

VIRDI ELECTRIC WORKS PVT. LTD.

Offering A Wide Range Of Portable Welding Machines, Automatic Welding Machine, Electroplating Rectifiers, Ht Transformers, Cvt Transformer, Manual Transformer, Servo Automatic Voltage Stabilizer, Tig Welding Machine, Pneumatic Spot Welding Machine, Etc.

About Us

Virdi Electric Works Pvt. Ltd. is a trusted name in the field of **Voltage Stabilizers, Welding Machines, Transformers**, and related products. Since **1963**, we have been thoroughly working in this domain with the commitment to provide right solutions at right cost. Specialized in this electrical engineering field, we are known as a key **manufacturer, supplier, exporter & supplier**. Also the company has carved a niche for itself as a profound solution provider in the area of electric power distribution, use, and welding technologies.

We have rich expertise and sound knowledge in design & manufacturing of **Automatic Voltage Stabilizer, Welding Machines, Power Transformers, Manual Transformers, Electroplating Rectifiers**, etc. Our futuristic approach has helped us to evaluate & meet the ever-changing market requirements. We outmatch or meet specific requirements of clients, industrial standards and global quality. **Innovative engineering concepts and prevailing technology** has always been important aspects of our work.

Our team of engineers make every effort to deliver finest quality products that show innovation, value and efficiency. We have comprehensive production & testing facilities that enable us to ensure qualitative manufacturing, performance and excellent supply of products. We constantly endeavour to provide our customers with the best possible solutions.

Quality

Virdi Electric Works Pvt. Ltd. is an ISO 9001:2008 certified company and works with Total Quality Management Policy. There is a stringent follow of effective quality control measures that ensure a quality oriented work. The entire range of products is evaluated on demanding parameters by an expert team of quality control professionals.

Infrastructure

Our sound infrastructure is equipped with requisite machinery, equipment and prevailing technologies. Here we have good manufacturing facility, quality testing labs and R&D facility that help create a qualitative as well as quantitative production. We regularly integrate effective methods and technologies that improve the working efficiency & performance. Our infrastructure facility is well incorporated with regulatory requirements, modern developments and core production applications. There is an effective coordination among the production units that show a harmonious work, meeting company objectives and customers requirements.

Our Products

Pneumatic Spot Welding Machine

DC MMA TIG Welding Machine

Transformer Based MIG Welding Machine

ARC Welders

TIG Welding Machine

Air Cooled Three Phase Servo Voltage Stabilizer

Servo Automatic Voltage Stabilizer

Step Up Transformer

Isolation Transformer

CVT Transformer

HT Transformers

Seam Welding Machine

**Automatic Hot Staking
Welding Machine**

GUN Spot Welding Machine

**Bench Type Spot Welding
Machine**

**Projection SCR Control
Welding Machine**

Spot Welding Machines

Linear Type Servo Stabilizer
