ENVIRONMENTAL BENEFITS OF PAPER BAGS

BIO-DEGRADABLE

First, paper bag waste is not going to linger on the surface of the earth for the next 1000 years, unlike plastic bags. Humans for next 1000 to 10,000 years possible don't end up losing all marine animals on the sea, rivers, lakes & ponds with plastic pollution or they may not end up losing most land's fertility due to plastic mixture in topsoil - if world shifts from plastic to biodegradable paper packaging. In fact, most paper bag waste takes less than 6 months time to degrade and in most cases, they end up turning fertile waste for vegetation.

RECYCLABLE

Paper bags are commonly 100% recyclable. Unlike plastic that emits extremely toxic and poisonous gases in the atmosphere during the recycling process. The paper recycling process involves no such hazard - The top reason for using paper bags. Paper bags can be reused and generates no pollution. This is the point why both as a business owner as well as customer they should promote the use of the same.

PAPER IS ENERGY SAVER

Besides several benefits of using paper bags, one of the reason why it is so environmentally-friendly is that it helps in saving huge amount of energy. It is usually made from locally available materials, which interms of supports in transportation costs, eventually helps in saving energy.

CONSERVING NATURAL RESOURCES

The big environmental convenience of using paper bags is that they are extracted from unbleached, recycled brown kraft paper, a superb solution to save natural resources, energy and reduce green house gas emissions. In conclusion, it will be said that there is now no doubt that one needs to adopt more eco-friendly alternatives to save the planet. One great way to do such is by forging the use of paper bags. Thus, it is high time that one switch over towards the use of eco-friendly paper bags.
