

**Law Imposition:**

A array of computer software and indicators is obtainable for EAGLE Axle that permit regime to select the optimum system for their imposition requirements.

The Axle is specially suitable to where conformity with civil law is essential as 'over-speed' loads are mechanically perceived so that transports cannot be given with wrong weighing tickets.

Specific importance is set on product consistency and endurance, so the company can manage its every design and fabricate to hold back the necessary elevated status of quality regulation.
