## What We Sell

### All Petrochemicals Products

Offering Effective Greasing Solutions

All Types of oils, grease, and Lubricants

**LDO:-** LDO is a blend of distillates feed and residual oil. It is primarily recommended for stationary or slow-speed diesel engines and as Industrial Fuel. LDO is typically used in medium and slow-speed diesel engines with less than 750 rpm. Light Diesel Oil (LDO) is a Class C product, under the PESO classification.

**Furnace Oil:-** Furnace oil is a dark viscous residual fuel obtained by blending mainly heavier components from crude distillation units. As per IS 1593:2018 specification, Furnace Oil is classified into four grades – LV, MV1, MV2, and HV. FO falls under the category of Class C, under the PESO classification.

we actually deliver what we say, we try to ease the situation, not just the profit.

Our Aim is to provide a one-stop solution to customers for Petroleum Chemicals.

## Petroleum Spirits

### Our Products and Services

**MTO ( MINERAL TURPENTINE OIL)** - Used in the paint industry, thinner, lacquer, alkyd, etc.

**Base oils** ( grades: SN 500,150,70) - used in lubricants manufacturing, Deepam oil, thinner, coatings, etc.

**C9 plus ( ONGC)** - used in pesticide manufacturing, paints, thinner, etc.

**Solvents** ( modified per the customer's requirement) are used in various industries.

**Bitumen:** - Bitumen is a common binder used in road construction. It is principally obtained as a residual product in petroleum refineries after higher fractions like gas, petrol, kerosene, diesel, etc., are removed.
