About Us

Mr. Rajinder Singh in the year **1999** started a cattle business and till today is successfully operating by the name **Chopra Dairy Farm**. Our journey in the niche market, which is cattle industry, is going to mark two decades next year. In all these years, we have worked on the business plan. We, **Wholesaler & Supplier**, have partnered with right ranchers for purchasing **Murrah Buffalo, Holstein Friesian Calf, Holstein Friesian Bull, White Cow, Sahiwal Bull, and other breed animals**.

The founder created business contacts in a planned geographical area, so that everything goes smoothly. He knows what needs to be achieved and what strategies need to be applied for achieving the mission statement. He doesn't only focus on buying and selling of Cows, Bulls and Buffaloes, but also on rightfully treating them. His passion towards the work he does is paving a way in a never-ending journey.

We keep cattle in a shed in a prime location of Karnal, a city in the Indian state of Haryana. There are many dairy farms in the state, including the hi-tech dairy units equipped with advanced technologies in feeding practices, milking, cleaning & waste management. There are dairy farmers who practice traditional dairying methods, while there are some who have plunged to modern methods. Our company meets the cattle needs of such dairy farms. Our employees take care of the cattle, provide them food and keep their area clean.

Why US

We understand that every dairy farmer or dairy plant owner needs a high quality cattle and therefore, the founder chooses the right type of cattle from the rancher. We have a record of milk that our dairy cows produce. Not only this, we also maintain a chart that specifies the weight of each cow, calf, bull and buffalo.

- They can get the best breeds with excellent growth vigour
- We take care of their nutrients need for physical development
- We deal in medically tested and certified fit animals
