About Us

In almost all industrial processes, mechanisms are required. Purchasing a mechanism is not an easy job. Days of planning and searching are spent in buying a perfect mechanism. Not just limited to this but also, installation, approval and many such things increase the work load of employees working in the company. Helping such companies and reducing the work load of such employees by rendering a variety of services is Boilers Consultant. We are an Indore based service provider, working as Consultants for process heat boilers steam generation and distribution and rendering services like Steam Requirement Assessment, Boiler selection, boiler Installation Plan, Steam Pipe Line Designing, Boiler Registration, Boiler Inspection and much more. As its in the very name of our company, we are Boilers Consultant Specialist. From choosing the right type of boiler to its registration and after a time its inspection, all these are done by us.

It has been 18 years since Boilers Consultant was formed. In these years, the company has secured for itself a strong position in the Indian market by serving as a service providing company and rendering many services, Steam Boiler Consultant, Steam Requirement Assessment, Boiler Selection, Chimney Size Calculation and Boiler Inspection are a few offered services of the company. The company is located in Indore, Madhya Pradesh (India) and have many customers from all nearby locations. Customers being the focal point of the company are provided maximum satisfaction via reasonable rate charged for all the services, offering online and offline payment modes and much more.
