About Us

We, Primax Engineers Pvt. Ltd., were formed in the year 1997 in Bengaluru, Karnataka. Banking on our mastery in the domain of advance polymer science and a rich industry experience of engineering high grade elastomer products, our company has managed to come up with many innovative ways to serve a range of industries. The combined efforts of our hardworking and zealous professionals who have always worked devotedly around the clock led to the evolvement of our modest company to an exemplary business serving innovative Rubber Rings, Rubber Seals, Rubber Gaskets, PU Coating Wheels And Rollers, Rubber Expansion Joints and PTFE Products. We moved from strength to strength in all these years guided by the power of innovation, involvement, diversification and foresight, which have always been at the heart of our corporate philosophy. Through our consistent efforts, today, we have achieved perfection and excellence like no other polymer engineering firm in India.

A wide variety of industrial polymer components that prove to be well suited for various applications in petrochemicals, chemicals, dairy, textile, pharmaceutical, steel, mining, ceramics and glass are included in the product portfolio that we offer. Because of product purity and efficiency, we have garnered laurels from many clients across these key sectors. We have also forged association with a number of private and public sector organizations who have chosen our range time and again. We bask in the glory of being their certified product manufacturer, trader and supplier even today.
