About Us

Greenrich Grow India Private Limited is a reputed member of the waste management industry. We started our business with the concept of recycling waste with Fungal Inoculum that play important role as decomposers and help in retaining nutrients of the soil. Our well-tested greenrich products are praised in the potential segment for standing up to the expectations of the end users. Our corporation as a manufacturer and supplier is excelling in developing a better environment for not singularly present but future generations too. We are bringing forward residential as well as commercial waste management organic composters in markets of India. By prioritizing on efficiency and aesthetics for commercial and residential sectors, we have carved success for ourselves in wet waste management segment.

Our corporation is making the country proud by functioning as a waste management social enterprise which is responsibly moving India solid waste sector towards models which are financially & environmentally sustainable. We are providing top professional waste management as well as processing services to household sector as well as institutional customers such as factories, offices, schools, canteens, restaurants and hotels. We are supplying Greenrich Family Composters, Incinerator, Greenrich Bulk Digester, etc., at affordable prices in potential market zones. Our professional team gives complete assistance to customers in buying the products which are the most appropriate for their applications. Moreover, they offer right information about our best quality and Eco-Friendly products to customers.
