# Micro Surfacing Emulsion

---

We offer **Micro Surfacing For Road**. A stitch in time saves nine “this old phrase still holds true in today's fast paced world, wherein time and money are the two scarcest resources, which are of paramount importance in our lives. In order to maintain the balance between these two resources (Time, Money) we constantly strive to device new techniques which are not only economical but also saves our precious time, and one such technology in road repair and maintenance is Micro surfacing.

Micro surfacing as the name suggests, is a thin layer of cold mix over the road surface (Bitumen/Concrete) to correct the micro level problems, which may arise at early stages of road operation due to rutting and oxidation of binder or weathering conditions.

# Production Capacity

---

MAXSO Production Capacity 3200 M. Ton Every Month.

# EMPLOYEE STRENGTH :-

The Employee Strength 70 Direct and Indirect.
