

# AAYURITZ

*Pure Ayurveda, Pure Healing*

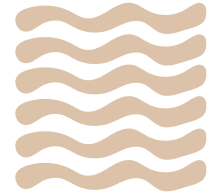

## Company Overview

Aayuritz is an **Ayurvedic & Nutraceutical** solution that makes a difference to the lives it touches. We are deeply committed to tradition and led by domain experts. With a wide range of **300+ products** & third-party **manufacturing solutions**, we have taken care of the global needs as well for more than a decade.

Every product is created to bridge the gap between the evolving **global needs** and **'trustworthy'** product supply. We bring together natural wisdom, formulation expertise, and a disciplined approach to formulate products that customers trust and brands value.

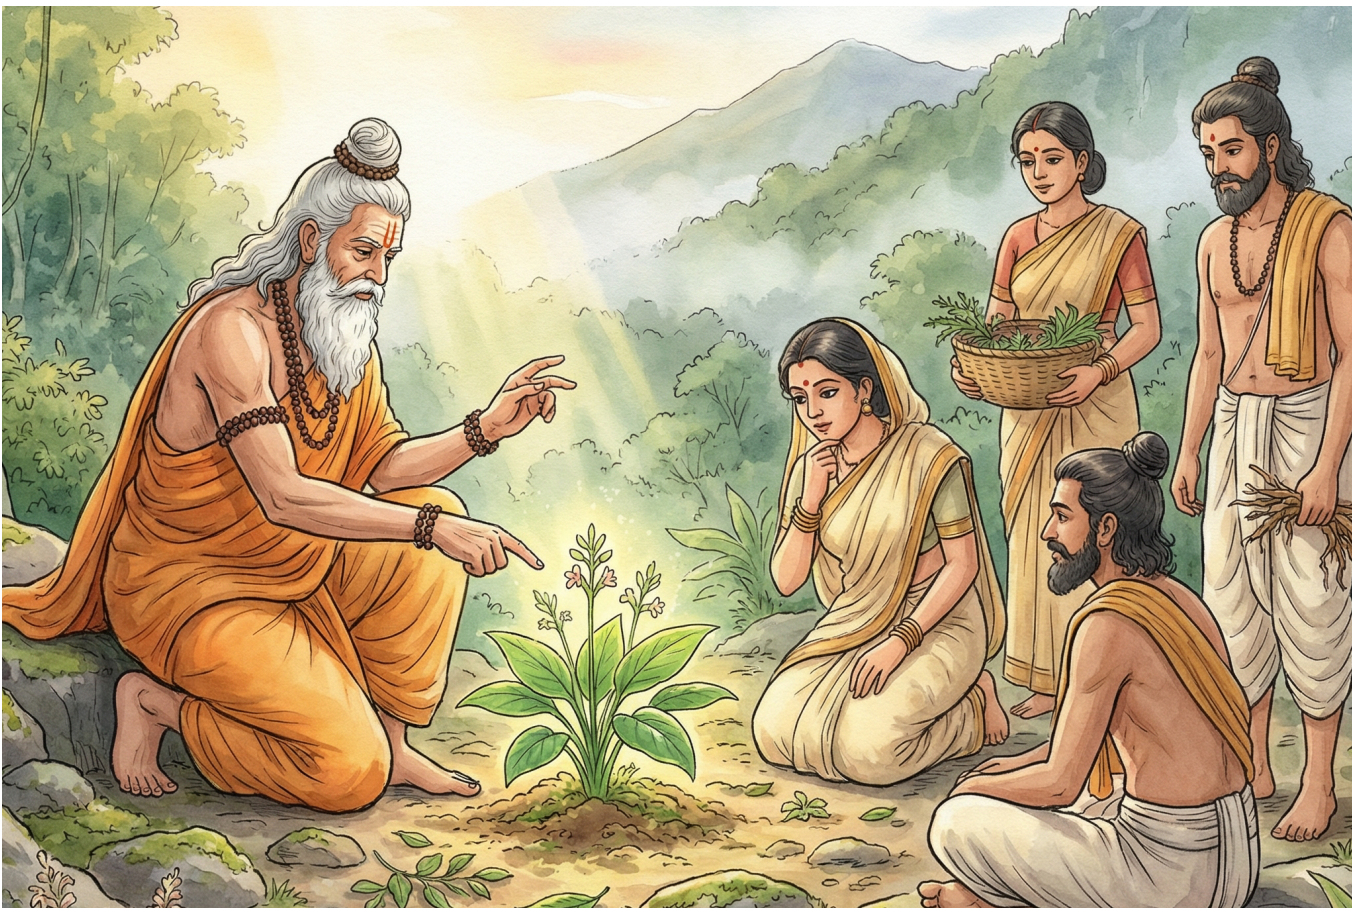

# Our *Inspiration*

Aayuritz began to connect the two worlds, **Ayurveda and Agriculture**.

Our founder has a deep respect for Ayurveda and was raised in a family of farmers. The company was started to connect natural wisdom with quality formulations and ensure fair compensation to the farmers. We believe that nature has the power to heal.

We take the strength of nature to the world through thoughtful **Ayurvedic and Nutraceutical** products. For us, this is way more than just a manufacturing process. It is about sticking to tradition, trust, and creating wellness with purpose.

The background features a dark green color with a faint, white line-art illustration. On the left, a person is seated at a table, working with various jars and bowls, likely preparing Ayurvedic remedies. On the right, a man with a long, flowing beard and hair is shown in profile, looking down thoughtfully. The overall aesthetic is traditional and natural.

# *Our* Vision

To create a world where nature-led wellness creates lasting value for people, communities, and the planet.

---

# *Our* Mission

To develop trusted Ayurvedic and nutraceutical solutions by connecting natural sourcing, formulation expertise, and responsible manufacturing

# Categories *we operate in*
