## About Us

Since the beginning of our journey, we, **Guru Kirpa Enterprises** have been **manufacturing** the best range of excavator spare parts. Our wide range includes **Collar Bush, Excavator Bucket Parts, Excavator Track, Chain Bush, Bucket Bushing, Excavator Collar Bush, Rock Breaker** etc. Our procurement agents help us source the best raw material which is obtained from the certified vendors. Use of the high grade raw material make our excavator spare parts matchless when compared to the offerings of other companies. At our unit, we have installed imported high end machines and equipment which supports us in manufacturing our array for which we are globally renowned. All our excavator spare parts are offered at market leading prices as we think of our customers before our personal interests. Till today, all clients who have given us the chance to serve them are highly pleased and proudly recommend our name to other. By the support of our team, we have overcome every obstacle which came in our way and now have acquired the top most position among leading business entities. We aim to grow more and make our brand globally popular and the first choice of customers. We promise our clients that we will be serving them more efficiently in future and they will never be disappointed about their decision of giving us the chance to serve them.

## Why Customers Choose Us?

There are numerous manufacturing companies in the industry, although people choose us over others after observing that we are beneficial to associate with. Apart from our qualitative excavator spare parts, our honesty is something which attracts them the most. Following are some of the other reasons owing to which customers prefer us over others:

- ✿ Habit of keeping promises
- ✿ Prompt delivery of consignments
- ✿ 100% quality tested products
- ✿ Ethical trading values

## Quality Assurance

One of the factors on which our reputation depends is the equality of our products like excavator bucket parts, collar bush, bucket bushing etc. For this, we strive to always maintain high standards. At our premises, we have built a quality panel where the obtained raw material is thoroughly checked before the manufacturing process. Later, the products are monitored on various parameters such as dimensions, durability and resistance to corrosion. Only after the approval of experts, items are sent to the packaging unit.
