# WHAT ARE THE MILLETS?

## मिल्लेट्स क्या होते हैं?

Millets are a group of small seeded grasses that are cultivated as cereal crops for human consumption. Millets are highly nutritious and offer various health benefits. They are Gluten-Free, Rich in Dietary Fibre, & Contain a good Balance of Essential Nutrients like Carbohydrate, Proteins, Vitamins and Minerals. Millets are also considered to have a Low Glycemic index.

मिल्लेट्स छोटे बीज वाली फसलों का एक समूह है जिनकी खेती मानव उपभोग के लिए अनाज की फसल के रूप में की जाती है। मिल्लेट्स अत्यधिक पौष्टिक होते हैं और विभिन्न स्वास्थ्य लाभ प्रदान करते हैं। वे ग्लूटेन-मुक्त हैं, आहारिय फाइबर से भरपूर हैं और उनमें कार्बोहाइड्रेट, प्रोटीन, विटामिन और खनिज जैसे आवश्यक पोषक तत्वों का अच्छा संतुलन है। मिल्लेट्स को कम ग्लाइसेमिक इंडेक्स वाला भी माना जाता है।

ANCIENT GOLDEN MILL

## MILLET NAMES

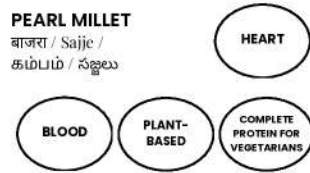

**RAGI** - रागी / नाचनी / मंडुआ / चारुलु  
**KODO** - कोडो / VARAGU / कव्वारु / अरिक्कु

Badi Kangani प्रोसो / Chena / बरी / छैना

## HOW TO CONSUME MILLETS?

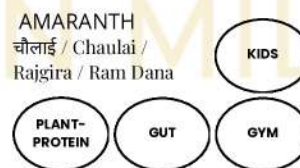

- Grains:** Wash, Soak overnight & use Leisurely.
- Flour/Daliya/Rava:** Use Directly to make the dough, batter or other items.
- Flakes/Poha:** Wash for a few seconds in a sieve & keep aside for 5 minutes to remove excess water. Use in smoothies, savoury Poha, overnight fruit bowls, desserts etc.
- Pasta:** Boil for 5 to 8 minutes in boiling water with a pinch of salt and oil.
- Noodles:** Two styles to use for:
  - Slurpy Noodles add directly to boiled water with veggies.
  - Hakka Noodles
- Sevai / Vermicelli:** Dry roast & use for savoury or sweet dishes.

## PSEUDO MILLETS

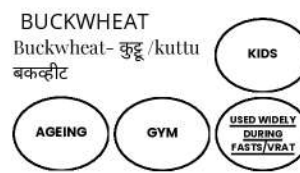

### AMARANTH

चौलाई / Chaulai / Rajgira / Ram Dana

### BUCKWHEAT

Buckwheat- कुट्टु / kuttu / बकव्हीट
