Piercing Punches

Design & Engineering

We have understood that nowadays, product differentiation is the key to outstanding packaging. Therefore, we offer a complete confidential innovative design service with functionality to address any demand in modeling, assembling, and production. Our innovative tools designs have resulted in very competitive tooling costs, processing-friendly products without compromising on quality and quick delivery times.

With the combination of our experience and customer input regarding specific requirement and challenges, the concepts are given shapes and design. This way we get an opportunity to work closely with clients. Pro E Modeling and manufacturing bundle. Visi, Unigraphics and Solid Works are outsourced.

"CNC Machine has the accuracy to machine tight and repetitive dimensions if they are programmed appropriately."

- CNC Spark Erosion with D.R.O.
- Fully - automatic Cylindrical Grinders
- CNC Lathes
- Vertical Milling Machines with D.R.O.
- Lathes
- Spark Erosion
- Cutting Machine
- Shaper
- Surface Grinders
- Vertical Drillers

Industrial Plastic Pet Injection Mould

We are a well known manufacture and supplier of Industrial Plastic injection Moulds that finds its application in moulding purposes. These industrial plastic injection mould tools are used in several industries all around the world. Vishwakarma Tools also manufactures and supplies customized moulds that are designed keeping clients specification in place.

Pet Injection Mould Spare Parts

The company is committed to offers world class Pet Injection Mould Sapre Parts to its clients located at various parts of the world. The material used to manufacture is of the finest quality and procured from genuine vendors in the market. The mould die tools manufactured by us are used for molding purposes in many industries all around the world.
