

GUNS WITH FINISHING EXCELLENCE

Pressure Feed Spray Gun

The pressure feed spray gun from Triologics is the industry standard for consistent performance. It provides both, the finest quality results and continuous output that may be required for any application.

The Spray gun is designed and built for spraying all types of materials. Its durable lightweight construction, compact design and perfect balance make it both, easy and comfortable to use.

A smooth triggering action ensures less fatigue and better control for high quality finishing needs. A variety of air cap and fluid tip combinations ensure quality finish with any material.

The pressure feed spray gun is used in virtually every industry where spray applications exist e.g. Automobiles & refinishing, electricals, pharmaceuticals, furniture, leather, ceramics, textiles, foundry etc.

pressure feed spray gun is available in 1.1, 1.4 & 1.8 mm fluid tip and needle combinatin.

Gravity Feed Spray Gun

The Gravity fees spray gun combines the advantage of gravity feed fluid flow with quality and performance of advanced spray gun engineering.

Gravity feed provides higher fluid flow with less air, meaning fuller, thicker, more uniform coverage. This gun is ideal for touch up jobs and for small jobs which require frequent colour changes and low paint consumption.

The gravity cup is mounted on the top of the gun. This cup is made of light weight Nylon 6 material and is available in 570 ml capacity. The unique design of the gun and cup ensures maximum utilisation of paint to the very last drop

Unique Features of Guns

- ☆ Precision air and fuid adjustments.
- ☆ Light weight aluminium body.
- ☆ Stainless Stee needle.
- ☆ Nozzle made from hardened alloy steel for consistent performance.
- ☆ Spraying of abrasive and corrosive material paossible with special tips.
- ☆ Easy and quick maintenance reduced downtime.
- ☆ Easy availability of all spare parts.
- ☆ Easy replacable specially designed threaded bras baffle for quick maintenance.
