Product Angle Specifications

Multi-view technical inspection sheet showing isometric, side profile, end view, and angled-reverse perspectives.

1. Isometric View

Provides a general three-dimensional perspective of the component length, spiral seam geometry, and outer diameter profile.

2. Side Profile

Displays the linear alignment, seam pitch spacing, and outer body wall consistency along the longitudinal axis.

3. End View (Perforated Liner)

Illustrates the internal cross-section, showing the perforated inner mesh texture and concentric wall structure.

4. Angled-Reverse View

Highlights the interior cavity, inner perforation pattern depth, and open-ended structural rim configuration.
