## About Us

Jagdamba Minerals (JM) ever since its inception in 1992 has been a consistent performer in the domain of supplying rich mineral additives like Bentonite Products, Ground Calcium Carbonate Lumps, Dolomite Lumps, China Clay, Quartz Lumps, Talc Powder, etc. We have been meeting the requirements of various industries by converting these natural raw resources into useful products. We pay great attention to conducting research activities as it helps us to lead the domain by supplying new and better products that meet the current & future requirements of the market. By working with the goal of delivering the finest products, as a manufacturer, we carved out a niche for ourselves in the global markets for high-end minerals.

We commit our customers to delivering supreme quality minerals, such as Dolomite Lumps, China Clay, Quartz Lumps, Ground Calcium Carbonate Lumps, Talc Powder, etc. And this commitment motivates us to pursue excellence in our manufacturing tasks. We also ensure to maintain consistency and transparency in the business process with our customers to retain their interests. Our company ensures to hold unequivocal trust of customers by carefully handling classified and crucial information. The reputation that we hold in the current market helps us with garnering trust and confidence among customers. We also attract customers by remaining a reliable and credible business partner to them. Our experts strive to build and maintain a healthy relationship with customers that assures mutually progressive benefits and growth.
