# ***Our Product's***

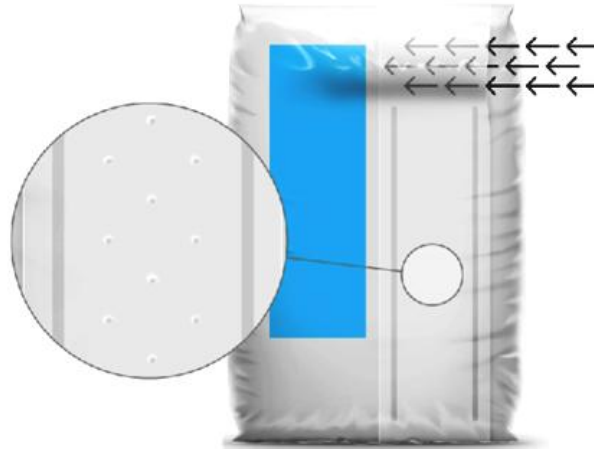

***PP  
Woven  
Sacks &  
Bag's***

***BOPP  
Bag's***

***FIBC  
Bag's***

## **Perforated Bag's**

Perforated bags are generally used for packing of cement or storage of any other material which are hot while Packing. The perforations (small holes) of the bag will help the hot air to go out while packing.

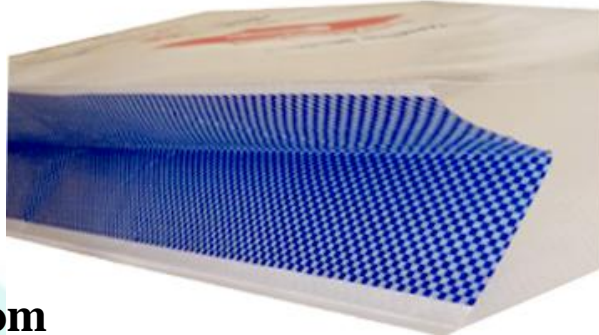

# Valve Bag's

Valve Bags are used for packing of **Cement, Fertilizers, Chemicals** and other similar products. The bags are available in various dimensions and can be used in multiple industrial and commercial usage. Material can directly be filled by a hose and once the material has been filled to the brim the valve shuts automatically providing a locking system

# Gusseted Bag's

The sides that fold in represent a **Gusseted**. One of the main applications for gussets is their ability to add dimension to objects with height or width. Gusset bags hold significant quantities of material whether in **Granular, Powder, or other forms**.

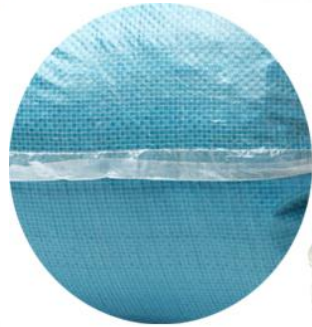

# Sand Bag's

Our range of sand bags are available **with/without strap** as per requirement of our client. These Bag's generally non-laminated PP bags are filled with sand and then the **STRAP** is tied to close the bag. We provide these bags with an inner or outer lining to give them leak proof which allows them to be filled with required amount of the weight

# Unlaminated / Laminated Woven Bags And Sacks

**Laminated/Unlaminated PP/HDPE Woven Bags & Sacks** are **water resistant** bags and sacks which are light, but strong enough to handle strains. bags and sacks offer extra protection to materials like **chemicals, sugar, fertilizers** etc. In addition, these bags also provide protection from external elements and also retain product quality to **enhance storage life**.

# PP Woven Bags & Sacks With / Without Liner

PP Woven Bags & Sacks **with / without Liner** used for packaging of products like the **chemicals, fertilizers, sugar, food grains** etc. These bags with liners are used when the particle size of the product to be packed is very fine making it possible for it to ooze out of the woven bag hence an additional liner ensures its proper packing without any leakage of material.

# ***BOPP Bag's***

We export and supply **BOPP** laminated PP woven bags and sacks with superior quality graphics used. These are suitable for packing of **Pet food, Animal feeds, Minerals, Chemicals, and Salt**. It is also best for packaging of 10 to 50 kg material.

# *Technical Specifications*

<b>Material</b>	Polypropylene (PP)
