term of its flesh.
- Highly palatable due to its sweet taste.

### RANGEELA

- Fruit Shape :- Medium Round
- Maturity :- 80-85 days
- Fruit Weight :- 7-8 kg
- Fruit Color :- Blackish Green
- Flesh Color :- Dark Red (TSS 12-13%)
- High Yield potential and suitable for long distance transportation.
- Attractive & wide adaptability.

### MADHUMITA

### HYBRID MUSKMELON

- Plant Habit :- Vigorous Vines
- Maturity :- 75-80 days
- Fruit Weight :- 1-1.25 kg
- Fruit Shape :- Globe
- Fruit Color :- Deep Netted & Shining Golden
- Fruit Flesh :- Deep Orange
- Highly sweet and good flavored.
- Quite cold tolerant and can be Successfully sown for early market.

### SWEETY (ICE BOX)

- Fruit Shape :- Oblong (Ice Box)
- Maturity :- 80-85 days
- Fruit Weight :- 3-4 kg
- Fruit Color :- Dark Green
- Flesh Color :- Deep Red, Firm with Granular texture
- Very Sweet, Firm Flesh & Ice Box Segment.
- High Yield Potential and Suitable for Long Distance Transportation.

### DEEPAK

### HYBRID SUMMER SQUASH

- Plant Habit :- Vigorous & Erect
- Maturity :- 45-50 days
- Fruit Weight :- 180-220 gm
- Fruit Shape :- Round
- Fruit Color :- Glossy Green
- Extra early maturity vigorous plant with excellent fruit setting.
- Excellent taste & shipping quality.

### CHAKOR

### HYBRID ASHGOURD

- Fruit Shape :- Vigorous
- Maturity :- 120-140 days
- Fruit Weight :- 7-8 kg
- Fruit Color :- Oblong
- Flesh Color :- Light Green, Covered with waxy coat on maturity
- Fruit Flesh Color :- Milky White
- Wide adaptability and High yield potential.

### CHIRAG

- Plant Habit :- Glossy Green & Vigorous Vines
- Maturity :- 45-50 days
- Fruit Weight :- 150-200 gm
- Fruit Shape :- Slightly flattened Round
- Fruit Color :- Pale Green
- Extra early maturity vigorous plant with excellent fruit setting.
- Excellent taste & shipping quality.

### PANCHHI

- Plant Habit :- Vigorous
- Maturity :- 100-110 days
- Fruit Weight :- 2.5-3.5 kg
- Fruit Shape :- Round
- Fruit Color :- Green with waxy coating on maturity
- Fruit Flesh Color :- Milky White
- Excellent bearing and high yielding.

### ANANT

- Plant Habit :- Vigorous Vines
- Maturity :- 45-50 days
- Fruit Weight :- 80-85 gm
- Fruit Shape :- Round
- Fruit Color :- Green
- Early maturity vigorous plant with excellent fruit setting.

### KOMAL

### HYBRID KAKRI

- Plant Habit :- Vigorous
- Maturity :- 40-45 days
- Fruit Weight :- 100-120 gm
- Fruit Length :- 20-25 cm
- Fruit Shape Shining Green Long
- A very popular hybrid, Good shelf life and tasty fruit.
- Remain tender for a longer period of time after harvesting.

### ALANKAR

### HYBRID SNAKE-GOURD

- Plant Habit :- Vigorous
- Maturity :- 60-70 days
- Fruit Weight :- 350-450 gm
- Fruit Length :- 45-50 cm
- Fruit Shape :- Slender

## Hybrid Field Crop

### RAJ RAS-7146

### HYBRID SORGHUM (SSG)

- Plant Habit :- Vigorous & Good Tillering
- First Cutting :- 45-50 days
- Plant Height :- 190-210 cm
- Plant Color :- Light Green to Dark Green
- Multi-cut (3-4) cutting with excellent yield.

### SUPER HONEY-2109

### HYBRID M.C. BAJRA

- Early Maturity & Vigorous Growth.
- Semi-loose with erect.
- Sweet Fodder & Multi-Cut Variety
- Broad & dark green color leaves.
- Suitable for kharif & rabi.

### RAS BHARI-7147

- Plant Habit :- Vigorous & Good Tillering
- First Cutting :- 45-50 days
- Plant Height :- 190-210 cm
- Plant Color :- Light Green to Dark Green
- Multi-cut (3-4) cutting with excellent yield.

### ROYAL MADHU

### HYBRID MAIZE

- Plant Habit :- Vigorous & Good
- Maturity :- 85-90 days
- Plant Height :- 170-180 cm
- Earhead :- Conico Cylindrical
- Seed Color :- Orange
- 14-16 kernal rows of Orange Colored with flint.

### LALI-7109

### HYBRID BAJRA

- Plant Habit :- Medium Height & Non Lodging with more no. of tillers
- Plant Height :- 170-200 cm
- Maturity :- 80-85 days
- Ear Head :- Large & Compact
- Dark green foliage.
- Tolerance to downy mildew.
- High yield potential.

### KASTURI - 2151

- Plant Habit :- Vigorous
- Maturity :- 110-120 days
- Plant Height :- 110-125 cm
- Earhead :- 20-25 cm
- Seed Color :- Light Yellow & White Grains
- Very sweet taste and very good yield.

### SUPER GOLD-2107

- Plant Habit :- Medium Height & Non Lodging with more no. of tillers
- Plant Height :- 170-200 cm
- Maturity :- 80-85 days
- Ear Head :- Large & Compact
- Dark green foliage.
- Tolerance to downy mildew.
- High yield potential.

### SHIVAM - 2145

- Plant Habit :- Vigorous
- Maturity :- 110-120 days
- Plant Height :- 110-125 cm
- Earhead :- 20-25 cm
- Seed Color :- White Grains
- Very sweet taste and very good yield.

# RESEARCH SELECTION

## NAVUdays

- Plant Habit :- Determinate
- Maturity (DAT) :- 65-70 days
- Fruit Weight :- 80-100 gm
- Fruit Shape :- Round
- Fruit shoulder color :- Deep Red
- Good yield in kharif & zaid.

## TOMATO

## SWASTIK RED

- Plant Habit :- Asiatic
- Maturity :- 80-90 days
- Root Length :- 25-30 cm.
- Root Shape :- Tapering
- Root Color :- Red
- Root Core :- Small & Self Colored
- Uniform maturity, uniform shape and size & sweet taste.

## CARROT

## NOORI (RESEARCH)

- Plant Habit :- Tall With Branches
- Maturity (DAT) :- 40-45 days
- Fruit Length :- 12-15 cm
- Fruit Shape Color :- Dark Green
- Prolific bearer, long slender dark green fruit.
- Very tender with less fiber.
- High tolerance against YVMV.

## BHINDI (OKRA)

## LAL PARI SUPER

- Plant Habit :- Asiatic
- Maturity :- 80-90 days
- Root Length :- 25-30 cm.
- Root Shape :- Tapering
- Root Color :- Dark Red
- Root Core :- Small & Self Colored
- High yield, uniform shape & size.

## NAKUL (RESEARCH)

- Plant Habit :- Vigorous
- Maturity :- 50-60 days
- Fruit Length :- 30-40 cm
- Fruit Weight :- 800-1000 gm
- Fruit Shape :- Cylindrical
- Fruit Shoulder Color :- Light Green
- Suitable for rainy (Kharif) & post rainy (Rabi) season.

## BOTTLE GOURD

## RASAD (RESEARCH)

- Plant Habit :- Vigorous
- First Cutting :- After Sowing 20-30 days
- No. of Cutting :- 5-6 After 20 days Interval
- Leaf Color :- Smooth & Light Green
- Leaves :- Glossy. Broad, Smooth, Suitable for Multiple Cutting
- Uniformity and high yielding.

## PALAK

## VRINDA-50

- Plant Habit :- Erect
- Maturity (DAT) :- 55-60 days
- Curd Weight :- 350-400 gm
- Curd Shape :- Semi Dome
- Curd Color :- Creamy White
- Best performance between 22-32°C temperature.

## CAULIFLOWER

## KAPILA 28 (RESEARCH)

- Plant Habit :- Erect
- Maturity :- 28-35 days
- Root Length :- 25-35 cm
- Root Shape :- Cylindrical And Tapering
- Root color :- Pure White
- Late pithiness.
- Farmer's first choice.

## RADISH

## ROHINI

- Plant Habit :- Erect
- Maturity (DAT) :- 65-70 days
- Curd Weight :- 800-1000 gm
- Curd Shape :- Dome
- Curd Color :- Milky White
- Best performance between 20-25°C temperature.

## HARITMA (Imp.)

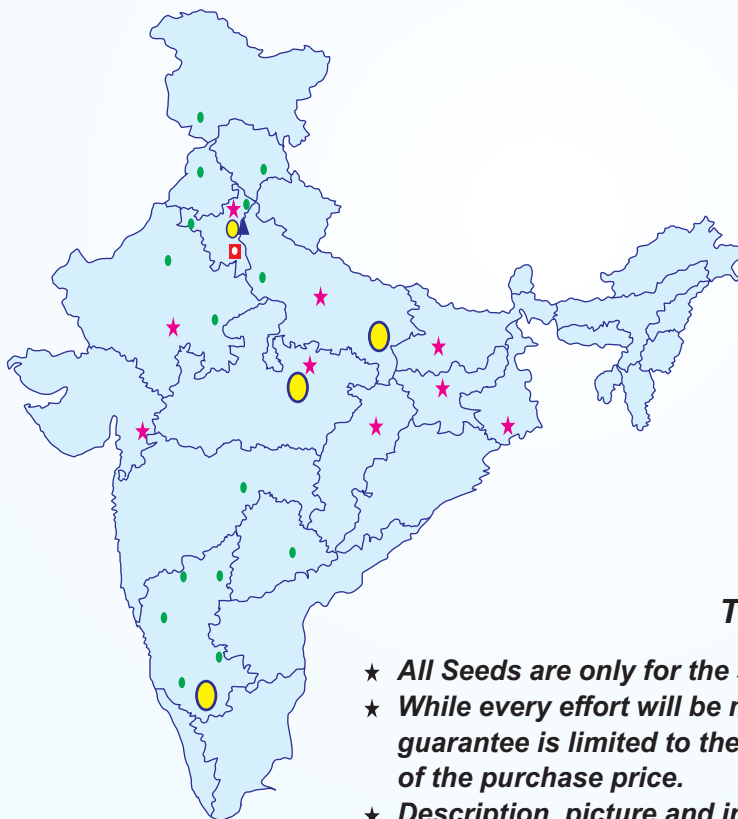

- Plant Habit :- Vigorous
- First Cutting :- After Sowing 25-30 days
- No. of Cutting :- Multi-Cut
- Leaves Color :- Dark Green & Smaller
- Suitable for round the year sowing.
- Late bolting and good aroma.

## CORIANDER

## SUPER SELECTION AND OPEN POLLINATED VARIETIES :-

<b>BEET ROOT</b>	:- Ruby Queen (Imp.)	<b>KNOL KHOL</b>	:- Early White Viena

### **Terms & Conditions**

- ★ *All Seeds are only for the sowing purposes and not for consumption.*
- ★ *While every effort will be made by us to supply seeds of good quality our guarantee is limited to the replacement of the seeds concerned or refund of the purchase price.*
- ★ *Description, picture and information about all varieties are based on as per our observation at our trial location and R&D Center. They may vary subject to biotic and abiotic Factors.*
- ★ *Tolerance/Resistance of disease may vary in different growing conditions.*

## Planting Guide

S.No.	Crop	No. of seeds/gm (Approx)	Hybrid Seed Rate (gm/hectare) (Approx)	Spacing (cm.)	No. of Plants /hectare
1.	Tomato	250-280	150	60X45	37,038
2.	Hot Pepper	180-225	200-225	60X45	37,038
3.	Brinjal	220-250	175-200	90X60	18,185
4.	Cabbage	300	315	45X30	74,075
5.	Cauliflower	300	300	45X30	74,075
6.	Okra	15-18	8000-10000	60X30	55,555
7.	Cucumber	25-30	625	120X45	18,185
8.	Watermelon	15-30	1000	180X60	9,260
9.	Muskmelon	25-30	750	150-180X60	9,260-11,110
10.	Bitter Gourd	6-7	1500	120-150X60	11,110-13888
11.	Bottle Gourd	7-9	1200	120-150X60	11,110-13888
12.	Ridge Gourd	9-12	1000	120-150X60	11,110-13888
13.	Sponge Gourd	10-12	1000	120-150X60	11,110-13888
14.	Radish	80-120	2500	30X5	6,66,668
15.	Carrot	500-700	1500-2000	30X5	6,66,668
16.	Sweetcorn	5-7	7500	60X30	55,555

No. of Seeds/gram will vary from hybrid to hybrid in each of the above crops.

The data vary depending on variety, climate, soil type and season.
