About Us

Simplex Automation, is aware of customers power in helping a company to reach success. The most clear reason after a high growth of company is its happy client base that is loyal. In a small period of time, we, as a manufacturer that is committed to produce quality have managed to gather loyal support of a customer base that stays happy with our products and customer services. We, believe that high quality of products and ethical behavior of a business can easily win over any client. Hence, we indulge in a production of Heat Tracing Control Panel, CT Metering Panel, Power Distribution Panel, etc., using the best base materials and technologies that assist in ensuring clients about high quality of range. In addition, we conduct our business deals in a moral way to give great business experience to our clients.

Our company has been working on to build healthy business relationships with customers since the year 2019. The key components, which prove to be worthy for strengthening this relationship are progressive business view, strong financial position and deep customer understanding. We, treat clients with respect and support their interests. All doubts of customers regarding any of our business work are made clear with high level perfection to bring smoothness in our relationship.
