

HVAC Duct System Description

This image displays an external HVAC duct system installed alongside a multi-story building. The ducting is covered with insulated metallic cladding designed for air ventilation and temperature control. The structure helps in distributing conditioned air efficiently throughout the building. The installation appears durable and suitable for commercial or industrial applications.

Feature	Details
System Type	HVAC Duct System
Material	Insulated Metal Cladding
Application	Commercial / Industrial Ventilation
Purpose	Air Distribution and Cooling
Installation	External Building Mounted
