About Us

In almost all industrial processes, mechanisms are required. Purchasing a mechanism is not an easy job. Days of planning and searching are spent in buying a perfect mechanism. Not just limited to this but also, installation, approval and many such things increase the work load of employees working in the company. Helping such companies and reducing the work load of such employees by rendering a variety of services is Boilers Consultant.

We are an Indore based service provider, working as Consultants for process heat boilers steam generation and distribution and rendering services like Steam Requirement Assessment, Boiler selection, boiler Installation Plan, Steam Pipe Line Designing, Boiler Registration, Boiler Inspection and much more. As its in the very name of our company, we are Boilers Consultant Specialist. From choosing the right type of boiler to its registration and after a time its inspection, all these are done by us.
