

ISS 12 DTC PrecisionCam Soft Package Textile Winding Machine

Product Description

The ISS 12 DTC PrecisionCam Soft Package Textile Winding Machine is engineered for precision, efficiency, and reliability. It minimizes yarn wastage while producing uniform soft packages for cotton, polyester, silk, and blended yarns. Featuring customizable controls, adjustable traverse length, individual inverter drives, and an advanced electronic tensioner, it ensures smooth operation with noise levels below 70 dB.

Applications

Ideal for spinning mills, textile processing plants, thread manufacturing units, and cone winding applications involving cotton, polyester, silk, and blended yarns.

Certifications & Delivery

Manufactured to industry standards, supplied with complete documentation, premium packaging, express shipping options, and sample units available on request.

FAQs

1. Improves winding using electronic tension control and inverter drives to reduce breakage and wastage.
2. Suitable for cotton, polyester, silk, and blended yarns with package diameters up to 300 mm.
3. Express shipping is available upon request.
4. Manufactured and supplied from India.
5. Benefits include reduced maintenance, better yarn quality, low-noise operation, safety features, and high productivity.
