About Us

Fitmart Alloy & Fasteners offers fastening solutions that are precision-engineered to exceed industry standards. As a manufacturer and supplier, we continue to focus on combining strength, durability, and reliability, responding to a broad spectrum of client needs. Every product is engineered to secure and stable fastening, using quality materials that resist corrosion and guarantee long-lasting performance. The bolts and fasteners can be used for industrial installations or a specialized project; they are adaptable for demanding environments and can remain stable under stress and optimized torque for easy installation. Every product is engineered with an unmatched attention to detail and designed to deliver maximum safety, productivity, and performance, even under extreme conditions. Products have a versatile design for use across construction-based projects, manufacturing-based projects, infrastructure-based projects, and specialized engineering projects. We can customize to precise specifications; we guarantee every product will not only meet client specifications, but also that our products surpass your expectations with practicality and reliability for integrating into any project. Precision, resilience, and innovation come together in each bolt and fastener engineered to deliver trustworthy results that add up to maintaining structural integrity and optimizing operational efficiency.

Fitmart Alloy & Fasteners was established in 2007 in Mumbai, Maharashtra, India, and is a trusted manufacturer and supplier of bolts and fastening solutions. Fitmart Alloy & Fasteners specializes in allen cap bolts, brass hex head bolts, ss 316 customized bolts, foundation bolts, wedge anchor bolts, square head bolts, and allen bolts. The company serves a variety of industries that require durable, precise, and reliable fastening solutions. Fitmart Alloy & Fasteners is committed to quality and engineering expertise; therefore, the fasteners are made with high-quality materials, and the company believes each product must be able to handle the strength, corrosion resistance, and lifetime in severe environments.
