Company Profile

Technoweigh is a certified electronic scale & weighbridge (Truck scale) manufacturing company. We are involved in manufacturing, development and Servicing of weighing machines, which has varied application in agricultural & farming, construction, Chemical plants, Mining, Ceramic Industries, Paper mills and many more. We are working on development and implementation of new technologies in Weighing Solutions for nurturing and development of various Industries.

Benefits

- Suitable for industrial applications
- Construction of civil foundation is cheaper
- No water logging during rainy season
- Pit maintenance is eliminated
- Wide range of capacities & platform sizes
- Compact and user friendly functionality

Pit less Weighbridge

This type of Weighbridge / Truck scale is most suitable where the excavation work for foundation is difficult or construction of pit is expensive. Since the structure is above ground level, vehicles can approach the weighbridge only from two directions where the ramps are provided. This type of weighbridge requires more space.
