WHO WE ARE

BPE Innovations Private Limited is a leading and one of the oldest company manufacturing automation products in India since 1983. We specialize in Sensor based automation products for Industries and Washroom Hygiene. Our foremost concerns have always been on quality and superior customer service. Having a technical background clubbed with experience & expertise in our field enable us to score an edge over others in the industry.

We are especially designing and manufacturing tougher products that last long and are easier to repair unlike use & throw imported ones which are marketed extensively in India by big brands. We are committed to serve our country with easily repairable lifetime product with no need to replace entire system in life.

We also manufacture custom sensor based products according to the customer requirements.

Our products are regarded worldwide and acclimatize very easily to robust conditions like in India where brands who are marketing imported sensors fail miserably due to lack of customer service, non-availability of spares and non-adaptability of imported sensors in highly adverse domestic conditions like climate, humidity and poor water quality.
