About Us

Supreme Technoplast was established in Vadodara (Gujarat, India) in 1991 and is a reputable manufacturer, trader, and supplier of a variety of high-quality products, including Industrial FRP Blower With Housing, FRP Eco Air Ventilator With Fan, Industrial PP FRP Ducting, FRP Pickling Tank, etc. The goods are meticulously made using cutting-edge technology, premium fibre reinforced plastic, and polypropylene in accordance with accepted industry standards.

Our offered products are well appreciated across a variety of industries for ventilation and industrial process applications where corrosive vapours may be present in the airstream or surrounding the atmosphere. These products are highly sought after on the market for a number of reasons, including their sturdy construction, reliable performance, resistance to wear, ease of maintenance, etc. At our cutting-edge testing facilities, our offered products are thoroughly examined against a range of quality standards under the watchful eye of our skilled quality controllers. The most cutting-edge production facility is available to us so that we may produce the best assortment of products. Our infrastructure has been divided into a number of sub-divisional components, including procurement, production, quality control, sales and marketing, etc. Our infrastructure is well-equipped with all the most cutting-edge equipment to boost output rate. Also, our infrastructure enables us to meet the extensive and urgent needs of our esteemed clients within the given time limit. To make business easier, we also accept a number of payment options, including cash, check, and DD. Our Owner, "Mr. Anil Patel," has guided us in building a solid reputation in this industry. He has a wealth of knowledge and experience, which has allowed us to provide the best products to our clients.
