

## FEATURES ■■■■■■■■■■

- For Torsion springs suitable for carrying out load vs deflection test as specified in Indian standard specifications, a compact design covering wide range.
- The moving parts are provided with phosphorus bronze bushes for smooth operation and long life.
- All the components are well protected against any kind of rust/corrosion.
- To avoid friction spindle is guided in special bearing.
- Highly sensitive machine, made possible by use of Imported sensors and sophisticated gear system, and at the same time fast enough.
- Special care has been taken so that if any play occurs in due course of time, it does not effect the load or deflection readings.

### We also Deal in:

- Spring End Grinding Machines.
- Spring Hook Bending Tools.
- Spring Hand Coilers.
- CNC Spring Coiling Machines.
- Second Hand Spring Coiling Machines (Wafios, Hack, Bennett, Schenker etc).
- Tensile Testing Machines.
- Wire Torsion Testing Machine.
