About Us

Water Pure Filtration is a trusted manufacturer, supplier and trader of water treatment and sewage treatment plants. We design and engineer world class products including Reverse Osmosis Plant Controller, RO Control Panel, Industrial RO Plant, and Commercial Water Softening Plant. Our strong understanding of the water purification technology and sewage treatment techniques has helped us build a great reputation in the market. This remarkable ability of our company is very much conspicuous in the way we provide top class Mineral Water Consulting Services, and Commercial RO Water Treatment Plant Installation.

Creating water purifying and treatment solutions requires a lot of design and technical competency to make these commercially viable. Our company has invested substantially in developing modern facilities along with training people to design and manufacture outstanding reverse osmosis and sewerage treatment plants. A great deal of this credibility is aptly deserved by our team that consists of outstanding professionals who possess in-depth domain knowledge. Located in Ahmedabad, today, we are led by the company proprietor, Mr. Jayesh Patel, a dynamic businessman blessed with sharp acumen and a strong aptitude to assess the reigning and emerging trends. With his support, we serve the demands of customers in the most professional way.
