

VACUUM PUMP (LI-VP-41)

APPLICATION :

Vacuum Pump uses on many measuring devices and leak detectors, which are involved in many industrial applications. These include, among others, vacuum packaging of food evacuation and environment-friendly charging of refrigerators and air conditioners production of ultrapure high-strength metals evacuation of lamps and picture tubes manufacture of flat-panel displays.

FEATURES :

- Pump mounted on heavy steel base plate.
- Fitted with heavy duty electric motor.
- Pumps are belt driven.
- Pumps are fabricated out of high grade cast iron.
- Single stage and double stage models are available.

TECHNICAL SPECIFICATIONS :

Model : LI-VPOF-41				
Capacity	32Ltrs/Min	50Ltrs/Min	75Ltrs/Min	100Ltrs/Min
Motor	¼ HP	¼HP	¼ HP	½ HP
Pump type	Belt driven pump			
Motor Speed	1400 RPM			
Power	230V AC, 50Hz			

OPTIONAL :

- Vacuum gauge with regulator.
- Moisture Trap.
- Non returnable valve.
