

MODEL BCT-70MX Battery Load Tester

The MODEL BCT-70MX Battery Load Tester is a high-performance and reliable testing device designed for checking battery voltage and load capacity efficiently. It is widely used in automotive workshops, battery service stations, garages, and industrial applications. The tester features a digital voltage display, durable metal body construction, and multiple load selection options for accurate battery performance testing.

Specification	Details
Model	BCT-70MX
Display Type	Digital LED Display
Application	Battery Load Testing
Load Selection	30A / 40A / 50A
Body Material	Metal
Usage	Automotive & Industrial Batteries
Color	Blue & White
Operation	Manual Push Button
Condition	New

Key Features:

- Accurate battery voltage testing
- Heavy-duty and durable body design
- Multiple load selection options
- Easy push-button operation
- Suitable for workshop and garage use
- Portable and compact design
