

Honeywell Air Touch V4 Compound Cold Catalyst Carbon Filter

The Honeywell Air Touch V4 Compound Cold Catalyst Carbon Filter is a high-quality industrial-grade filtration solution designed for superior air purification performance. Featuring a medium active carbon layer and HEPA-grade filtration, it effectively captures airborne contaminants while helping maintain a cleaner and fresher environment.

Key Specifications

- Product Name: Honeywell Air Touch V4 Compound Cold Catalyst Carbon Filter
- Color: Black
- Filter Material: Durable Paper-based filtration media
- Filtration Grade: HEPA Filter
- Carbon Layer: Medium Active Carbon
- Condition: New
- Size: Customizable options available
- Application: Industrial air purification systems

Features and Benefits

- Efficient removal of airborne particles and contaminants.
- Supports cleaner and fresher indoor air quality.
- Designed for reliable industrial applications.
- Combines active carbon filtration with HEPA-grade performance.
- Durable construction for dependable operation.
- Customizable sizing options to suit different requirements.

Applications

Suitable for industrial environments requiring effective air purification, including manufacturing facilities, commercial spaces, and specialized filtration systems.

Care and Maintenance

For optimal performance, replace the filter according to the air purifier or filtration system manufacturer's recommended maintenance schedule and ensure proper installation during replacement.
