OUR DIVISION

- NANO TECHNOLOGY
- ORGANIC CROP PROTECTION
- SPECIALITY IN BIO STIMULANTS
- SPECIALITY IN CROP NUTRITION
- BIO AGRO CHEMICALS & PESTICIDES
- MICROBIAL EXTRACTION TECHNOLOGY
- BOTANICAL EXTRACTION TECHNOLOGY

OUR VISION

Our vision is to help create a sustainable agriculture system that meets the needs of present and future generations without degrading human health and the environment.

OUR MISSION

We believe in offering our customers efficient solutions for their unique requirements and consistently strive to provide customized, innovative, and quality products like Bio Pesticides, Micro Nutrient, Liquid Fertilizers, Flowering Growth Stimulants, NPK Fertilizers etc., to our worldwide clients.

Bio Stimulants

GLORY

FLOWERING AND GROWTH
STIMULANT

DOSAGE: 2 ml / 15 Litre

NANO FERTILE

GROWTH AND YIELD
ENHANCER

DOSAGE: 2 ml / 150 Litre

NANO BLASTER

GREENARY AND GROWTH
PROMOTERS

DOSAGE: 5 ml / 15 Litre

ANMOL

GROWTH AND FRUIT SIZE
ENHANCER

DOSAGE: 0.3 ml / Litre

SUPER KING

BETTER FLOWERING
AND FRUITING

DOSAGE: 10 ml / 150 Litre

SMILEY

INCREASE FLOWERING
AND GROWTH

DOSAGE: 1 gm / 150 Litre

LOVELY

BETTER
FLOWERING

DOSAGE: 1 gm / 150 Litre

V-GROWTH

IMPROVED NUTRIENT
EFFICIENCY AND YIELD

DOSAGE: 10 gm / 15 Litre

ROOT SHIELD

ENHANCED ROOT
DEVELOPMENT

DOSAGE: 1 tab / 15 Litre

Enhanced Plant Growth: It can stimulate root development and improve nutrient uptake, leading to overall enhanced plant growth and vigor

Stress Tolerance: Improved stress tolerance in plants, helping them cope with adverse environmental conditions such as heat, or disease.

Better Flowering and Fruiting: It enhance flowering and fruiting processes, leading to better fruit set and increased crop productivity.

Improved Nutrient Efficiency: It can enhance the cation exchange capacity of the soil, making nutrients more available to plants.

Root Development: Promotes stronger and healthier root systems, enabling plants to access water and nutrients more efficiently.

Improved Soil Structure: It contribute to better soil structure by increasing soil aggregation and reducing soil compaction.

Increased Yield: By promoting better nutrient absorption and utilization, it increases crop yield and quality

Nano Technology Micro Nutrients Liquid & Powder

NANO MIX

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO ZN

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO CU

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO CA

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO FE

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO MG

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

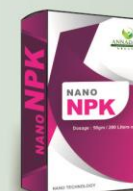

NANO MN

DOSAGE: 5 gm / 15 Litre
DOSAGE: 10 ml / 100 Litre

NANO B

DOSAGE: 5 gm / 15 Litre

NANO NPK

DOSAGE: 5 gm / 15 Litre

- Based On Nano Technology.
- Met Concentrated Micro Nutrients With Advance Formulation.
- It Quickly Recover Micro Nutrients Deficiency.
- Excellence Performance In Very Small Dosage.
- It is 100% water soluble as well ideal for foliar spray.

Micro Nutrients Liquid Fertilizer

CALONIUM

N 10%, Ca 15% & Mg 2% increases drought and disease resistance. Improves chlorophyll production. Enhances cell wall health. Improves leaf colour, fruit quality and shelf-life. Prevents fruit cracking & promotes healthy fruit development. The increased leaf, flower and fruit calcium allows for less risk of physical damage as well as greater resilience to physiological breakdown. The organic components lead to improved soil structure, enhanced nutrient retention, microbial activity promotion, increased soil fertility.

DOSAGE: FOLIAR SPRAY: 2 - 3 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

BORONIL

Liquid boron 10% is a solution of fully water soluble fertilizer containing nitrogen and boron. Boron deficiency in crop plants is the second most widespread micro nutrient deficiency problem after zinc. It helps in cell wall formation. It helps in flower/pollen formation. It is also required for effective nitrogen (N), phosphorus (P) and potassium (K) fixation. It is essential for flowering and fruit setting. It is essential for increasing crop yield. It helps in calcium absorption. It enhances fruit quality and size. It helps control the transport of sugars in plants.

DOSAGE: FOLIAR SPRAY: 2 - 3 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

CALMAX-B

It is a pure and highly concentrated water soluble liquid Calcium 11% and Boron 2% fertilizer. It improves the strength of cell walls and cell division. Boron provides solution to problems caused due to boron deficiency like light general chlorosis, a death of growing plant, deformed leaves with areas of discoloration etc. It will give an excellent growth in all the stages of crop namely seedling stage, vegetative stage, reproductive stage and ripening stage. The nutrients are textured and cohesively balanced. Hence, this will give better result and excellent yield in all crops like fruits, vegetables, flowers, field crops, foliage crops etc. Reduces plant stress. Prevents fruit-rot and cracking. Improves fruit quality, stunted growth and shelf-life.

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

ZINOXIL

Zinc Oxides 39.5% helps to form the enzyme system which regulates the plant life. Requires very low dosage with better zinc nutrition. Nano particles support rapid absorption. Promotes nitrogen metabolism and produces protein and starch. Boosts chloroplast & enzyme production.

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

CALBON

Fulfills requirement of calcium and boron during fruit development. Prevents cracking and rotting of fruits. Improves shelf life of fruits and quality. Increase in crunchiness of fruit.

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

Organic Pesticides

LAXUS

FOR ALL LARVA
DOSAGE: 1.5-2 ml/Litre

TRISHUL

THRIPS MITES SPECIAL
DOSAGE: 1.5-2 ml/Litre

SARANG

FOR ALL SUCKING PEST
DOSAGE: 1.5-2 ml/Litre

VAAYU

VIRUS SPECIAL
DOSAGE: 1.5-2 ml/Litre

FLAME

FUNGUS SPECIAL
DOSAGE: 1.5-2 ml/Litre

VIKRANT

BLACK THRIPS SPECIAL
DOSAGE: 1.5-2 ml/Litre

BRAHMASTRA

REPLACEMENT OF DDVP
DOSAGE: 1.5-2 ml/Litre

WEAPON

WHITE FLY SPECIAL
DOSAGE: 1.5-2 ml/Litre

REVILE

NEMATODE SPECIAL
DOSAGE: 1.5-2 ml/Litre

1. To control sucking pests like Aphid, Jassid, White Fly, Thrips, Red & Black Mites, Plant Bugs, Stink Bugs, Scale Insects, Psylla, Mealybug etc.
2. To control larva like Armyworms, Bollworms, Pink Bollworms, Tobacco Budworms, Heliothis, Spodoptera, Shoot Borer, Fruit Borer, Leafminer, Leaf Hoppers, Diamondblack Moth.
3. To Control Diseases VIRUS AND FUNGUS like Powdery Mildew & Downey Mildew, Rust, Leaf Spot, Anthracnose, Root Rot, Curling etc..
4. Compatible with most of all pesticides, fungicides, PGR.

Bio Pesticides

NANO BORER

BORER LARVA SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO BLITZ

BRINJAL LARVA SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO LASER

SURFACE LARVA SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO TRACER

THRIPS MITES SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO SHOOTER

FOR ALL SUCKING PEST
DOSAGE: 0.3 - 1 ml / Litre

NANO WIPER

WHITE FLY SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO FIXER

FUNGUS SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO VICTOR

VIRUS SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO MILLER

MEALYBUG SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

NANO REVILE

NEMATODE SPECIAL
DOSAGE: 0.3 - 1 ml / Litre

1. To control sucking pests like Aphid, Jassid, White Fly, Thrips, Red & Black Mites, Plant Bugs, Stink Bugs, Scale Insects, Psylla, Mealybug etc.

2. To control larva like Armyworms, Bollworms, Pink Bollworms, Tobacco Budworms, Heliothis, Spodoptera, Shoot Borer, Fruit Borer, Leafminer, Leaf Hoppers, Diamondblack Moth.

3. To Control Diseases VIRUS AND FUNGUS like Powdery Mildew & Downey Mildew, Rust, Leaf Spot, Anthracnose, Root Rot, Curling etc..

4. Compatible with most of all pesticides, fungicides, PGR

BOXER

BPH SPECIAL
DOSAGE: 50 - 100 gm / Acre

NANO PROTEX

FUNGUS VIRUS SPECIAL
DOSAGE: 1-2 ml / Litre

FIBER -50

FUNGUS VIRUS
BACTERIAL DISEASE
DOSAGE: 50 gm / Acre

Fertilizer & Crop Nutrients

DIVYAM

Groundbreaking Heavy Metal And Residue-free Liquid Fertilizer Enriched With Revolutionary Microbial Extraction Technology. Carefully Balanced With Nitrogen, Phosphate, Potash, Calcium, And Essential Micronutrients, This Unique Blend Perfectly Caters To Plant's Growth And Development Needs During Flowering And Fruiting. ITS Ensures Vigorous And Healthy Plant Growth By Providing The Ideal Nutrients.

DOSAGE : DRIP IRRIGATION: 1 – 5 ltr / Acre

ACCELERATOR

The Product Gets Easily Absorbed By The Plants And Translocated Uniformly Throughout The Plant System. Then It Stimulates The Enzymatic Activities Responsible For Metabolic Pathways, Nutrient Metabolism & defense Pathways. Helps For Complete And Superior Crop Development. Improves Productive Tillers And Branches. Increases Yield Quality To Optimum Level. Promotes Chlorophyll And Photosynthesis Activity. Increases Nodes And Internodes.

DOSAGE: FOLIAR SPRAY: 2 – 3 gm / Litre, DRIP IRRIGATION: 500 gm / Acre

ORGAMINO

Produces productive branches and reduces nodular distance so as to obtain maximum yield. Maintains optimum growth and canopy. Provides nourishment for healthier crop growth.

DOSAGE: FOLIAR SPRAY: 1.5 – 2 ml / Liter, DRIP IRRIGATION: 500 ml / Acre

ORGANEEM

Works as Antifeedent, Repellant and killer

DOSAGE: FOLIAR SPRAY: 1.5 – 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

KELP KING

It Is Green Seaweed Extract Containing Alginic Acid. Enhances Photosynthesis Activity. High Yield With Optimum Quality. No Black Stain Or Dots Forms On Fruits After Spray.

DOSAGE: FOLIAR SPRAY: 1 – 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

Fertilizer & Crop Nutrients

TIP-TOP

TIP-TOP - Phosphate aids in converting other nutrients into readily usable building blocks, promoting overall plant growth and vitality.

DOSAGE: FOLIAR SPRAY: 1.5 – 2 ml / Liter, DRIP IRRIGATION: 500 ml / Acre

SARVOTAM

Nitrogen Plays A Pivotal Role In Protein Synthesis Within Plants, Serving As A Primary Nutrient That Fuels Rapid Growth And Lush Green Vegetation.

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

FRUIT KING

Organically Available Liquid Fertilizer Enriched With Revolutionary Microbial Extraction Technology. It Is A One-of-a-kind Blend Carefully Balanced With Nitrogen, Phosphate, And Potash, Precisely Meeting The Essential Requirements For The Initial Growth And Development Of Plants. This Unique Combination Ensures That The Crops Receive The Perfect Nutrients For A Healthy Start.

DOSAGE: FOLIAR SPRAY: 1.5 – 2 ml / Liter, DRIP IRRIGATION: 500 ml / Acre

FLOWER KING

Complete Nutrition For Flower Development. Prevent Flower Drop And Flower Abortion. Helps In Pollen Tube Formation, Elongation And Increase In Pollination. Improves Fruits Setting.

DOSAGE: FOLIAR SPRAY: 1.5 - 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

FRUIT KING

Develops Uniform And Highly Gradable Fruits. Improves Sugar Translocation In Plants. Helps To Optimize Size & Weight Of Fruits. Improves Superior Taste, Colour And Quality With Faster Maturity Of Fruits.

DOSAGE: FOLIAR SPRAY: 1.5 - 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

Beneficial Element Fertilizer

FOREXIL

Super Phosphoric Acid 70% is a concentrated and easily absorbable source of phosphorus for plants. Multi-function agent for plant nutrition, pH adjustment, and irrigation equipment cleansing. It ensures optimal nutrient availability, promoting healthy growth, root development, and overall plant vigor. It supports flowering and fruiting, resulting in increased crop yields. It is ideal for pH adjustment. It enhances soil health by preventing and correcting phosphorus deficiencies, resulting in stronger and more resilient plants. By balancing soil pH, it creates an optimal environment for nutrient uptake and utilization.

DOSAGE: 1 to 2 Kg. per Acre

NITROX

It is designed to deliver N 46% & Zn 5% in a more targeted and controlled manner, allowing for better absorption and utilization by plants. It supports healthy plant growth and promotes overall crop productivity and better fruit set, and increased grain yield. It promotes the growth of beneficial soil microorganisms. To enhance nutrient availability and uptake by plants. This leads to improved plant vitality, better stress tolerance, and overall healthier plant growth.

DOSAGE: FOLIAR SPRAY: 2 - 3 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

AGRO FAST

Helps plant to absorb major and micro nutrients from soil. Increased branching and useful at any stage of plant. Useful for better seed germination, root development, vegetative growth, greenery, flowering and fruiting in any crop. It functions as major plant nutrition.

DOSAGE: FOLIAR SPRAY: 1.5 - 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

VAMAXX

Enzymatic Mycorrhiza VAM Powder forms a network of fine filaments, extending the reach of your plant's roots and significantly increasing nutrient and water absorption. The symbiotic relationship between mycorrhizal fungi and plant roots enhances soil structure, promoting aeration and nutrient retention. Mycorrhizal-infused plants exhibit heightened resistance to environmental stresses, diseases, and pests, ensuring healthier and more vigorous growth. By reducing the need for synthetic fertilizers and chemicals, our Enzymatic Mycorrhiza VAM Powder contributes to a more sustainable and eco-friendly agricultural practice.

DOSAGE: DRIP IRRIGATION: 100 gm / Acre

NPK Nano Emulsion Fertilizers

NPK 18:46:00

NPK 19:19:19

NPK 03:50:50

NPK 12:32:16

NPK 00:52:34

NPK 10:26:26

NPK 20:10:10

NPK 00:00:50

NPK 24:24:00

NPK 10:00:40

DOSAGE: FOLIAR SPRAY: 2 - 3 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

- Its Fully soluble balanced compound fertilizer with three essential nutrients N, P and K, which helps increase benefit and profitability of the farmers.
- Its provides balanced supply of nutrients to plant's so as to recover from deficiencies.
- Its required for vegetative growth in plants and increases growth, yield and improves the product quality.
- Its 100% water soluble mixture of fertilizer which can be used in the early stage of the crop growth.
- Its reduces the Nitrogen, Phosphorus and Potassium deficiency in the plant and help for the healthy growth.

Specialized Products

BONDEX

It is a high performance silicon based non-ionic spreader designed specially to improve the wetting, spreading and penetration of all kind of insecticides, pesticides, herbicides & plant growth promoters. It reduces the surface tension of water molecules to a very low level, resulting in a near complete coverage of leaf. It also facilitates uptake of chemicals into the plant tissue. 10 times more effective than carbon based spreaders & stickers Uniform & quick spreading Reduce rain run-off losses Improves the efficacy of agrochemicals High compatibility Faster absorption rate Handling & Storage

DOSAGE: FOLIAR SPRAY: 0.33 - 1 ml / Litre,

REFRESIL

It contains beneficial element Ortho Silicic Acid 19%, which Improves resistance to water stress and helps plants to fight o temperature stress up to 41° C. It also increases reproductive rate in plants. Silicon in plants helps to increase the tolerance to zinc deficiency. It Provides resistance to nutrient and climatic stress. Spray of it Reduces fungus infestation by preventing fungus from penetrating leaf surface. Application of It prevents insects damage by sucking insects like thrips, aphids by creating a protective layer over leaf.

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

PETRON

Enhances root growth. Gives greenery to plant and fruits through better photosynthesis. Activates enzymes and hormone biosynthesis. Defences against oxidative stress. Phenolic compounds are involved in defence against pathogens and parasites. Ultimately resulting in enhanced yield and quality. Its can be used with any pesticides and pgr. Its make 4th time speedy process of photosynthesis in any plant.

LEVEL -pH

DOSAGE: FOLIAR SPRAY: 1.5- 2ml / Litre, DRIP IRRIGATION: 500ml / Acre

It reduces pH of the water to the optimum level required by plants It helps to create a favorable environment for plants to thrive, resulting in healthy and productive crops. It is a new generation pH balancer that enhances chelating property of fertilizers, micronutrients during spray. It helps to release trapped nutrients in soil and also helps plant to absorb nutrients and spray elements efficiently. It also helps to improve soil aeration by increasing the soil porosity resulting in development and establishment of white roots which ultimately increase the yield. It controls optimal pH levels, encourages the absorption of nutrients, and stimulates the metabolism of the plant, achieving greater and better growth.

DOSAGE : For low pH water (pH 7 to 8) - 0.5 ml / Litre, For high pH water (pH above 8) - 0.75 to 1 ml/Litre

Crop Special Fertilizer

Chili Special **SCOTCH**

It is residue-free liquid fertilizer enriched with revolutionary Microbial Extraction Technology. Carefully balanced with nitrogen, phosphate, potash, zinc, boron and essential micronutrients. It is blended with organic carbon that provides diverse energy sources for soil microorganisms, governs soil structure, and regulates the availability of organically bound nutrients. It increases immunity of plant to protect against virus and fungus. It protects plant's root against nematode problem. It protects to damage control against pest like thrips in plants. We recommend 4 sprays at 15 days' intervals for better result in full crop cycle, starting at flowering stage.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

MERIDIAN Mango Special

It is residue-free liquid fertilizer enriched and Carefully balanced with phosphate, potash, calcium, zinc and organic carbon. This unique blend perfectly caters to plant's growth and development needs During flowering and fruiting. Complete nutrition for flower development. Prevent flower drop and flower abortion. Increases drought and disease resistance and protects against fungus and hoppers attack. Improves fruits setting. Prevents cracking and rotting of fruits. Improves shelf life of fruits and quality. We recommend to spray once or twice after flowering for better result.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

Marigold/Jasmine Special **MENIGRO**

It is fully soluble balanced compound fertilizer with three essential nutrients N, P and K that provides balanced supply of nutrients like zinc and ferrous to plant's so as to recover from deficiencies. It contains better nutrition for flower development. Prevent flower drop and flower abortion. It increase immunity to protect against diseases like blight, spot, wilt, root rot, damping off and protect against aphid, leafhopper, thrips, whitefly and caterpillar. We recommend 3 sprays at 15 days' intervals for better result, starting at flowering stage.

TOM-UP Tomato Special

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

It contains beneficial elements like nitrogen, potash that are enriched with revolutionary Microbial Extraction Technology. It's also blended with essential micro nutrients like boron, ferrous and zinc which are very useful for tomato plant. It's highly soluble organic carbon help to regulate the availability of organically bound nutrients. it increase immunity to protect against fungal diseases like blight, wilt, damping off. It protects plant against nematode and virus problem. It protects to damage control against pests like sucking pests in plants. We recommend 3 sprays at 30, 45 and 60 days of plantation for better result.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

Pulses Special **PULSBIN**

It is residue-free liquid fertilizer enriched with revolutionary Microbial Extraction Technology. Carefully balanced with nitrogen, phosphate, potash, zinc, boron and essential micronutrients. It is blended with organic carbon that regulates the availability of organically bound nutrients. It increases immunity of plant to protect against bacterial diseases and fungus. It protects to damage control against pest like aphids in plants. It Increases yield quality to optimum level. We recommend 3 sprays at 10 days' intervals for better result in full crop cycle.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

Crop Special Fertilizer

Groundnut Special **PRONUT**

It contains beneficial elements like nitrogen, potash enriched with revolutionary Microbial Extraction Technology and also added higher organic Carbon. Its enzymatic fine filaments, extending the reach of your plant's roots and significantly increasing nutrient and water absorption. Helps to optimize size & weight of fruits and increase yield also. Improves superior taste, colour and quality with faster maturity of seeds. It helps for better root and shoot development. It protects against black and white fungus of roots and leaf spots. We recommend 2 sprays at 30 and 45 days of plantation for better result.

SEBICON Soybean/Cotton Special

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

It is fully soluble balanced compound fertilizer with two essential nutrients N and K that provides balanced supply of nutrients like zinc, magnesium and ferrous to plants so as to recover from deficiencies. It contains higher organic Carbon also. Increases yield quality to optimum level. Helps in pollen tube formation, elongation and increase in pollination. Increases drought and disease resistance against leaf blight/spots and wilt. We recommend 2 sprays at 15 days' intervals for better result, at flowering stage.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

Banana/Sugarcane Special **CANOBIL**

It is residue-free liquid fertilizer enriched with Carefully balanced nitrogen, phosphate, potash, ferrous, zinc and organic carbon. Increases yield quality to optimum level. Improves sugar translocation in plants. Helps to optimize size & weight of fruits. Improves superior taste and colour of fruits. Improves fruits setting. Prevents cracking and rotting of fruits. It helps control the transport of sugars in plants. Increases drought and disease resistance against leaf blight/spots, wilt and nematode. We recommend 2 sprays at 60 and 90 days of plantation for better result.

CARDLYN Cardamom Special

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

It contains beneficial elements like phosphate, potash and nitrogen enriched with revolutionary Microbial Extraction Technology. It's also blended with essential micro nutrients like zinc and organic carbon also. Improves chlorophyll synthesis. Enhances cell wall size. Increases drought and disease resistance against leaf blight and nematode. Supports plant growth and more shoots. Increases yield quality to optimum level. We recommend 2 sprays at 15 days' intervals for better result during flowering stage.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

Cabbage Special **CABOLINA**

It is residue-free liquid fertilizer enriched and Carefully balanced with potash, calcium, magnesium, boron and organic carbon. This unique blend perfectly caters to plant's growth and development. Helps to optimize size & weight of fruits. Improves superior taste, colour and quality with faster maturity of fruits. It increases immunity to protect against fungal diseases like leaf spot, root rot and damping off. It protects to damage control against pest like aphid and DBM. We recommend 2 sprays at 15 and 30 days of plantation for better result.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

Crop Special Fertilizer

Cucurbit Plants Special CUKUMAX

It is residue-free liquid fertilizer enriched with revolutionary Microbial Extraction Technology. Carefully balanced with potash, calcium, boron, ferrous and essential micronutrients. It is blended with organic carbon that regulates the availability of organically bound nutrients. It helps plant's growth and development to boost flowering and fruit size. It increases immunity to protect against diseases like leaf spot, powdery mildew, wilt and virus. Also protect against aphid, leafminer, thrips, whitefly. We recommend 3 sprays at 15 days' intervals for better result, starting before flowering.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

RAYZON Paddy Special

It is residue-free liquid fertilizer enriched and Carefully balanced with nitrogen, phosphate, potash, ferrous, silica. Increases yield quality to optimum level. Improves sugar translocation in plants. Helps to optimize size & weight of grains. It helps to control the transport of sugars in plants. Increases disease resistance against blight, blast, root rot, hoppers and leaf roller. We recommend 2 sprays at 30 and 45 days of plantation for better result.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500 ml / Acre

Potato Special PITBULL

It is residue-free liquid fertilizer enriched and Carefully balanced with nitrogen, phosphate, potash, calcium, magnesium, boron and organic carbon. This unique blend perfectly caters to plant's growth and development. Helps to optimize size & weight of tubers. Gives superior taste, shining and quality. It helps plant's growth and root development to boost tuber size. It increases immunity to protect against diseases like blight, virus, wilt, nematodes. We recommend 3 sprays at 30, 45 and 60 days for better result.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

TRIBON Tea Special

It is residue-free liquid fertilizer enriched with revolutionary Microbial Extraction Technology. Carefully balanced with nitrogen, potash, zinc, magnesium, calcium and essential micronutrients. It is blended with organic carbon that regulates the availability of organically bound nutrients. It increases immunity of plant to protect against blight, canker, root rot and nematodes. It protects to damage control against pests like thrips, caterpillar, leafhopper, aphids, red mites. It Increases yield quality to optimum level. It Improves leaf colour and size. We recommend 3 sprays at 15 days' intervals for better result in full crop cycle.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre

Brinjal/Okra Special BRIKONA

It is residue-free liquid fertilizer enriched with revolutionary Microbial Extraction Technology. Carefully balanced with potash, zinc, boron and essential micronutrients. It is blended with organic carbon that regulates the availability of organically bound nutrients. It helps plant's growth and development to boost flowering and fruit size. It increases immunity to protect against diseases like wilt, damping off, leaf spot, blight. Also protect against mites, aphids, thrips, shoot and fruit borer. We recommend 3 sprays at 15 days' intervals for better result, starting before flowering stage.

DOSAGE: FOLIAR SPRAY: 2 ml / Litre, DRIP IRRIGATION: 500ml / Acre
