METAL COAT

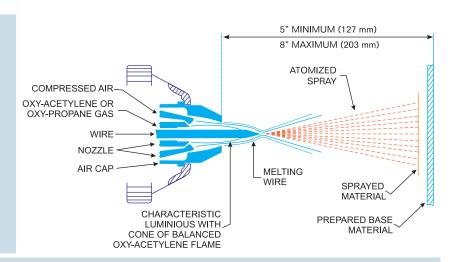

WIRE FLAME SPRAY GUN MODEL: 11M

Suitable For Heavy Duty Anti-Corrosion Coating using Soft Wire such as Aluminium, Zinc, Lead, Tin, Babbitt of size 1/8", 5/32" & 3/16" (3.17, 3.96, 4.76mm)

Wire Flame Spray Process

The wire is fed in to the front of gun through air driven turbine. Fuel gas and oxygen is mixed properly and safely in the siphon plug gas head assembly which provides combustible heat source. The molten metal is atomized and propelled by compressed air in the form of fine metal spray particles for coating on job surface.

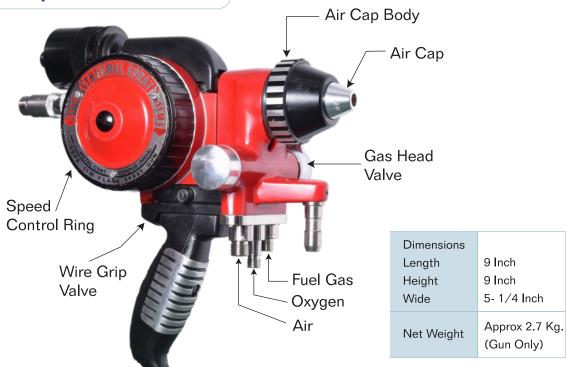

About 11M Flame Spray Gun

This is specially designed to run at higher speeds allowing the user to apply soft wire material to any substrate efficiently and economically. This gun is convenient for hand-held or start/stop operation due to the Wire feed thumb trigger. It is engineered specifically for soft-wire applications. This gun will not spray hard materials such as Stainless Steel, Nickel, Bronze, Copper or Bonderite. It can be used for smaller jobs as well as cranking out large area applications almost as easily as spray painting. It sprays 1/8" (3.17mm), 5/12" (3.97mm) and 3/16" (4.76mm) soft metalizing wires such as Zinc,

Aluminium, Lead, Tin and Babbitt, with low melting points. Numerous accessories increase its versatility including various Air Cap, Nozzle and Siphon plug configurations to provide exceptional coating quality and economical operation. Converting from one size of wire to another is quick and easy. This is a very effective gun for coating or repairing various metals in severely corrosive environments. This gun is perfect for hand-held, fixed or mobile applications. The entire system (except the compressor), can be mounted on a cart for mobile applications and field repair work.

The 11M Gun is an equivalent to 11E Gun

Spray Coating Wires

Soft metals and metal alloys with low melting temperature in wire form are used for spray coating using 11M i.e. Zinc, Aluminium, Tin, Babbitt etc. Standard Wire used are 1/8" (3.17mm), 5/32" (3.97mm), 3/16" (4.76mm).

Combustion Gases Used

The combustion gases used are oxygen and fuel gas such acetylene, LPG, propane etc.

CONVERSION KIT Conversion Kit for change of fuel gas acetylene to propane/LPG or vice-versa.

WIRE FLAME SPRAY GUN-11M SPECIFICATIONS		
Operation	Manual	
Wire Feed	Air Turbine	
Wire Size Standard	1/8" (3.17mm)	
Wire Size Optional	5/32" (3.97mm), 3/16" (4.76mm)	
Gasses Used	Oxygen	
Fuel Gas	Acetylene / LPG / Propane	
Compressed Air	35 CFM FAD at 75 psi (5 bar)	
Start Stop Operation	By thumb operated wire feed valve	
Output (Spray Rate) Aluminum Zinc	05.00 Kg./Hr approx. 21.80 Kg./Hr approx.	
Pure Tin Babbitt	22.70 Kg./Hr approx. 22.70 Kg./Hr approx	

Operation	Manual
Wire Feed	Air Turbine
Wire Size Standard	1/8" (3.17mm)
Wire Size Optional	5/32" (3.97mm), 3/16" (4.76mm)
Gasses Used	Oxygen
Fuel Gas	Acetylene / LPG / Propane
Compressed Air	35 CFM FAD at 75 psi (5 bar)
Start Stop Operation	By thumb operated wire feed valve
Output (Spray Rate) Aluminum Zinc Pure Tin Babbitt	05.00 Kg./Hr approx. 21.80 Kg./Hr approx. 22.70 Kg./Hr approx. 22.70 Kg./Hr approx

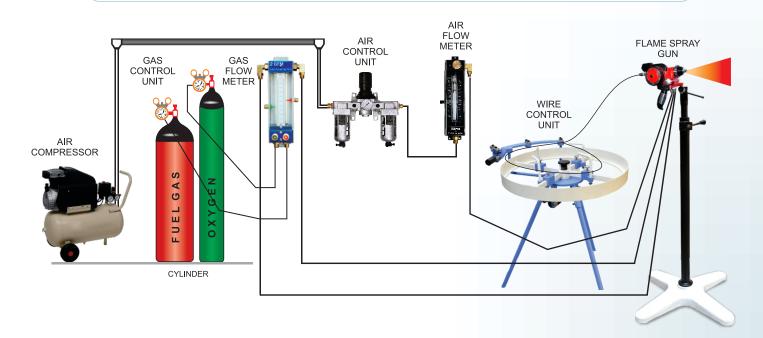

Gun is supplied with standard spares and tool kit.

TYPICAL APPLICATION		
>	To provide Anti-Corrosion Coating	
>	For Galvanizing	
>	To Enhance Electrical Conductivity	

Note:

- 1. Given parameters are only for reference purpose. Actual values may differ depending upon the geometry and size of the job.
- 2. Buyer to specify wire diameter, material and fuel gas to be used while ordering the gun.

WIRE FLAME SPRAY GUN - COMPLETE INSTALLATION

OPTIONAL ACCESSORIES

Gas Control Unit

Consist of Gas Regulator with pressure gauge for regulating gas flow to wire Flame Spray Gun. It has two pressure gauge to indicate cylinder and delivery pressure.

Pressure Rating:

Oxygen : 10 Bar LPG/Propane : 06 Bar

Acetylene : 2.5 Bar

Air Control Unit

Consist of air filter cum regulator for secondary filtration and regulating air flow to wire flame spray gun. An additional outlet provides connections for operator's helmet.

Pressure Rating: 10 Bar

Hose Kit

Consist of Hose to connect oxygen cylinder & fuel gas cylinder with gas flow meter to spray gun.

Oxygen Hose - Blue : 3+7 Mtrs. Fuel Gas Hose - Red : 3+7 Mtrs. Air Hose - Black : 7 Mtrs.

Air Flow Meter with Hose

The 3AFM Air Flow Meter is a highly accurate, rugged and reliable instrument for regulating and measuring the flow of compressed air in a manual powder or wire combustion spray system.

Model: 3AFM (Air Flow Meter)
Flow Unit in both NLPM & SCFM

Gas Flow Meter

These precision wall mounting Flowmeters are recommended to use with Flame Spray Equipment. Ease of reading enables economic operation and rapid fault diagnosis. The unit incorporates separate flowmeter for both Oxygen and Fuel Gas supplies.

Model: 3GFM (Gas Flow Meter) Flow Unit in both NLPM & SCFM

Model: 2GFM (Gas Flow Meter) Supply with % scale of 0 - 100

Wire Control Unit

The Wire Reel Stand with Straightner is specifically designed to dispense wires for flame spraying. A wire straightener is included and the unit is capable of handling either reeled or loose coiled wire or speel

A Trolley with Reel Stand is also available to move the complete system in shop easily.

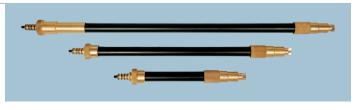

OPTIONAL ACCESSORIES

Extension Nozzles

Where deep bores or recesses are to be sprayed, a range of extension nozzles are available These allow access of the spray at depths upto 1.1 Mtr., whilst straight or deflector air caps can be selected to direct the spray stream to the area required.

Typical use include spraying in internal diameter or hard to reach coating surfaces. For ID coatings, a minimum ID measurement of approximately 8 inches is required to achieve optimal coating quality.

Installation is simple by removing the standard Air Cap Body and Siphon plug and replacing it with the extension. This can be done in about 1-2 minutes without any tools. These are available in various lengths for both Oxy-Acetylene and Oxy-Propane Gun.

Length: 1 FOOT / 2 FEET / 3 FEET

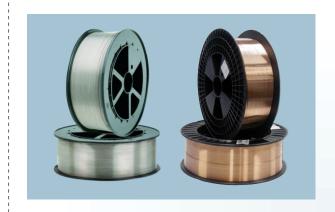

Spray Booth

It is used for controlling sprayed dust and fumes when metallizing operation takes place. It carries away metal dust particles as well as heat. Duct work has adjustable pipe length as well as ball joint to fit individual requirement. Reclaimed materials also have a resale value.

Metal Spray Wire

Standard materials wires of low melting points such as Aluminium, Aluminium Alloy, Tin, Tin Alloy, Zinc & Babbit are available.

Applications of Various Metal Coatings

- Zinc & Aluminum for anti corrosion coating.
- Tin & Tin Alloy Coating.

Babbitt for bearing applications.

SAFETY WEARS

Metallizing Helmet

Light weight & comfortable with excellent vision. Supplied from a separate air supply which should be filtered by Helmet Air Conditioner.

Air Breather

This is installed in between compressed air line originating from fitting to the operators helmets. Activated charcoal is contained in the breather unit which separates the oil traces from the compressed air and clean compressed air is fed to the operator's helmet.

Helmet Air Conditioner

Air from the air breather is fed to the helmet air conditioner and air is conditioned before it is fed to the helmet for breathing. It has also a regulator knob so that the operator can regulate the temperature of air fed to the helmet. It is self driven and doesn't need external power.

Ear Muff

Light weight & comfortable. Operator & other personnel close to the spray operation must wear. Protect the operator from noise originating during thermal spray.

Protective Glass

Light weight & comfortable with excellent vision. Operator & other personnel close to the spray operation must wear.

Operator Safety Mask

Ensure clean breathing air at all times. Conforms to current legislation on breathing air quality.

Hand Gloves

These are made of rubber and have anti-static properties. Hand gloves protect the operators' hand against flying abrasive and static charge if any.

The Metal Coat 11M is a direct replacement for Metco 11E Gun. All the parts in this gun are interchangeable with Metco parts. The part number suffix (i.e the portion after the dash "-") should match the Metco part number. For example:

If you wish to order a 11E-7-15 Nozzle, the Metal Coat Part No. would be 11M-7-15
