## About Us

A plastic material, expanded polystyrene (E.P.S.) is composed of individual cells of low density polystyrene. The structure of the material provides it with special features. Its cells are not interconnected, therefore, heat cannot pass through it easily, making it a great insulator. Used across several industrial segments, it is widely demanded in the market. A prominent manufacturer, exporter and supplier of Expanded Polystyrene, we, SHRI SRINIVASA POLYMERS are renowned for our product quality and excellent customer service. Driven by innovation, we ensure generation of new ideas, which lead to process our product improvisation.

Led by enthusiastic technocrats, we embarked on our journey in 2007. A member of EPS Recycling Association of India (EPSRAI), we have come a long way since the inception of the company. Within a span of three years, we have build a vast pool of customers, which includes domestic as well as foreign clients. We can offer tailor-made products as per clients' specifications. Our products meet the highest standards for quality and are easily available in the market.

## Key Facts
