HAND HELD STIRRER

About Us

Eminent Solutions is a name to reckon with when it comes to industrial machines and surface finishing solutions. As a supplier, service provider, and trader, the company provides a host of sophisticated equipment like hand held stirrers, industrial stirrers with stand, auto spray guns, pressure feed guns, resin casting pressure pots, baking ovens, pneumatic airless spray painting machines, and other specialized industrial solutions. The focus is to deliver high-performing equipment intended to provide reliable performance and reproducible results across a variety of applications.

Customers from a number of industries rely on the consistency of precision control and autonomy that defines each product offering. Modeled on efficiency and simplicity, each machine responds to a contemporary aim for productivity, with less downtime, greater energy efficiency, and lower maintenance costs. For example, whether it is a paint booth that improves finishing quality or a stirrer that tackles heavy-duty mixing demands, each item is created to be plug-and-play into industrial processes. Consequently, there is professional consulting and service in or after the sale, which augments the experience of clients and enables companies to optimize their surface finishing processes. Offering more than equipment, we create value by linking innovation to the specific operational needs of industry sectors such as automotive, manufacturing, coatings, and resin casting.

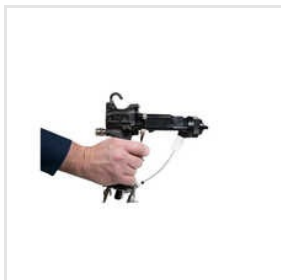

Key Facts

Nature of Business	Service Provider
No of Staff	2
Year of Establishment	2017
OEM Service Provided	No

Our Products

Manual Electrostatic Paint Spray Gun

Electrostatic Spray Painting Equipment

Auto Spray Gun

Pressure Feed Gun

Pneumatic Diaphragm Pump

Technical Training On Painting And Powder

Paint Consultant Service

Baking Oven

Pneumatic Airless Spray Painting

Paint Spray Booth
