SECTION III- RISK FACTORS

An investment in Equity Shares involves a high degree of financial risk. You should carefully consider all information in this Draft Prospectus, including the risks described below, before making an investment in our Equity Shares. The risk factors set forth below do not purport to be complete or comprehensive in terms of all the risk factors that may arise in connection with our business or any decision to purchase, own or dispose of the Equity Shares. This section addresses general risks associated with the industry in which we operate and specific risks associated with our Company. Any of the following risks, as well as the other risks and uncertainties discussed in this Draft Prospectus, could have a material adverse effect on our business and could cause the trading price of our Equity Shares to decline and you may lose all or part of your investment. In addition, the risks set out in this Draft Prospectus are not exhaustive. Additional risks and uncertainties, whether known or unknown, may in the future have material adverse effect on our business, financial condition and results of operations, or which we currently deem immaterial, may arise or become material in the future. To obtain a complete understanding of our Company, prospective investors should read this section in conjunction with the sections entitled "Our Business" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" on page nos. 64 and 123 of this Draft Prospectus respectively as well as other financial and statistical information contained in this Draft Prospectus. Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other risks mentioned herein.

This Draft Prospectus also contains forward-looking statements that involve risks and uncertainties. Our results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including events described below and elsewhere in this Draft Prospectus. Unless otherwise stated, the financial information used in this section is derived from and should be read in conjunction with restated financial information of our Company prepared in accordance with the Companies Act and restated in accordance with the SEBI (ICDR) Regulations, including the schedules, annexure and notes thereto.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may have material impact quantitatively;
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material individually but may be found material collectively.
4. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

- 1. We generally do business with our customers on purchase order basis and do not enter into long term contracts with most of them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.***

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

2. *We are a Company with limited operating history, and therefore investors may not be able to assess our prospects on the basis of historical results.*

We were incorporated as a public limited company in June 20, 2018. As we do not have significant operating and financial history, it may be difficult to evaluate our current or future prospects on the basis of historical results. Our past performance of four months should not be construed as an indication of our future performance. For details regarding the business and financial information, please refer to the chapters titled "Our Business" beginning on page no. 64 of this Draft Prospectus. Given our limited operating history in the business in which we operate, there will be only limited information which evaluates the business and our current or future prospects on which to base the investment decision. However, prior to the association with our Company, our Promoters, Mr. Anil Kumar Gupta, Mr. Amit Gupta and Mr. Arun Gupta, together have industry experience of many years and possess rich business intellect in the trading circles of Delhi. They have been in this business through proprietary business. For details about the promoter family track record of this business and its proprietary concerns please see "History and Certain Corporate Matters" on page no. 76 of this Draft Prospectus.

3. *We do not own registered office which is used by us currently.*

We have our registered office cum godown at Premises No. 5504/15, Basti Harpool Singh, Sardar bazar, Delhi-110006. We have taken the said office on rent from relative of the promoter – Mrs. Pushpa Gupta on a monthly rent basis. The agreement expires on August 28, 2019.

If owner of the said premise revokes the arrangements under which we occupy the premise or imposes terms and conditions that are unfavourable to us, or if we are otherwise unable to occupy such premise, we may suffer a disruption in our operations or have to pay increased license fee, which could have an adverse effect on our business and financial results.

4. *Our operations are significantly located in the Delhi region and failure to expand our operations may restrict our growth and adversely affect our growth.*

Currently, our office and godown is situated in Delhi and we are carrying our business mainly with market players from Delhi itself. Hence, our revenues are generated from operations in this region only. In the event that demand for our products and services in general reduces or stops by any reason including political discord or instability or change in policies of State, then our financial condition and operating results may be materially and adversely affected. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating region could impact our future revenues.

5. *Our Company may have potential Conflicts of interest with Company in which our promoters have common pursuit, as it has been authorized and engaged in similar line of business.*

Our Promoters have interests in other company- A.C. Aluminium Private Limited, our promoter group entity that may compete with us as it has been authorized and engaged in similar line of business. For details please refer to the Chapter titled "Our Management" and "Our Promoters and Promoter Group" on page nos. 80 and 95 respectively of this Draft Prospectus. Further, our Company has not entered into any non compete agreement with the group entity and hence there can be no assurance of any conflict of interests which may arise in allocating or addressing business opportunities and strategies amongst our Company and our Group entity in circumstances where our interests differ from theirs. In cases of conflict, our Promoter may favour other Company in which our Promoter has an interest. Hence, conflict of interest may occur between our business and the businesses of our Group entity which could have an adverse effect on our business, financial condition, results of operations and prospects.

6. *The prices we are able to obtain for our products that we trade depend largely on prevailing market prices.*

The price of the products traded by us has a significant impact on our profits. Some of our core products such as Aluminium and fabrics have been subject to price fluctuations resulting from weather, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

7. ***The Proposed objects of the issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.***

The objects of the issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled “Objects of the Issue” are based on the company’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

8. ***Our Company has reported certain negative cash flows from its investing activity and operating activity, details of which are given below. Sustained negative cash flow could impact our growth and business.***

Our Company had reported certain negative cash flows from our investing activities and operating activities in period ended September 30, 2018 as per the restated financial statements and the same are summarized as under:

Particulars	Amount (₹. in lakhs)
Net Cash Flow from Operating Activities	(472.22)
Net Cash Flow from Investing Activities	(31.67)
Net Cash Flow from financing Activities	524.21
Total Cash Flow (used) / increased during the period	20.33

If our Company is not able to generate sufficient cash flows, it may adversely affect our business and financial operations.

9. ***Trade receivables constitute major portion of our assets, our inability to recover the same can affect our financial position.***

Our trade receivables was ₹ 1306.29 Lakhs for the period ended September 30, 2018 which is 85.94% and 872.07% of our total assets and net worth respectively. We cannot guarantee that there will be no default from our trade receivables and we cannot guarantee the entire recovery. Any subsequent default by our debtors can affect our financial position and our profitability. Further, high trade receivables affect our working capital requirement as it affects the liquidity position of the business.

10. ***Substantial portion of our revenues has been dependent upon our few clients. The loss of any one or more of our major clients would have a material adverse effect on our business operations and profitability.***

For the period ended September 30, 2018 our top 10 clients contributed almost 85.70% of our sales. The loss of our major customers or a decrease in the volume of products sourced from us may adversely affect our revenues and profitability. We cannot assure you that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our operations and profitability.

11. ***We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.***

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

12. *We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

13. *We have in the past entered into related party transactions and may continue to do so in the future*

We have entered into transactions with our promoters and other related parties. For a list of related parties, please see the chapter titled “*Financial Statements-Annexure XXII - Related Party Transaction*” beginning on page no. 102 of this Draft Prospectus. While we believe that all such transactions have been conducted on an arm’s length basis, there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise.

14. *We require certain approvals and licenses in the ordinary course of business and are required to comply with certain rules and regulations to operate our business, and the failure to obtain, retain and renew such approvals and licences or comply with such rules and regulations, and the failure to obtain or retain them in a timely manner or at all may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business, some of which our Company has either received, applied for or is in the process of application. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Non-renewal of the said permits and licenses would adversely affect our Company’s operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the time-frame anticipated by us or at all. Further, some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. Further, as on date of this Draft Prospectus, our Company has not obtained the Udyog Aadhar Memorandum under the Micro, Small & Medium Enterprises Development Act, 2006.

If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change, we may incur increased costs, be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. For further details, please see chapters titled “Key Industry Regulations and Policies” and “Government and Other Statutory Approvals” at pages 70 and 138 respectively of this Draft Prospectus.

15. *We have not yet applied for registration of our name and logo and we do not own the “corporate logo” legally as on date. We may be unable to adequately protect our intellectual property. Furthermore, we may be subject to claims alleging breach of third party intellectual property rights.*

We have not yet applied for registration of our name and logo under the provisions of the Trademarks Act, 1999 and do not own the “corporate logo” used in our communications and other operations as on date. As such, we do not enjoy the statutory protections accorded to a registered trademark or logo as on date. There can be no assurance that we will be able to register the logo in future or that, third parties will not infringe our intellectual property, causing damage to our business prospects, reputation and goodwill. Further, we cannot assure you that any application for registration of our logo in future by our Company will be granted by the relevant authorities in a timely manner or at all. Our efforts to protect our intellectual property may not be adequate and may lead to

erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property.

16. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

17. The success of our business operations is dependent on the knowledge and experience of our Promoters and Directors as well as our ability to attract and retain them.

Our success depends heavily upon the continuing services of Mr. Anil Kumar Gupta who is our promoter, Mr. Amit Gupta who is the Promoter and Managing Director of our company and their experience and vision has played a key role in obtaining our current market position. Mr. Arun Gupta as our Promoter and Whole Time Director plays a pivotal role in operation areas. We believe that our relation with our Promoter and key managerial persons, who have rich experience in setting up business, developing markets, managing customers and handling overall businesses, has enabled us to experience growth and profitability. We benefit from our relationship with our Promoter family and our success depends upon the continuing services of our Promoter who have been responsible for the growth of our business and are closely involved in the overall strategy, direction and management of our business. Further, our Promoter family have also promoted other companies / firms / ventures and may continue to do so. If the promoter family divert their attention to the other companies, we may not be able to function as efficiently and profitably as before. We may have to incur additional costs to replace the services of our promoters or we may not be able to do so at all, which could adversely affect our business operations and affect our ability to continue to manage and expand our business.

18. We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness we do not obtain any independent support from credit information companies or credit bureaus and on independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

19. There are various negative covenants in the sanction letters issued to us by our lenders, which could put us at a competitive disadvantage and could have an adverse effect on our business, results of operations and financial condition.

The sanction letter issued to us contains provisions that restrict our ability to do, among other things, any of the following:

- Make any Restricted Payments other than as permitted;
- Wind up/liquidate its affair;
- Change the general nature of its business or undertake any expansion or invest in any other entity;
- Effect any change in its accounting method or policies;
- Make any amendments to its constitutional documents;

Also, we are required to obtain the required consents of the lenders before undertaking certain significant corporate actions. We cannot assure you that the lenders will grant the required approvals in a timely manner, or at all. The time required to secure consents may hinder us from taking advantage of a dynamic market environment. In

addition to the restrictions listed above, we are required to maintain certain financial ratios under our financing agreements. These financial ratios and the restrictive provisions could limit our flexibility to engage in certain business transactions or activities.

20. *All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitability as we scale our operations.*

Our purchase and sales models includes various intermediaries who may connect with our competitors and share details of the specialities of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

21. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process transactions and banking data into well managed accounts systems. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations.

We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate a growing customer base or product portfolio or supplier base. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

22. *Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.*

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

23. *Lack of experience in KMPs may adversely affect our business operations and profitability.*

Being a small size company, we do not employ highly experienced KMPs. of our existing workforce as a result of increased competition or other factors relating to our businesses. If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will again have to be trained and integrated into our operations. Failure to train and motivate our key managerial personnel and other employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us. Any cost incurred on the training of the key managerial personnel will put additional pressure on our financial condition and cash flows. Further, any inability to attract and retain talented employees or the resignation or loss of key management personnel, may have an adverse impact on our business, future financial performance and the price of our Equity Shares.

24. *The deployment of funds raised through this issue shall not be subject to any Monitoring Agency and shall be purely dependent on the management of the company.*

Since the issue size is less than ₹100 crores, there is no mandatory requirement of appointing an Independent Monitoring Agency for overseeing the deployment of utilization of funds raised through this Issue. The

deployment of these funds raised through this issue, is hence at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

- 25. *We have not made any alternate arrangements for meeting our regular working capital requirements. If our operations do not generate the necessary cash flow, our working capital requirements may negatively affect our operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our working capital requirements. We meet our working capital requirements through our bank credit facilities, unsecured loans, owned funds and internal accruals. Any shortfall in our available funds and our inability to raise debt would result in us being unable to meet our working capital requirements, which in turn will negatively affect our financial condition and results of operations.

- 26. *We could be exposed to risks arising from misconduct, fraud and trading errors by our employees and Business Associates.***

Frauds or other delinquencies by employees could include indulging in transactions that exceed authorized limits or present unacceptable risks to us; hiding unauthorized or unsuccessful trading activities from us; or the improper use of confidential information. Such misconduct could result in unacceptable business risks, losses, invite regulatory sanctions and seriously harm our reputation and could even lead to litigation. The precautions we take to prevent and detect these activities may not be effective. Any delinquencies or trading errors on the part of our employees could materially affect our business operations, financial position and/or reputation.

- 27. *Our Company has no insurance coverage and we are not protected against all material hazards, which may adversely affect our business, results of operations and financial condition.***

Our business and assets could suffer damage from fire, natural calamities, misappropriation or other causes, resulting in losses, which may not be compensated by insurance as our company has no insurance coverage. If our Company suffers a large uninsured loss, our business, financial condition and results of operations may be adversely affected.

- 28. *Our Promoter and Directors may have interest in our Company, other than reimbursement of expenses incurred or remuneration.***

Our Promoter and Directors may be deemed to be interested to the extent of the Equity Shares held by them, or their relatives or our Group Entities, and benefits deriving from their directorship and shareholding in our Company. Our Promoter are interested in the transactions entered into between our Company and themselves as well as between our Company and our Group Entities. For further details, please refer to the chapters titled “*Our Business*” and “*Our Promoters and Promoter Group*”, beginning on page nos. 64 and 95 respectively and Annexure XXII - Related Party Transactions under chapter titled “*Financial Statements*” beginning on page no. 102 of this Draft Prospectus.

RISK FACTORS RELATED TO EQUITY SHARES

- 29. *The Equity Shares issued pursuant to the Issue may not be listed on the BSE in a timely manner or at all.***

In accordance with the Indian law and practice, permission for listing and trading of Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on the BSE. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares.

- 30. *Any further issuance of Equity Shares by Our Company or sales of Equity Shares by any significant shareholders may adversely affect the trading price of the Equity Shares.***

Any future issuance of Equity Shares by our Company could dilute the investors’ shareholding. Any such future issuance of Equity Shares or sales of Equity Shares by any of our significant shareholders may also adversely affect the trading price of the Equity Shares, and could impact our ability to raise capital through an offering of

securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares.

31. *There is no existing market for our Equity Shares, and we do not know if one will develop. Our stock price may be highly volatile after the Issue and, as a result, you could lose a significant portion or all of your investment.*

There is no guarantee that our Equity Shares will be listed on the Stock Exchanges in a timely manner or at all and any trading closures at the Stock Exchanges may adversely affect the trading price of our Equity Shares. Prior to the Issue, there has not been a public market for the Equity Shares of our Company. Further, we cannot predict the extent to which investor interest will lead to the development of an active trading market on the Stock Exchanges or how liquid that market will become. If an active market does not develop, you may experience difficulty selling the Equity Shares that you purchased. The Issue Price is not indicative of prices that will prevail in the open market following the Issue. Consequently, you may not be able to sell your Equity Shares at prices equal to or greater than the Issue Price. The market price of the Equity Shares on the Stock Exchanges may fluctuate after listing as a result of several factors, including the following:

- Volatility in the Indian and other Global Securities Markets;
- The performance of the Indian and Global Economy;
- Risks relating to our business and industry, including those discussed in this Draft Prospectus;
- Strategic actions by us or our competitors;
- Investor perception of the investment opportunity associated with the Equity Shares and our future performance;
- Adverse media reports about us, our shareholders or Group Companies;
- Future sales of the Equity Shares;
- Variations in our quarterly results of operations;
- Differences between our actual financial and operating results and those expected by investors and analysts;
- Our future expansion plans;
- Perceptions about our future performance or the performance of Aluminium companies generally;
- Performance of our competitors in the Indian Aluminium industry and the perception in the market about investments in the Aluminium sector;
- Significant developments in the regulation of the Aluminium industry in our key locations;
- Changes in the estimates of our performance or recommendations by financial analysts;
- Significant developments in India's economic liberalization and deregulation policies; and
- Significant developments in India's fiscal and environmental regulations. There has been significant volatility in the Indian stock markets in the recent past, and our Equity Share

Price could fluctuate significantly as a result of market volatility. A decrease in the market price of the Equity Shares could cause you to lose some or all of your investment.

32. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, the Equity Shares at a particular point in time.*

The price of the Equity Shares will be subject to a daily circuit breaker imposed by all stock exchanges in India which does not allow transactions beyond a certain level of volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by the SEBI on Indian stock exchanges. The percentage limit on our circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges do not inform us of the percentage limit of the circuit breaker from time to time, and may change it without our knowledge. This circuit breaker effectively limits upward and downward movements in the price of the Equity Shares. As a result, shareholders' ability to sell the Equity Shares, or the price at which they can sell the Equity Shares, may be adversely affected at a particular point in time.

33. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements, and that of our Subsidiary and the dividends they distribute to us. In the past, we have not made dividend payments to the Shareholders of our Company. The Company may decide to retain all future earnings, if any, for use in the operations and expansion of the business. In such situation, the Company may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board and will depend on factors that our Board deems relevant, including among others, our future earnings, financial condition, cash requirements, business prospects and any other financing arrangements. We cannot state with any certainty whether we will be able to pay dividends in the future. Accordingly, realization of a gain on Shareholders' investments will depend on the appreciation of the price of the Equity Shares. There is no guarantee that our Equity Shares will appreciate in value.

34. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the Income-tax Act, 1961, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India except any gain realised on the sale of shares on a Stock Exchange held for more than 12 months will not be subject to capital gains tax in India if the Securities Transaction Tax ("STT") has been paid on the transaction. The STT will be levied on and collected by an Indian Stock Exchange on which equity shares are sold. Any gain realised on the sale of shares held for more than 12 months to an Indian resident, which are sold other than on a recognised Stock Exchange and as a result of which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realised on the sale of shares on a Stock Exchange held for a period of 12 months or less will be subject to short term capital gains tax. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less which are sold other than on a recognised stock exchange and on which no STT has been paid, will be subject to short term capital gains tax at a relatively higher rate as compared to the transaction where STT has been paid in India.

In Finance Bill 2017, Section 10(38) was amended to provide that exemption under this section for income arising on transfer of equity share acquired on or after 1st day of October 2004 shall be available only if the acquisition of share is chargeable to STT under Chapter VII of the Finance (No 2) Act, 2004. In this case, this provision becomes effective, sale shares acquired on or after 1st day of October 2004 on which STT was not charged will attract tax under provisions of Long Term Capital Gains.

As per Finance Bill 2018, exemption under section 10(38) for income arising from long term gains on transfer of equity share shall not be available on or after 1st day of April 2018 if the long term capital gains exceeds ₹ 1,00,000/- p.a. Such income arising from long term gains on transfer of equity share on or after 1st day of April 2018 in excess of ₹ 1,00,000/- p.a. shall be chargeable at the rate of 10%. Capital gains arising from the sale of shares will be exempt from taxation in India in cases where an exemption is provided under a tax treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of the shares subject to relief available under the applicable tax treaty or under the laws of their own jurisdiction.

EXTERNAL RISK FACTORS

35. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

With the increased scrutiny of the affairs of a public listed company by shareholders, regulators and the public at large, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur in the past. We will also be subject to the provisions of the listing agreements signed with the Stock Exchanges which require us to file unaudited financial results on a quarterly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

36. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, results of operations, financial condition and prospects.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations, financial condition and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

37. *The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.*

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in Draft Prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Further, companies meeting certain financial thresholds are also required to constitute a committee of the board of directors for corporate social responsibility activities and ensure that at least 2% of the average net profits of the company during three immediately preceding financial years are utilized for corporate social responsibility activities. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the New Companies Act within the prescribed timelines, and this could also affect our reputation.

To ensure compliance with the requirements of the Companies Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner.

The Companies Act, 2013 introduced certain additional requirements which do not have corresponding equivalents under the Companies Act, 1956. Accordingly, we may face challenges in interpreting and complying with such provisions due to limited jurisprudence on them. In the event, our interpretation of such provisions of the Companies Act, 2013 differs from, or contradicts with, any judicial pronouncements or clarifications issued by the Government in the future, we may face regulatory actions or we may be required to undertake remedial steps. Additionally, some of the provisions of the Companies Act, 2013 overlap with other existing laws and regulations (such as the corporate governance norms and insider trading regulations). We may face difficulties in complying with any such overlapping requirements. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

38. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. For details see section titled “Key Industry Regulations and Policies” beginning on page no. 70 of this Draft Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse affect on our business, financial condition and results of operations.

39. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse affects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

40. Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and neighbouring countries might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares.

India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other\ adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares.

41. Instability in financial markets could materially and adversely affect our results of operations and financial condition.

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors’ reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub-prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in Nifty, NSE’s/ SENSEX, BSE’s benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

42. Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

Hence we have estimated the inventory levels at an average 15 days, considering the normal inventory days.
Trade Receivables	Being a trading and distribution company we normally provide goods on credit to our customers. Our sales collection tenures would differ from customer to customer as well as product line to product line likewise. Hence we have estimated the trade receivable levels at

Trade Payables	We have estimated the trade payable levels at an average of 50 days. GLOBAL ECONOMIC SCENARIO

The upswing in global investment and trade continued in the second half of 2017 at 3.8 percent, global growth in 2017 was the fastest since 2011. With financial conditions still supportive, global growth is expected to tick up to a 3.9 percent rate in both 2018 and 2019. Advanced economies will grow faster than potential in 2018 and the next year; euro area economies are set to narrow excess capacity with support from accommodative monetary policy, and expansionary fiscal policy will drive the US economy above full employment. Aggregate growth in emerging market and developing economies is projected to firm further, with continued strong growth in emerging Asia and Europe and a modest upswing in commodity exporters after three years of weak performance.

Global growth is projected to soften beyond the next couple of years. Once their output gaps close, most advanced economies are poised to return to potential growth rates well below pre-crisis averages, held back by aging populations and lackluster productivity. US growth will slow below potential as the expansionary impact of recent fiscal policy changes goes into reverse. Growth is projected to remain subpar in several emerging market and developing economies, including in some commodity exporters that continue to face substantial fiscal consolidation needs.

Economic activity in 2017 ended on a high note growth in the second half of the year was above 4 percent, the strongest since the second half of 2010, supported by a recovery in investment. Outcomes exceeded the October 2017 World Economic Outlook forecasts in the euro area, Japan, the United States, and China, and continued to improve gradually in commodity exporters. Financial conditions remain supportive, despite the recent volatility in equity markets and increases in bond yields following signs of firming inflation in advanced economies. With broad-based momentum and expectations of a sizable fiscal expansion in the United States over this year and the next, global growth is now projected at 3.9 percent for 2018–19, a 0.2 percentage point upgrade for both years relative to the October 2017 forecast.

This positive momentum will eventually slow, however, leaving many countries with a challenging medium-term outlook. Some cyclical forces will wane: financial conditions are expected to tighten naturally with the closing of output gaps and monetary policy normalization; US tax reform will subtract momentum starting in 2020, and then more strongly as full investment expensing is phased out starting in 2023; and China's transition to lower growth is expected to resume as credit growth and fiscal stimulus diminish. At the same time, while the expected recovery in investment will help raise potential output, weak productivity trends and reduced labor force growth due to population aging constrain medium-term prospects in advanced economies. The outlook is mixed across emerging market and developing economies. Prospects remain favorable in emerging Asia and Europe, but are challenging in Latin America, the Middle East and sub-Saharan Africa, where despite some recovery the medium term outlook for commodity exporters remains generally subdued, with a need for further economic diversification and adjustment to lower commodity prices. More than one-quarter of emerging market and developing economies are projected to grow by less than advanced economies in per capita terms over the next five years, and hence fall further behind in terms of living standards.

Risks around the short-term outlook are broadly balanced, but risks beyond the next several quarters are clearly to the downside. On the upside, the growth spurt in advanced economies may turn out to be stronger and more durable than in the baseline, as slack in labor markets can be larger than currently assessed. Furthermore, the ongoing

recovery in investment could foster a rebound in productivity, implying higher potential growth going forward. In the United States, financial conditions could tighten faster than expected, triggered, for example, by an adjustment in market pricing of the future path of monetary policy, higher realized or expected wage and price inflation, and/or a sudden decompression of term premiums. Tighter financial conditions in the United States would have spillovers to other economies, including through a reduction in capital flows to emerging markets. Very expansionary fiscal policy in the United States, at a time when the current account deficit is already larger than justified by fundamentals, combined with persistent excess current account surpluses in other countries, is projected to widen global imbalances. Anxiety about technological change and globalization is on the rise and, when combined with wider trade imbalances, could foster a shift toward inward-looking policies, disrupting trade and investment. Recent import restrictions announced by the United States, announced retaliatory actions by China and potential retaliation by other countries raise concerns in this regard and threaten to damage global and domestic activity and sentiment. Similarly, changes in US tax policies are expected to exacerbate income polarization, which could affect the political climate for policy choices in the future. Climate change, geopolitical tensions, and cyber security breaches pose additional threats to the subdued medium-term global outlook.

Global Aluminium Industry

Introduction

Aluminium is one of the lightest metals in the world and as a result it is used widely in the production of multiple products. This metal has a shiny silver colour and it is malleable meaning it can be bend without breaking. In nature, aluminium is found in an ore called bauxite. Bauxite is the basic raw material in the aluminium manufacturing process. Bauxite is converted into alumina in alumina refineries.

According to the USGS report India ranks 4th in terms of primary aluminium production. China continued to be the single largest producer of aluminium, contributing 54% of the total world production. China is also one to the major consumers of aluminium.

Market Size

World aluminium production increased by 2.8 per cent to nearly 60 million tonnes in 2017, driven by modest growth in China. Chinese smelters boosted their production in anticipation of production cuts in the 2017-18 winter season.

Chinese refineries also ramped up their production (up 16 per cent) to meet increased demand. The rise in aluminium production lifted world alumina production by 9.1 per cent, to 125 million tonnes. In response to increased aluminium and alumina production, global bauxite producers also accelerated their production. Production rose strongly in Australia — the world’s largest bauxite producer. Australian production rose by 5.2 per cent in 2017, to 88 million tonnes. In Guinea, bauxite production increased by 34 per cent, to 40 million tonnes. These rises contributed to a 7.3 per cent increase in global bauxite production in 2017, to 292 million tonnes.

World Aluminium and Alumina Consumption

In 2017, world aluminium consumption grew by 2 per cent to 59 million tonnes, driven by strong consumption growth in the United States (up 9.6 per cent to 5.6 million tonnes), as the US economy has continued strengthening. Consumption in China- accounting for 54 per cent of world aluminium consumption — increased by 0.9 per cent to nearly 32 million tonnes (a record high). The automotive sector is one of the largest aluminium consumers in China, and vehicle sales in China grew by 3.6 per cent in 2017, to nearly 29 million units. This is not likely to persist, as it reflects efforts by Chinese consumers to buy vehicles before an increase in the vehicle sales tax, which commenced January 2018. Over this period, world alumina consumption increased by 1.7 per cent to 112 million tonnes, while global aluminium production rose by 2.8 per cent. Alumina consumption in China - the world's largest alumina consumer rose by 1.9 per cent to 61 million tonnes. This was in line with growth in aluminium production. Aluminium demand should continue to grow in the short to medium term World primary aluminium demand is projected to grow at an average annual growth rate of 2.0 per cent in the short to medium term, reaching 67 million tonnes in 2023. China's aluminium consumption has grown for 28 consecutive years, from just 861,000 tonnes in 1990 to nearly 32 million tonnes in 2017. This growth is expected to continue over the next five years (reaching 37 million tonnes in 2023), supported by strengthening residential and infrastructure construction. Outside of China, an acceleration in global economic activity is expected to come from the US, Eurozone, and emerging market and developing economies. India's aluminium consumption is projected to grow by 7 per cent per year, to 1.9 million tonnes in 2023, driven by infrastructure, power and transport initiatives.

Road Ahead

World alumina consumption is projected to grow at an average annual rate of 2.0 per cent in the short to medium term, reaching 125 million tonnes in 2023 in line with the average annual growth rate of aluminium production. This reflects a future of more strictly controlled capacity approvals in China's aluminium production, and the growth of recycled aluminium. China continues to be the largest alumina consumer in the world, accounting for 54 per cent of global alumina demand. As personal income rises in China, the demand for durable goods and aluminium is expected to grow significantly. The Middle East's alumina consumption is projected to reach 12 million tonnes in 2023, driven by growing aluminium production in Iran as well as the Gulf Cooperation Council — which comprises Bahrain, Oman, Saudi Arabia, Qatar and the UAE. India is also expected to contribute to growth in global alumina demand, increasing its usage from 5.2 million tonnes in 2018 to 6.9 million tonnes in 2023. However, this growth path is subject to risks, due to energy supply issues and the development of the country's stretched transport infrastructure.

Indian Aluminium Industry

Introduction

In the Indian market, primary aluminium production maintained robust growth momentum for the third consecutive year in a row. In FY17, production registered a growth of 17% as compared to 19% in FY16 and 18% in FY15

(Source: <https://www.equitymaster.com/research-it/sector-info/aluminium/Aluminium-Sector-Analysis-Report.asp>).

Indian aluminum demand will essentially come from the automotive, construction and packaging sectors. The long term growth prospects in the construction industry are driven by the country's sizable infrastructure deficit and the government's development plans, which encompass projects ranging from rail and power networks to smart-city infrastructure. Major aluminum producers in the country include state-owned NALCO and private sector units such as Hindalco Industries and Vedanta.

Opportunities

The Domestic Demand for aluminum in India is expected to benefit from the Infrastructure projects prioritized by the government. The government’s thrust on the power which sector is the dominant consumer of aluminum in India, augurs well for the aluminum industry.

(Source: <https://www.equitymaster.com/research-it/sector-info/aluminium/Aluminium-Sector-Analysis-Report.asp>)

Challenges and Headwinds

The increasing demand and fast pace growth poses aluminium players with a number of challenges:

- **Increasing Costs:** The external environment is volatile. Market prices keep fluctuating. In such a scenario cost optimisation techniques help you identify scope for reducing costs and bring about stability in operating profitability.
- **Meeting government compliances:** The policy and regulatory framework on the Indian Aluminium Industry entails a number of statutory compliance requirements.

(Source: <http://www.nanabhoyms.com/pdfs/research/Indian-Aluminium-Industry.pdf>)

Road Ahead

India is amongst the lowest cost producers of aluminium across the world, owing to easy availability of raw materials and comparatively labour costs. The growing demand for aluminium in the last decade, driven by India’s underlying growth story has resulted into expansion of smelting capacities of the major domestic players. With the addition of new aluminium capacities India aims at not only satisfying the domestic demand, but also play a major role in the global aluminium market. Production is expected to grow to cater to the domestic demand rise due to various initiatives taken up by the government and the surplus stock will continue to be exported.

India's aluminium production is to be stable at 3,426 KT (Kilotonnes) during FY19 as all the domestic smelters are now operating at full capacity. Aluminium production during FY18 was 3,392 KT.

- We can expect further capacity ramp-ups of aluminium smelters only when the coal availability and coal pricing becomes more stable.
- Aluminium demand is to grow around 5% to 2,200 KT during FY19. Consumption during FY18 was 2,088 KT.
- Aluminium to continue replacing copper demand from the electrical and the consumer durable segment.

Aluminium has been continuously finding new applications due to rising price competition since it is cheaper than copper, due to its superior weight to strength ratio, corrosion resistance, formability, dampness etc. Reforms proposed by the Government of India like the Make in India Campaign, Smart Cities, Rural Electrification and a focus on building renewable energy projects under the National Electricity Policy have augmented the usage of the metal during FY18. Buoyant demand and market recovery across businesses in India is to further increase the demand for aluminium.

Indian Textile Industry

Introduction

India's textiles sector is one of the oldest industries in Indian economy dating back several centuries. India's overall textile exports during FY 2017-18 stood at US\$ 39.2 billion.

The Indian textiles industry is extremely varied, with the hand-spun and hand-woven textiles sectors at one end of the spectrum, while the capital intensive sophisticated mills sector at the other end of the spectrum. The decentralized power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of the textile industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles make the Indian textiles sector unique in comparison to the industries of other countries. The Indian textile industry has the capacity to produce a wide variety of products suitable to different market segments, both within India and across the world.

Market Size

The Indian textiles industry, currently estimated at around US\$ 150 billion, is expected to reach US\$ 250 billion by 2019. India's textiles industry contributed seven per cent of the industry output (in value terms) of India in 2017-18. It contributed two per cent to the GDP of India and employs more than 45 million people in 2017-18. The sector contributed 15 per cent to the export earnings of India in 2017-18.

The production of raw cotton in India is estimated to have reached 34.9 million bales in FY18.

Investment

The textiles sector has witnessed a spurt in investment during the last five years. The industry (including dyed and printed) attracted Foreign Direct Investment (FDI) worth US\$ 2.97 billion during April 2000 to June 2018.

Some of the major investments in the Indian textiles industry are as follows:

- The Cabinet Committee on Economic Affairs (CCEA), Government of India has approved a new skill development scheme named 'Scheme for Capacity Building in Textile Sector (SCBTS)' with an outlay of Rs 1,300 crore (US\$ 202.9 million) from 2017-18 to 2019-20.
- In May 2018, textiles sector recorded investments worth Rs 27,000 crore (US\$ 4.19 billion) since June 2017.

Government Initiatives

The Indian government has come up with a number of export promotion policies for the textiles sector. It has also allowed 100 per cent FDI in the Indian textiles sector under the automatic route.

Initiatives taken by Government of India are:

- The Textile Ministry of India earmarked Rs 690 crore (US\$ 106.58 million) for setting up 21 readymade garment manufacturing units in seven states for development and modernisation of Indian Textile Sector.
- The Directorate General of Foreign Trade (DGFT) has revised rates for incentives under the Merchandise Exports from India Scheme (MEIS) for two subsectors of Textiles Industry - Readymade garments and Made ups - from 2 per cent to 4 per cent.
- As of August 2018, the Government of India has increased the basic custom duty to 20 per cent from 10 per cent on 501 textile products, to boost Make in India and indigenous production.
- The Government of India announced a Special Package to boost exports by US\$ 31 billion, create one crore job opportunity and attract investments worth Rs 80,000 crore (US\$ 11.93 billion) during 2018-2020. As of August 2018 it generated additional investments worth Rs 25,345 crore (US\$ 3.78 billion) and exports worth Rs 57.28 billion (US\$ 854.42 million).
- The Government of India has taken several measures including Amended Technology Up-gradation Fund Scheme (A-TUFS), scheme is estimated to create employment for 35 lakh people and enable investments worth Rs 95,000 crore (US\$ 14.17 billion) by 2022.

Road Ahead

The future for the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. High economic growth has resulted in higher disposable income. This has led to rise in demand for products creating a huge domestic market.

Key Process - Trading vertical business process

The trading business vertical of the company is a B2B model and operates primarily on an agency basis wherein the goods are procured from suppliers on cash or least credit basis and supplied to customers on credit basis. The procurement of goods is carried out on an “order” basis as well as “demand estimation basis”. In the order basis business our inventory levels are low as the goods are supplied directly from supplier to our customer in most such cases. But in the demand estimation basis we procure goods in bulk from suppliers and stock the same at our godowns until sale is made. This allows us higher margins at the time of sale but increases our inventory holding costs.

Competition

Competition is faced by our business from other existing traders and manufacturers of aluminium products, fabrics, dealt by us. We engage with our competitors on a regional or product line basis. Many of our competitors have substantially large capital base and resources than we do and offer broader range products. We believe that the principal factors affecting competition in our business include client relationships, reputation, the abilities of employees, market focus and the relative quality and price of the services and products.

Marketing and Marketing Set-Up

Top management and key executives of our company enjoy the confidence of specific corporate and retail clients and currently our market is only focused to a selected setup of clients. To get the feedback on the quality of products and services and to improve the same as well, we interact with our customers.

The Department of Industrial Policy and Promotion (“**DIPP**”), Ministry of Commerce and Industry has issued the Consolidated FDI Policy which consolidates the policy framework on Foreign Direct Investment (“**FDI Policy**”), with effect from August 28, 2017. All the press notes, press releases, clarifications on FDI issued by DIPP till August 27, 2017 stand rescinded as on August 28, 2017.

In terms of the FDI Policy, foreign investment is permitted (except in the prohibited sectors) in Indian companies either through the automatic route or the Government route, depending upon the sector in which foreign investment is sought to be made. In terms of the FDI Policy, the work of granting government approval for foreign investment under the FDI Policy and FEMA Regulations has now been entrusted to the concerned Administrative Ministries/Departments.

FDI for the items or activities that cannot be brought in under the automatic route may be brought in through the approval route. Where FDI is allowed on an automatic basis without the approval of the Government, the RBI would continue to be the primary agency for the purposes of monitoring and regulating foreign investment. In cases where Government approval is obtained, no approval of the RBI is required except with respect to fixing the issuance price, although a declaration in the prescribed form, detailing the foreign investment, must be filed with the RBI once the foreign investment is made in the Indian company.

The RBI, in exercise of its power under the FEMA, has also notified the Foreign Exchange Management (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017 to prohibit, restrict or regulate, transfer by or issue of security to a person resident outside India.

The Company is engaged in the activity of wholesale trading and multi-brand retail trading. The FDI Policy issued by the DIPP permits foreign investment up to 100% in the Cash and Carry Wholesale Trading/ Wholesale Trading (“**WT**”) sector under the automatic route. Further, the FDI Policy permits foreign investment upto 51% in the multi-

brand retail sector under the government route subject to certain conditions which are mentioned below.

Cash and Carry Wholesale Trading/ Wholesale Trading

Cash & Carry Wholesale trading/Wholesale trading, would mean sale of goods/merchandise to retailers, industrial, commercial, institutional or other professional business users or to other wholesalers and related subordinated service providers. Wholesale trading would, accordingly, imply sales for the purpose of trade, business and profession, as opposed to sales for the purpose of personal consumption. The yardstick to determine whether the sale is wholesale or not would be the type of customers to whom the sale is made and not the size and volume of sales. Wholesale trading would include resale, processing and thereafter sale, bulk imports with ex-port/ex bonded warehouse business sales and B2B e-Commerce.

Further, Cash & Carry Wholesale Trading/Wholesale Trading (“WT”) is subject to the following conditions:

- a. For undertaking WT, requisite licenses/registration/ permits, as specified under the relevant Acts/Regulations/Rules/Orders of the State Government/Government Body/Government Authority/Local Self Government Body under that State Government should be obtained.
- b. Except in case of sales to Government, sales made by the wholesaler would be considered as ‘cash & carry wholesale trading/wholesale trading’ with valid business customers, only when WT are made to the following entities:
 - i. Entities holding sales tax/ VAT registration/service tax/excise duty registration; or
 - ii. Entities holding trade licenses i.e. a license/registration certificate/membership certificate/registration under Shops and Establishment Act, issued by a Government Authority/Government Body/Local Self-Government Authority, reflecting that the entity/person holding the license/ registration certificate/ membership certificate, as the case may be, is itself/ himself/herself engaged in a business involving commercial activity; or
 - iii. Entities holding permits/license etc. for undertaking retail trade (like teh bazari and similar license for hawkers) from Government Authorities/Local Self Government Bodies; or
 - iv. Institutions having certificate of incorporation or registration as a society or registration as public trust for their self-consumption.

An entity, to whom WT is made, may fulfill any one of the 4 (four) conditions stated above.

- c. Full records indicating all the details of such sales like name of entity, kind of entity, registration/license/permit etc. number, amount of sale etc. should be maintained on a day to day basis.
- d. WT of goods would be permitted among companies of the same group. However, such WT to group companies taken together should not exceed 25% of the total turnover of the wholesale venture.
- e. WT can be undertaken as per normal business practice, including extending credit facilities subject to applicable regulations.
- f. A wholesale/cash & carry trader can undertake retail trading, subject to the conditions applicable. An entity undertaking wholesale/cash and carry as well as retail business will be mandated to maintain separate books of accounts for these two arms of the business and duly audited by the statutory auditors. Conditions of the FDI Policy for wholesale/cash and carry business and for retail business have to be separately complied with by the respective business arms.

Multi-brand retail trading

FDI in multi brand retail trading, in all products, is permitted, subject to the following conditions:

- (i) Fresh agricultural produce, including fruits, vegetables, flowers, grains, pulses, fresh poultry, fishery and meat products, may be unbranded.

- (ii) Minimum amount to be brought in, as FDI, by the foreign investor, would be US \$ 100 million.
- (iii) At least 50% of total FDI brought in the first tranche of US \$ 100 million, shall be invested in 'back-end infrastructure' within three years, where 'back-end infrastructure' will include capital expenditure on all activities, excluding that on front end units; for instance, back-end infrastructure will include investment made towards processing, manufacturing, distribution, design improvement, quality control, packaging, logistics, storage, ware-house, agriculture market produce infrastructure etc. Expenditure on land cost and rentals, if any, will not be counted for purposes of backend infrastructure. Subsequent investment in backend infrastructure would be made by the MBRT retailer as needed, depending upon its business requirements.
- (iv) At least 30% of the value of procurement of manufactured/processed products purchased shall be sourced from Indian micro, small and medium industries, which have a total investment in plant & machinery not exceeding US \$ 2.00 million. This valuation refers to the value at the time of installation, without providing for depreciation. The 'small industry' status would be reckoned only at the time of first engagement with the retailer, and such industry shall continue to qualify as a 'small industry' for this purpose, even if it outgrows the said investment of US \$ 2.00 million during the course of its relationship with the said retailer. Sourcing from agricultural co-operatives and farmers co-operatives would also be considered in this category. The procurement requirement would have to be met, in the first instance, as an average of five years' total value of the manufactured/processed products purchased, beginning 1st April of the year during which the first tranche of FDI is received. Thereafter, it would have to be met on an annual basis.
- (v) Self-certification by the Company, to ensure compliance of the conditions at serial nos. (ii), (iii) and (iv) above, which could be cross-checked, as and when required. The investors are required to maintain accounts, duly certified by statutory auditors.
- (vi) Retail sales outlets may be set up only in cities with a population of more than 10 lakh as per 2011 Census or any other cities as per the decision of the respective State Governments, and may also cover an area of 10 kms around the municipal/urban agglomeration limits of such cities; retail locations will be restricted to conforming areas as per the Master/Zonal Plans of the concerned cities and provision will be made for requisite facilities such as transport connectivity and parking.
- (vii) Government will have the first right to procurement of agricultural products.
- (viii) The above policy is an enabling policy only and the State Governments/Union Territories are permitted to take their own decisions in regard to implementation of the policy. The establishment of the retail sales outlets will be in compliance of applicable State/Union Territory laws/ regulations, such as the Shops and Establishments Act etc.
- (ix) Retail trading, in any form, by means of e-commerce, is not be permissible, for companies with FDI, engaged in the activity of multi-brand retail trading.

The certificate of incorporation was issued on June 21, 2018 by the Registrar of Companies, Delhi. Further, pursuant to Business Takeover Agreement dated September 15, 2018, the Company acquired the business of M/s. J.P Metals, a proprietorship concern of one of the Promoter Mr. Anil Kumar Gupta.

2. Significant Accounting Policies

a. Basis of preparation

The financial statements of the Company have been prepared in accordance with generally accepted accounting principles in India (Indian GAAP). The Company has prepared these financial statements to comply in all material respects with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules 2014. The financial statements have been prepared on an accrual basis and under the historical cost convention.

b. Use of estimates

The preparation of financial statements requires estimates and assumptions to be made that affect the reported amount of assets and liabilities on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Difference between the actual results and estimates are recognized in the period in which the results are known/ materialized.

c. Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature reported amounts of assets and liabilities on the date of financial statements and the reported amounts of revenues and expenses during the reported period.

d. Cash and cash equivalents

Cash comprises cash on hand and demand deposit with banks. Cash equivalents are short term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into loan amounts of cash and which are subject to insignificant risk of changes in values.

e. Property, Plant & Equipment

Property, plant & equipment are stated at cost of acquisition or construction (net of GST) less accumulated depreciation and impairment losses. The cost of assets comprises of its purchase price and any directly attributable cost of bringing the assets to their location and working condition upto the date of its intended use.

f. Depreciation and Amortization

Depreciation on property, plant & equipment is provided on pro-rata basis for the period of use, on Straight Line Method at the rates determined based on useful lives of respective assets as prescribed in the Schedule II of the Companies Act, 2013.

g. Impairment

The carrying amounts of property, plant & equipment are reviewed at each balance sheet date to determine, if there is any indication of impairment based on external/internal factors. An impairment loss is recognized wherever the carrying amount of the property, plant & equipment exceeds its recoverable amount which represents greater of the “net selling price” and “value in use” of the respective assets. The impairment loss recognized in prior accounting period is reversed if there has been an improvement in recoverable amount.

h. Revenue Recognition

i. Sale of goods:

Revenue is recognized to the extent it is probable that the economic benefits will flow to the company and that the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognized:

Revenue from sale of goods is recognized when all the significant risks and rewards of ownership of the goods have been passed to the buyer. The company collects GST on behalf of the government and, therefore, these are not economic benefits flowing to the company. Hence, they are excluded from revenue.

Claims / Refunds not ascertainable with reasonable certainty are accounted for, on final settlement and are recognized as revenue on certainty of receipt on prudent basis.

ii. Rendering of services:

Revenue from sale of services are recognized when the services are rendered.

iii. Other Income

Dividend income on investments is recognized when the right to receive dividend is established. Interest income is recognized on a time proportionate basis taking into account the amounts invested and the rate of interest.

i. Inventories

Inventories of traded goods are valued at cost or net realizable value whichever is lower. Net realizable value is the estimated selling price in the ordinary course less the estimated cost of completion and the estimated costs necessary to make the sale.

j. Taxes

Tax expense comprises of current and deferred tax. Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the IncomeTaxAct,1961.

Deferred income tax reflects the impact of current year timing differences between taxable income and accounting income for the year and reversal of timing differences of earlier years.

Minimum alternate tax (MAT) paid in a year is charged to the statement of profit and loss as current tax. The company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the company will pay normal income tax during the specified period, i. e. the period for which MAT credit is allowed to be carried forward. In the year in which the company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of MAT under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

k. Earnings Per Share:

Basic Earnings Per Share (EPS) is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year. Diluted EPS is computed by dividing the net profit or loss for the year attributable to Equity Shareholders by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all dilutive potential equity shares, except where the result are anti-dilutive.

l. Employee Benefits

All employees' benefits due wholly within a year of rendering services are classified as short term benefits. These benefits like salaries, wages, short term compensation absences, expected cost of bonus, ex-gratia are recognized as expenses on accrual basis of undiscounted amounts in the Profit and Loss Account.

In case of a mutual fund, a separate Application can be made in respect of each scheme of the mutual fund registered with SEBI and such Applications in respect of more than one scheme of the mutual fund will not be treated as multiple Applications provided that the Applications clearly indicate the scheme concerned for which the Application has been made.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are FIPB and the RBI.

The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), issued consolidated FDI Policy, which with effect from June 07, 2016 consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on June 7, 2016. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore, the Consolidation FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares by an Indian resident to a Non-Resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI (Substantial Acquisition of Shares and Takeovers) Regulations, 2011; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Issue.
