

10KPLD plant- Double Effect Evaporator followed by Agitated Thin Film Dryer

KEP Engineering, focus on standard of quality, with best productive and more successful in this field. We provide good quality assurance system that meant to increase our customer confidence and our company credibility, while also improving work processes and efficiency, and it enables our productive to better compete with others. In this month we had nearly completed more than five projects dispatch, this is a great honor for our team. This is possible only the team efforts; ability to work together toward a common vision.

EMPLOYEE OF THE MONTH FOR JULY-2019

Mr.A.Mahesh working as a Sr.Site Mechanical Engineer in KEP Engineering from last 4 years. We appreciate his efforts, sincerity, consistency, enthusiasm towards work. From last four months he completed three prestigious projects single handedly; erection and commissioning were successfully executed. He has good technical knowledge on plant execution system. “We applaud the determination and effort he had demonstrated during his journey in KEP. We look forward to seeing all of the great things he will accomplish in the upcoming years”.
