

MODEL C6-72 Multi Battery Charger

The MODEL C6-72 Multi Battery Charger is designed for reliable and efficient charging of industrial and automotive batteries. It is widely used in workshops, battery service stations, automobile garages, and industrial applications. The charger is equipped with durable metal housing, voltage selection controls, and stable charging performance for long operational life.

Specification	Details
Model	C6-72 Multi Battery Charger
Application	Automotive & Industrial Battery Charging
Voltage Support	6V / 12V / 24V / 48V / 72V
Display	Analog Meter
Body Material	Heavy Duty Metal
Operation	Manual Control
Cooling System	Ventilated Cooling
Usage	Workshop & Industrial Use
Color	Blue & White

Key Features

- Heavy-duty industrial battery charger
- Multi-voltage charging support
- Durable metal body construction
- Easy-to-use control panel
- Stable charging performance
- Suitable for continuous operation
- Compact and portable structure
