

Process Inline Dryer

Product Description

This Process Inline Dryer is an industrial drying system designed for continuous production and efficient material processing. The equipment is constructed using stainless steel and operates on a 415V electrical supply. It utilizes radiating heating technology to provide uniform heat distribution and reliable drying performance across industrial applications. Suitable for bulk processing operations with customizable dimensions and production capacity.

Typical Specifications:

- Usage: Industrial
- Material: Stainless Steel
- Voltage: 415 V
- Heat Source: Electric
- Technology: Radiating
- Warranty: 1 Year
- Color: Silver / Industrial Finish
