About Us

Holding fast to belief in excellence for manufacturing best-in-the-quality Refractories Machinery and wide range of Engineering Equipment, we "C. S. Engineering Works" buck up production concept, technology and product design for offering economical and efficient solution to national and international clients. We, having developed and enhanced the know-how to fabricate Refractories Machinery and Engineering Equipment of premium quality, assure our product series of outstanding performance, cost-effective production technology and excellent reliability magnitude.

Serving the clients with utmost satisfaction and value since 1997, we have been deemed as a prominently recognized manufacturer and exporter of Refractory Equipment, Refractory Machinery, Engineering Machinery and Processing machinery. We fabricate Refractories Machinery in original design, that is beset with high end features, and is aptly suitable for crushing different materials of rigid contours and ensuring the leveled distribution of density over the volume, consequently deciding the quality of refractories with unerring accuracy of shape. Our range of Refractories Machinery, Refractories Equipment, and Engineering Equipment is intent on facilitating the manufacturing process, stepping up the productivity of refractories. We have a state-of-the-art production infrastructure, outfitted with all the latest technology and machinery, making us capable of producing a large volume of product in relatively short period of time. Besides, our product line is subject to a battery of quality test for ensuring standard accredited by Indian and overseas markets.

Key Facts

OEM Service Provided	No
----------------------	----

Our Products

Manufacturing Machine

Refractory Brick Cutting Machine

Industrial Machinery Components

Pan Mixer Machine

Engineering Components

Portable Spraying Machine

IPV Mechanism Assembly

Automobile Machining Components

Heavy Machinery Parts

Precision Machine Parts

Paddle Mixer Machine

Process Machine

High Speed Mixer Machines

Instrumentation Panels

Instrumentation Control Panels

Construction Processing Machines
