

MODEL FC30/24 Fast Battery Charger

The MODEL FC30/24 Fast Battery Charger is a heavy-duty industrial battery charging solution designed for fast and efficient charging of automotive and inverter batteries. It is suitable for workshops, service centers, garages, battery dealers, and industrial applications. The charger is equipped with durable construction, digital monitoring display, overload protection, and reliable charging performance for long operational life.

Specification	Details
Model	FC30/24 Fast Battery Charger
Input Voltage	220V AC
Output Voltage	12V / 24V
Charging Capacity	30 Amp
Display Type	Digital Display
Application	Automotive & Industrial Batteries
Protection	Overload & Short Circuit Protection
Mobility	Heavy Duty Wheels
Body Material	Metal Cabinet
Usage	Garage, Workshop, Battery Service Center

Key Features:

- Fast charging operation
- Suitable for 12V and 24V batteries
- Durable metal body construction
- Easy-to-read digital display
- Heavy-duty battery clamps
- Industrial-grade performance
- Portable wheel-mounted design
