

WHAT IS COLOR CODING?

The use of color coding helps prevent cross-contamination and improve hygiene by clearly and simply identifying to the cleaner the particular product (mop, bucket, duster, etc.) that should be used in any given situation. Color-coding is the idea of designating certain cleaning tools and processes by consistent color schemes. Its purpose is the segregation of equipment, materials and procedures as a means of preventing cross-infection and contamination in the home and the workplace.

ADVANTAGES OF COLOR CODING

The benefits of Color Coded Cleaning System are numerous. These have been highlighted below:-

- Control infection
- Prevent cross-contamination
- Differentiate for specific tasks or jobs
- Identify between departments
- Help bridge the language barrier
- Reduce injury and accidents
- Makes staff training a breeze
- Meet and exceed workplace health and safety and accreditation requirements

6 LITRE BUCKET

- Strong construction
- Compact in size and easy to carry
- Premium quality PP plastic ensures long life
- Can be used as a standalone bucket for above the floor areas
- Compatible: Greyline & Greenline housekeeping trolleys

ROBIN BUCKET

- Sturdy 25 lt. lightweight bucket with Round wringer
- Light in weight and easy to carry
- Ideal for compact areas requiring wet cleaning
- Premium quality PP plastic ensures long life
- For washroom/toilet floors
- Compatible: Round mops

- 25 lt. heavy duty mopping bucket trolley
- Stainless steel construction ensures long life
- High quality four castor wheels for efficient productivity
- deal for all damp & wet mopping needs
- Compatible: Dido / Lito mops
- Color Coding: Wringer plate/grip

Upcoming SS25 in Grey colored bucket

- 30 lt. heavy duty mopping bucket trolley
- Twin chambers to separate dirty water with clean water
- Premium quality PP plastic ensures long life
- Compatible: Dido / Lito mops
- Color Coding: Wringer plate/grip

- 30 lt. heavy duty mopping bucket trolley
- Drains on both sides for emptying of fresh and dirty water
- Made from robust PP plastic non rusting, robust and recyclable
- Double Drain provision to drain water easily
- Compatible: Dido / Lito mops
- Color Coding: Wringer plate/grip

- 50 It capacity (25 It x 2)
- Multi-utility st. steel basket for carrying other essential tools like spray and chemical bottles
- Highly mobile and durable
- Compatible: Dido / Lito mops
- Color Coding: Wringer plate/grip

Upcoming Eco50 in Grey colored buckets

SS50 •••/•

- 50 lt capacity (25 lt x 2)
- Multi-utility st. steel basket for carrying other essential tools like spray and chemical bottles
- Highly mobile and productive
- Stainless Steel construction
- Compatible: Dido / Lito mops
- Color Coding: Wringer plate/grip

Upcoming \$\$50 in Grey colored buckets

MOPPING SYSTEMS - WET

LITO SYSTEM

- Super absorbent kentucky style microfiber mops
- Wide band for easy control
- Can absorb upto 7 times its weight in water
- Looped ends prevents splitting of the fibers
- Robust poly propylene frame with quick release system
- No sharp edges ensures no scratching
- Damp/Wet
- Color Coding: frame/mop/handle
- Compatible: Eco25, SS25, Eco30, Wonder30, Eco50, SS50

Color coded strip

ROUND SYSTEM

- 100% microfiber with more coverage
- No linting and better absorbency
- Comes with Italian screw thread
- Soft microfibers allow easy wringing and improves work-time
- Can be washed at higher temperature without losing color
- Damp/Wet
- Color Coding: mop/handle
- Compatible: Robin, Eco25R, SS25R, Eco50R, SS50R

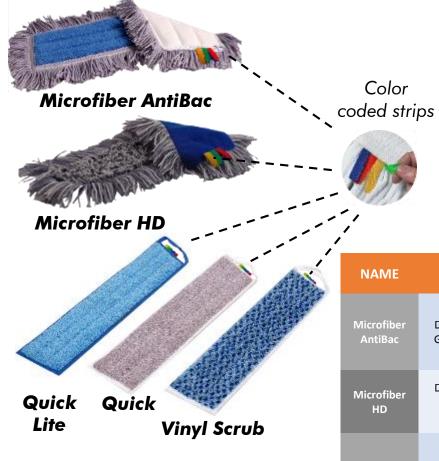

MOPPING SYSTEMS — DRY / DAMP

PRESS & GO SYSTEM • •

- Aircraft-grade aluminium ensures superior durability
- Replaceable velcro strips without changing the
- Smooth and ultra-thin design with no sharp edges
- 360 degree movement with locking mechanism
- Damp / Wet
- Color Coding: Locking clip and screw/handle

PRESS & GO Microfiber mops

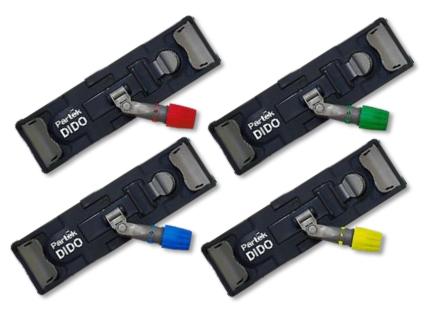

Color

- Quick & Touchless System—do not need to touch mop
- Easy to use with 360 degree lock mechanism-can clean even under beds and furniture
- Quick lock to facilitate vertical surface cleaning
- Used after pre-soaking the mops in water or chemical solution for enhanced cleaning
- Suitable for areas where wet mopping cannot be implemented
- Good for 300 to 500 washes and is low cost in use

	NAME	USAGE	FEATURES	SIZE (CM)	NO. OF WASHES	WASHABLE TEMP. (°C)
	Microfiber AntiBac	Dry/Damp, Germ Killer	Eliminates 99.99% bacteria without chemicals	40 & 60	500	90
	Microfiber HD	Dry/Damp, Superior Quality	Heavy Duty, for hard to clean areas	40 & 60	300	90
	Quick Lite	Dry/Damp, Normal Use	Highly absorbent, leaves min moisture behind	40 & 60	300	90
	Quick	Dry/Damp, Normal Use	Tri-layered microfiber with more water retention	40	500	90
	Vinyl Scrub	Damp, Heavy Duty	Designed for vinyl floor cleaning	40	500	60

MOPPING SYSTEMS — DRY / DAMP

DIDO SYSTEM

- Strong lock joints and overall frame ensures durability
- Foot operated button to fold and wring in a Tec wringer
- 360 degree cleaning possible
- Firm grip and no loose movements with locking clip

Damp

Color Coding: Locking clip and screw/handle

DIDO mop O

- Made of high quality microfiber unlike similar mops; no linting
- Polyester backing to provide strength and avoid shrinkage
- Equipped with color coded strips
- Easy to use and wash after use

QUICK SNAP SYSTEM ••• / •

- Aircraft-grade aluminium ensures superior durability
- Firmly holds Flortex cloths for efficient damp cleaning
- Smooth and sleek design with no sharp edges
- 360 degree movement with locking mechanism
- Dry / Damp
- Color Coding: Locking clip and screw/handle

FLORTEX cloths

- Captures micro-dust and dirt
- Easy to clean and maintain
- Lasts from 300 to 500 washes under normal cond.
- Compatible: Quick Snap System

MOPPING SYSTEMS

ALUMINIUM HANDLES ••••

- Rugged 140 cm long Aluminium handles
- Heavy duty and doesn't break or bend easily
- Compatible: Dido / Lito mops
- Color Coding: Handle grips

TELESCOPIC HANDLES

- Made of high quality Aluminium, this handle can range from 100 to 180cm depending on user's requirements
- 4 Color coded caps can be used along with it to differentiate.
- (Caps to be ordered separately)
- Compatible: Dido / Lito mops
- Color Coding: Caps

7 Benefits of Implementing Color Coding at your Premises

- 1. Prevents Cross Contamination
- 2. Improves Training and Communication
- 3. Enhances the life of Building & Assets
- 4. Ensures workforce safety
- 5. Minimizes chemical usage and saves money
- o. Simplifies Supply Management
- 7. Elevates employee performance

MICROFIBER HAND CLOTHS

LITE / REGULAR ••••

- Removes dust/dirt from micro-pores
- Perfect blend of Polyester (strength) & Polyamide (absorbency)
- Soft to touch & easy to clean
- Washes: Lite-300/ Regular-500

- Softest, thirstiest, waffle-weave just perfect for quickly soaking up water and spills
- · Voluminous pattern allows it to enclose lot of oil and grease from your kitchen surfaces
- Works and lasts much longer than cotton towels
- Washes: 500

- Smooth & shiny glass cloth for removing fingerprints
- Clean glass and windows without chemicals
- Super Absorbing Capacity & Lint Free Cleaning
- Rapid Drying Time as compared to other microfiber mops
- Washes: 500

MICROFIBER HAND CLOTHS

HI-TECH • • • / •

- Can easily clean without using chemicals; saves money
- Finest quality of microfibers endures no linting at all
- Best used on electronic surfaces like TVs, laptops, monitors, cameras
- · Can be used dry or wet
- Washes: 500

Antibacterial Certification by

- Specialised antibacterial properties with just water
- Finest quality of microfibers ensuring no linting
- No residual micro-organism growth and no fowl smell
- · Certified to kill 99.99% bacteria and germs and reduces growth
- Washes: 500

Cross contamination happens when viruses or harmful bacteria are transferred from one surface to another.

Why is it so important?

Preventing cross-contamination is a concern for all types of facilities. Certainly, healthcare facilities are keenly concerned because they are the first place we turn to when something compromises our health.

The need for cleanliness is inherent in protecting patients, staff and visitors. Products that help control cross contamination are important for other facilities too, such as schools, food service operations and office buildings.

OTHER CLEANING TOOLS

SPRAY BOTTLES

- High quality spray bottles
- Dimensions: 8x12x25cm
- Capacity: 650ml
- Can be used with water and acid based chemicals
- With adjustable nozzles
- Color Coding: Nozzles

- Compact with increased depth than other caddies available
- Two removable bottle holders to keep bottles/can stable
- Eco friendly PP plastic ensures durability and minimum breakage
- Color Coding: High quality sticker strip

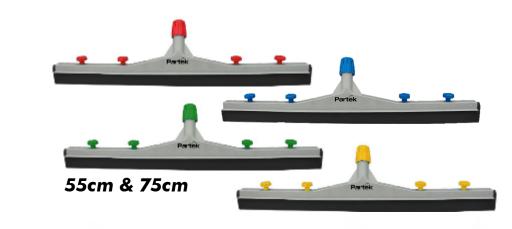

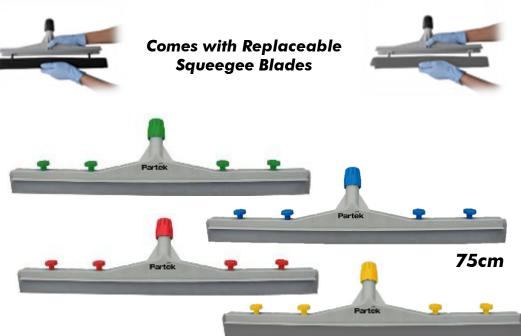

The food service industry uses a system called Hazard Analysis and Critical Control Point (HACCP) to manage the threat of cross contamination. HACCP programs are designed to identify specific hazards and measures for their control to ensure the safety of food. The system is comprised of 7 principles focused on prevention, including protocols for all phases of food preparation.

One essential component of an overall HACCP program is a color coded system that designates a specific color to various areas of the facility.

OTHER CLEANING TOOLS

HEAVY DUTY • • • • / • FLOOR SQUEEGEE

- The blade lasts 3 times more than ordinary blades
- Available for medium and large areas
- Push to sweep and pull to wipe
- Replaceable blades thus reducing cost
- Can be used dry as well as wet
- Double blades for better wiping
- **Size:** 55cm & 75cm
- Color Coding: Blade screws/Handle screw and grip

INDUSTRIAL ••• / • FLOOR SQUEEGEE

- Special blade allows squeegeeing of oily floors
- Extra large coverage with same effort
- The blade lasts 4 times more than ordinary blades
- Can be used dry as well as wet
- Replaceable blades thus reducing cost
- Double blades ensuring better cleaning without any streak marks
- Push to sweep and pull to wipe
- **Size:** 75cm
- Color Coding: Blade screws/Handle screw and grip

OTHER CLEANING TOOLS

KWIK DUSTPAN

- Rubber lip for better dust pickup
- Color coded patch on dustpan handle
- Superior flagged end broom fibers ensure optimum cleaning results
- Angular design for ergonomic cleaning
- For domestic as well as commercial use
- Broom can be hooked on to the dust pan
- Color coding: Color patch on dustpan handle

TABLE SQUEEGEE • • •

- Squeegee blade is durable and long lasting
- Light weight and convenient to use

Can be used on tables and slabs to squeegee excess water

 Color coding: Color Coded frame

HAND DUSTPAN

- Rubber lip for better dust pickup
- Superior flagged end brush fibers ensure optimum cleaning results
- For domestic as well as commercial use
- Color coding: Complete Color Coding

- Identify areas based on building plan
- ✓ Allocate color depending on nature of work
- ✓ Select the right tools for each area in terms of color and productivity
- ✓ Impart training in regards to correct usage
- Monitor progress on a timely basis

OTHER ESSENTIAL TOOLS

RUBBER GLOVES •••

- Anti-slip pattern for good grip in wet and dry conditions
- Pure cotton flock lining to absorb perspiration
- Improved sensitivity and dexterity
- Angular design for ergonomic cleaning
- Anatomically shaped for comfort
- Can be used on both hands ambidextrous
- Color coding: Full color coding

TOOL HOLDER ••••

- For easy storage of handled tools and other items in most settings
- Numerous uses, both indoors and outdoors
- Ideal for handles/tools 15-40 mm in diameter
- Made of durable plastic with a flexible TPE gripping surface that can grab the tool easily
- Color coding: Rail brackets are color coded

The spread of viruses and bacteria from room to room or person to person can start as a minor problem that quickly escalates into a full blown outbreak.

Note: There are occasionally instances when we need to use a customer's specific color coded cleaning system and under these circumstances we are happy to follow color coded charts which enable specific cleaning for separated areas. We ensure that our staff are fully trained on the differences should the need arise.
